*General conditions.*

1. Tenders should be superscribed "Tender for paper," and should be accompanied by a deposit of one per cent. on the value of the tender. This deposit should be paid into the Bank of Madras, and its receipt attached to the tender. In cases where tenderers may deposit Government Promissory notes, they should endorse the same payable to the "Collector and Superintendent of Stationery, Madras."

2. Tenderers should send six sheets of each description of paper tendered as a sample, marking clearly thereon the manufacturer's name and the description, size and weight. They should be flat, not folded.

3. The papers should be delivered at the Stationery Office, Beach, Madras, at the cost and risk of the contractor.

4. The successful tenderer or tenderers will be required to pay a security of 10 per cent. on the value of the paper for which the tender is accepted, and to sign a contract bond (a form of which will be furnished by this office for inspection) within 20 days from the date of his being informed by this office of the acceptance of his tender; and in case of failure, his deposit delivered with the tender will be forfeited and credited to Government and his tender considered as cancelled.

5. The necessary stamp duty on the contract bond must be paid by the contractors.

6. The quantities specified in the above schedule are only probable requirements: actual demands will be mentioned in the orders given from time to time, agreeably to which contractors will be required to supply the articles.

7. Blotting paper should be packed and supplied in tin-lined deal wood cases. Other papers should be *well packed* in strong canvas with bale planks and iron hoops. These should be unfolded, and each quire in a ream packet should be distinctly marked or separated by a slip of coloured paper, each ream being tied with string. Each ream should also have a label pasted on the outer wrapper showing the description of the paper. All bales of each description and size of paper should contain a uniform number of reams, and no bale should exceed 500 lbs. in weight. Each ream of Printing, Cartridge and Badami papers should contain 500 sheets. Each bale should be superscribed with the description and size of paper and the number of reams it contains.

8. All consignments of paper will be examined after arrival at Madras, and will be liable to rejection if inferior in any respect to the accepted sample. The decision of the Superintendent of Stationery in this matter is final: recourse to arbitration cannot be permitted.

9. All papers must be free from any mixture of mechanical wood pulp.

10. In cases of necessity the contractors must undertake to store the consignments in their own godowns for a period not exceeding three months at their risk and free of charge.

11. In the event of a consignment being rejected, the contractors will be required to remove it at once and replace it within a month from the date of intimation of rejection.

12. Considerations of the quality of the paper tendered and of its price will alone guide the Superintendent in his decisions, but he reserves to himself the right, without assigning any reason, of rejecting any tender in whole or in part, and in respect of articles, rates, quantities or other particulars, etc.

13. Forms of tender and any further information can be obtained on application to the Superintendent of Stationery, Madras.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

SANITARY.

PLAGUE.

*The 25th October 1902.*

*No. 2278.*—In the Notification of the Government of India in the Home Department, No. 2073, dated the 14th November 1901, it was ordered, under the powers conferred by section 2, sub-section (1), of the Epidemic Diseases Act, 1879 (III of 1897), that the pilgrimage to the Hedjaz during the season of 1902 might be permitted, except in the case of persons residing in the Presidency of Bombay (excluding the whole of Sind except the Karachi district), in the Salem and Bellary districts of the Madras Presidency, in Coorg, in the Sialkot, Jullundar, Gurdaspur, Ludiana, and Hoshiarpur districts of the Punjab, in the Benares Division and the Allahabad district of the United Provinces, in Calcutta, the Burdwan and Patna Divisions and the Hazaribagh district of the Chota Nagpur Division in Bengal and in the Native States of Mysore, Baroda, Kashmir and Patiala, subject to certain precautions and restrictions, and that no person should be allowed to embark with the object of making a pilgrimage to Mecca, except at the ports of Porbandar in the Presidency of Bombay and of Chittagong in Bengal.

2. The foregoing regulations were made in pursuance of the policy to which the Government of India have adhered for the past four pilgrim seasons, of prohibiting the departure to the Hedjaz of any person resident within an area infected with plague. This

policy was at no time agreeable to the Government of India. They regretted the restrictions thus imposed upon the liberty of His Majesty's Muhammadan subjects in the discharge of a religious duty, and they acquiesced reluctantly in the imposition of such restrictions, only because of the necessity of deferring to the apprehensions of certain European Powers that plague might be conveyed to Europe through the medium of Indian pilgrims.

3. The Governor-General in Council has therefore much pleasure in announcing that His Majesty's Government has, on the representation of the Government of India, consented to the removal, during the ensuing season, of the restrictions heretofore imposed on the departure of pilgrims from plague-infected areas. The Haj will accordingly be open during the season of 1902-1903 to any resident of India, subject to the regulations hereinafter laid down.

4. The orders contained in the Home Department Notification No. 2073, dated the 14th November 1901, are hereby cancelled.

5. The Governor-General in Council is pleased to direct—

(1) That no person shall be permitted to embark with the object of making a pilgrimage to Mecca except at the ports of Bombay and Karachi in the Presidency of Bombay, of Chittagong in the Province Bengal, and such port, if any, in the Presidency of Madras, as may be notified by the Government of Madras in this behalf.

(2) That no person shall be permitted to embark for such purpose at such port unless he has been kept under observation in a place appointed for the purpose until such time as the Medical Officer in charge shall be satisfied that all risk of such person conveying the infection of plague has completely abated, and unless such person is conveyed from the place of observation to the place of embarkation under the charge of an officer appointed for the purpose.

(3) That no passage tickets for the Hedjaz shall be sold except at the places appointed for the detention of intending pilgrims under observation.

6. Although they have decided that, subject to the foregoing precautions, the pilgrimage to the Hedjaz may be permitted, the Government of India think it necessary to repeat the warning given last year, that intending pilgrims will be well advised in deferring the fulfilment of their purpose until another season, in view especially of the stringent quarantine rules imposed by the Turkish Government and of the inconvenience and harassment to which it is likely that they will be subjected on arriving in Arabia.

*General conditions.*

1. Tenders should be superscribed "Tender for paper," and should be accompanied by a deposit of one per cent. on the value of the tender. This deposit should be paid into the Bank of Madras, and its receipt attached to the tender. In cases where tenderers may deposit Government Promissory notes, they should endorse the same payable to the "Collector and Superintendent of Stationery, Madras."

2. Tenderers should send six sheets of each description of paper tendered as a sample, marking clearly thereon the manufacturer's name and the description, size and weight. They should be flat, not folded.

3. The papers should be delivered at the Stationery Office, Beach, Madras, at the cost and risk of the contractor.

4. The successful tenderer or tenderers will be required to pay a security of 10 per cent. on the value of the paper for which the tender is accepted, and to sign a contract bond (a form of which will be furnished by this office for inspection) within 20 days from the date of his being informed by this office of the acceptance of his tender; and in case of failure, his deposit delivered with the tender will be forfeited and credited to Government and his tender considered as cancelled.

5. The necessary stamp duty on the contract bond must be paid by the contractors.

6. The quantities specified in the above schedule are only probable requirements: actual demands will be mentioned in the orders given from time to time, agreeably to which contractors will be required to supply the articles.

7. Blotting paper should be packed and supplied in tin lined dealwood cases. Other papers should be *well packed* in strong canvas with bale planks and iron hoops. These should be unfolded, and each quire in a ream packet should be distinctly marked or separated by a slip of coloured paper, each ream being tied with string. Each ream should also have a label pasted on the outer wrapper showing the description of the paper. All bales of each description and size of paper should contain a uniform number of reams, and no bale should exceed 500 lbs. in weight. Each ream of Printing, Cartridge and Badami papers should contain 500 sheets. Each bale should be superscribed with the description and size of paper and the number of reams it contains.

8. All consignments of paper will be examined after arrival at Madras, and will be liable to rejection if inferior in any respect to the accepted sample. The decision of the Superintendent of Stationery in this matter is final: recourse to arbitration cannot be permitted.

9. All papers must be free from any mixture of mechanical wood pulp.

10. In cases of necessity the contractors must undertake to store the consignments in their own godowns for a period not exceeding three months at their risk and free of charge.

11. In the event of a consignment being rejected, the contractors will be required to remove it at once and replace it within a month from the date of intimation of rejection.

12. Considerations of the quality of the paper tendered and of its price will alone guide the Superintendent in his decisions, but he reserves to himself the right, without assigning any reason, of rejecting any tender in whole or in part, and in respect of articles, rates, quantities or other particulars, etc.

13. Forms of tender and any further information can be obtained on application to the Superintendent of Stationery, Madras.

J. TWIGG,
Ag. Superintendent of Stationery.

Stationery Office, Madras, 23rd October 1902.

### Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 23.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 24th October, 1902 :

NO. 11 OF 1902.

*A Bill further to amend the Indian Ports Act, 1889.*

WHEREAS it is expedient further to amend the Indian Ports Act, 1889; It is hereby enacted as follows : X of 1889.

1. This Act may be called the Indian Ports (Amendment) Act, 1902. Short title.

2. In section 47 of the Indian Ports Act, 1889, the proviso shall be omitted; and for section 48 of the said Act the following section shall be substituted, namely : X of 1889. Amendment of section 47, and substitution of new section for section 48, Act X, 1889.

Port-dues not to be chargeable in certain cases.

"48. No port-due shall be chargeable in respect of—

(*a*) any pleasure-yacht, nor

(*b*) any vessel which, having left any port, is compelled to re-enter it by stress of weather or in consequence of having sustained any damage, nor

(*c*) any vessel which, having entered any port within the territories administered by the Governor of Fort Saint George in Council, leaves it within forty-eight hours without discharging or taking in any passengers or cargo."

3. For the first entry in the fourth column of Part I of the First Schedule to the said Act, the following entry shall be substituted, namely : Substitution of new entry for entry in column 4, Part I, First Schedule, Act X, 1889.

"Whenever the vessel enters the port, except in the case of mail-steamers and coasting-vessels, which shall not be chargeable more than once in sixty days."

4. To *Explanation* I of Part II of the said Schedule to the said Act, the following proviso shall be added, namely : Addition of proviso to *explanation* I, Part II, First Schedule, Act X, 1889.

"Provided that, for the purpose of the levy of port-dues, a vessel shall not be deemed, during one and the same voyage, to be both a coasting ship or steamer and a foreign ship or steamer, but port-dues shall, in respect of such voyage, be leviable on such vessel either as a coasting or as a foreign ship or steamer, whichever rate is the higher."

## STATEMENT OF OBJECTS AND REASONS.

THE present Bill aims at correcting three defects of a formal character which have been brought to notice in the working of the Indian Ports Act, 1889 (X of 1889).

(1) The exemption allowed by the proviso to section 47 might, in spite of the generality of the term "vessel," be regarded as not including vessels "in ballast," which are dealt with separately in section 46. As there is no reason for excluding vessels in ballast from the exemption, it is considered safer to re-enact the proviso as part of an independent section.

(2) The first entry in the fourth column of Part I of the First Schedule opposite the Port of Calcutta requires revision in order to bring it into accordance with actual practice under which port-dues are levied on coasting-vessels entering that port only once in sixty days. The existing exception of "dhonies and country vessels" is not adapted to modern conditions. The new entry proposed by the Bill will substitute a more liberal provision on the lines of the corresponding entry against Chittagong under which both mail-steamers and coasting-vessels will only have to pay port-dues once in sixty days.

(3) The necessity for the addition of a proviso to *Explanation* I to Part II of the same Schedule, under which it is possible for a vessel to be classified as "foreign" and also as "coasting" during one and the same voyage, was suggested by an opinion of the Advocate General of Madras, in pursuance of which it is sought to render it clear that such a vessel is liable to the levy of port-dues on either scale, whichever is the higher, but not on both scales cumulatively.

## RESOLUTION ON THE REPORT ON THE CENSUS OF BENGAL TAKEN ON THE 1ST MARCH 1901.

GENERAL DEPARTMENT—MISCELLANEOUS.

*Calcutta, the 4th November 1902.*

RESOLUTION—No. 3180 Mis.

READ—

The Report by E. A. Gait, Esq., I.C.S., Superintendent of Census Operations, Bengal, on the census of Bengal taken on the 1st March 1901.

The fourth complete census of the Lower Provinces of Bengal, which was taken on the night of the 1st March 1901, shows the population of the Provinces within the Lieutenant-Governorship of Bengal, including the Feudatory States, to have been on that date 78,493,410 persons, of whom 39,278,186 were males and 39,215,224 were females.

The Superintendent of the Census Operations in Bengal, Mr. E. A. Gait, I.C.S., has submitted his Report within twenty months from the date of the census or after an interval six months shorter than that occupied in compiling the figures and writing the Report of the Census of 1891.

The Report, tables and other information compiled.

2. The Report is contained in four volumes, of which the first three form Volumes VI to VIB of the Imperial Series. The first volume comprises the Report Proper, the second contains the Imperial Tables in which the district is the unit, and the third the Provincial Tables, in which the unit is the Police circle; the fourth volume, which is the Administrative Report, gives a full account of the procedure adopted in taking the census and in compiling the results, matter which on the occasion of each previous census has been included in the Report Proper. In addition to the abovenamed volumes the Census Superintendent has supplied to each district manuscript volumes of village Census Tables, with an index, giving for each "village" and "mauza" the population by sex and religion. Volumes have also been prepared showing in alphabetical order the classification adopted under the heads (*a*) language, (*b*) caste, (*c*) occupations; these volumes, and another which contains specimens of all forms used throughout the operations, are likely to prove most useful at the next census. Mr. Gait also reports that he has caused to be paged, indexed and bound up, the various reports on the subjects of caste, sub-caste, marriage customs, language, Hindu religion, and Muhammadanism which contain much information that has not been utilised in the Census Report, but which may hereafter prove to be useful.

Work of Enumeration, Compilation, Check and Cost.

3. Mr. Gait has summarised in the Introduction to his Report the important facts connected (1) with the work of the enumeration, and (2) with the compilation of the figures recorded in the schedules; and it will suffice to mention here under the first head that the arrangements made were very similar to those of 1891, but that the number of enumerators excluding Calcutta and the Feudatory States in 1901 was 384,000 against 315,000 in 1891, and of supervisors 28,000 as against 26,000. Under the head of compilation it must be mentioned that the "slip system" which has long been in use in census work in other countries was, for the first time, adopted under the orders of the Census Commissioner, Mr. Risley, in a Bengal Census in 1901; the innovation was a complete success both in expediting the work of compilation and also in reduction of cost.

A very detailed examination of the district tables was made by the Superintendent and by his head office. Mr. Gait himself classified all castes, languages and occupations, as he explains in his Administrative Report, and also made a detailed check of the figures of marriage by caste for all castes and all districts. The tabulation for all the earlier tables was checked throughout item by item, and the testing of the caste and occupation tables, though not so complete, was still very thorough; lastly, all entries which disclosed marked differences in comparison with those of 1891, or which seemed to be open to doubt, were worked out *de novo*.

The total cost of the census just taken in Bengal has been about Rs. 3,90,000 as against about Rs. 7,00,000 expended over the census of 1891. The large reduction of cost is due mainly to the introduction of the slip system, but partly also to the employment of establishment on lower pay and to improved record room arrangements.

The Report Proper.

4. The Report is well arranged, and lucidly written and it indicates remarkable knowledge of the Province and its people. The general description of the Province and the historical retrospect in Chapter I, the account of the religions of Bengal in Chapter IV, the learned disquisition on the languages and castes of the Province in Chapters X and XI especially deserve the attention of scholars and will attract very general interest. The Report is longer than usual, but it is not diffuse and its length is amply vindicated on page V of the Introduction where Mr. Gait points out the vastness of the population of Bengal which is a quarter of that of the whole of India and the greatly varying conditions of caste, language, religion and social customs which distinguish the different parts of the Province. The Report is not only a store-house of information, but it is suggestive and inspiring, and it will undoubtedly prove the starting point of much future research.

In the Imperial Tables the districts have been grouped according to Commissioners' Divisions, but in the Report Proper and in the subsidiary tables, the districts have been arranged in eight natural divisions which correspond nearly but not exactly with the divisions adopted by Mr. O'Donnell in his Census Report for 1891, save that Mr. Gait takes the Presidency Division excluding Khulna away from Western Bengal, and makes it into a division which he calls Central Bengal. This is a suitable arrangement; Mr. Gait's reasons for departing from Mr. O'Donnell's arrangement are given in paragraph 40 of his Report. The statistics for the eight natural divisions are ordinarily taken in the Report as the units for discussion, and the figures for individual districts are dealt with only in Chapter II which treats of the variations in the population, and also in special places where such separate treatment is required.

Another feature of the Report which is deserving of special notice consists of the small maps and diagrams printed with the letter-press. Those which illustrate the Chapter on castes have been prepared on the system recommended by Mr. Jacques Bertillon as explained in paragraph 622 of the Report. These diagrams illustrate the statistics very graphically, and the use of similar diagrams in future reports may be commended.

Density and variations of the population.

5. Turning to the results of the census, it has first to be noticed that of the natural divisions Central Bengal has the greatest density of population, viz., 775 persons to the square mile. Of districts, Howrah with 1,668 persons to the square mile is the most thickly peopled and then follow Dacca with 952 persons, and Muzaffarpur and Saran with 917 and 907 persons to the square mile, respectively: the Chota Nagpur plateau is the area of least dense population, with only 152 to the square mile. The general increase of the population during the decade has been 5·1 per cent. against 7 per cent. in the previous decade. East Bengal with an increase of 10·4 per cent. is the most progressive part of the Province and the general result of this census and of the preceding census is to show that the centre of population of the Province is moving towards the east and south.

It appears from the Report that from 1872 to 1891 there was a steady improvement in the accuracy of the enumeration, and that part of the increases brought out by the Censuses of 1881 and 1891 was therefore unreal: on the other hand that disclosed by the present census is attributable solely to the growth of the population. Mr. Gait writes:—

"The standard of accuracy in 1891 had reached a stage which left but little room for further improvement and, as compared with that census, it is probable that the general gain on this account at the present enumeration does not at the outside exceed 100,000, while in the districts where plague was prevalent, the census of 1901 was less complete than its predecessor. Taking the gain and loss together, it may be concluded that there has been no appreciable improvement in the matter of accuracy at the present census."

A close approximation between the growth of the total population as ascertained by the census and that indicated by the vital statistics of the Province is noticed in paragraph 90 of the report; and paragraphs 235 and 396 to 398 discuss a general fall in the birth-rate.

To the mass of the people the most important events of the decade were the scarcities of the years 1891-92, 1896-97 and 1899-1900, the outbreaks of plague which began in the Province in 1898 and the development of the mining and mill industries which led to a great increase in the industrial population therein employed. To Chittagong the cyclone and storm-wave of 1897, which caused directly or indirectly 50,000 deaths, was a grievous calamity. No connection appears to exist between famine and variations in the population in Bihar (paragraphs 176, 181, 186 and 229 of the report); but it would seem that in Chota Nagpur a certain amount of the mortality is possibly attributable to famine (paragraphs 199, 203 and 206).

Seven districts have decreased in population since 1891, viz., Jessore, Patna, Gaya, Shahabad, Saran, Champaran and Purnea, the decrease ranging from 8·4 per cent. in Patna to 2·2 per cent. in Saran. There can be no doubt that the decrease in Patna is mainly due to mortality from plague, to the flight of the people from their homes on account of that disease, and to incomplete enumeration in certain places due to the disorganisation of the census

arrangements by plague. In Saran the loss of population is also accounted for by the plague epidemic which was more virulent there than in any other district of this Province, except Patna. In Jessore, Champaran and Purnea, the decrease is due to the prevalence of fever and in Purnea also to a very severe outbreak of cholera which occurred in the year 1900. In South Bihar generally, Mr. Gait finds a diminished birth-rate (paragraph 396).

That Bengal like the rest of India is a land of villages and not towns has long been known, and it appears that at the present time out of every 100 persons in the Province, 95 live in villages and 5 in towns. In the statistics for towns the most striking features are the increase in the population of Calcutta and Howrah and their suburbs, and the decrease in the towns of Bihar, which was due to plague mortality and to temporary desertion caused by plague.

Migrations of the people.

6. The great and growing immigration to Bengal Proper from Bihar and the United Provinces, the emigration from Chota Nagpur to the Assam tea gardens and from the Sonthal Parganas to the Barind tract of Northern Bengal are the most noticeable features of the "migration" statistics. The immigrants from Bihar and the United Provinces come to work in the mines of the coal area, and in the mills of the Metropolitan districts, while in the districts of Bengal proper generally they are employed as field labourers, on earthwork on railways, roads and tanks in the towns (and especially in Calcutta, where 40 per cent. of the inhabitants are Hindi-speaking), they are mostly day-labourers, servants and palki-bearers. Chota Nagpur, though the most sparsely populated tract of the Province, sends out not only the greatest number of emigrants but also the largest proportion as compared with its population; next to Chota Nagpur the districts of Bankura, Hooghly, and Saran send out the greatest proportion of emigrants. More than 10 per cent. of the persons born in these districts were enumerated away from their homes. It has generally been supposed that, except in Chota Nagpur, pressure on the soil was the chief factor in determining the extent of migration, but Mr. Gait strikes a new note and makes the following interesting remarks as to the capacity of rice-growing tracts to support large populations:—

"Speaking generally, it may be said that Eastern Bengal is capable of supporting a much greater population per square mile than Bihar and that in Bihar the tracts which can support most people are those where rice is grown. This explains why Muzaffarpur and Durbhanga with their extensive rice tracts are less dependent on earnings outside the district than Saran which is reported to be very fertile and is highly cultivated and well irrigated but which has a comparatively small area under rice cultivation. Purnea, whence the emigration is least, is almost wholly devoted to the growth of rice."

The theory is ingenious, but, on the other hand, it is to be remembered that it is the rice-growing tracts of Bihar which are most liable to famine, and that Saran, which is a "three harvest" district, is the district of North Bihar most immune from famine.

Europeans and Eurasians.

7. The number of Europeans in the Province has increased from 22,773 in 1891 to 27,489 in 1901 and the number of Eurasians from 15,162 to 23,114. The Superintendent considers this return to be more accurate than that of the last census when the Eurasians amounted to only 39 per cent. of the combined population of the two races compared with 46 per cent. on the present occasion. About half of the Europeans and nearly two-thirds of the Eurasians were enumerated in Calcutta. Amongst the Europeans the males aged 15 and over are more than twice the number of the females.

Religions.

8. Nearly two-thirds of the population are Hindus by religion and rather less than one-third are Muhammadans. Next in number at a long interval are those who are classed as Animists, of whom two and three quarters millions have been recorded, chiefly in the Chota Nagpur plateau; the Christians, who are over a quarter of a million, stand fourth, and are followed by the Buddhists, who are under a quarter of a million in number. The aggregate of persons of all other religions is less than fifteen thousand.

The Hindus are predominant in Bihar and Orissa, on the eastern edge of the Chota Nagpur plateau, and on the western fringe of Bengal proper; the Muhammadans, who have increased in number nearly twice as rapidly as the Hindus during the past decade, are almost as numerous as the Hindus in Central Bengal, are half as many again in North Bengal, and are more than twice as many in East Bengal. Christians have increased 45 per cent. in the last ten years, and are three times as numerous as they were at the census of 1872; the converts in the Ranchi district amount to nearly half the Christians in the Province.

It is not possible in this place to do more than mention the interesting discussions in Chapter IV of the Report on the origin of the Muhammadans of Bengal, the Muhammadan sects, the Hindu sects and godlings, and the traces of Buddhism in Bengal. Mr. Gait mentions in paragraph 380 the valuable researches made by Pandit Hara Prashad Shastri with regard to the last-mentioned subject

The ages of the people.

9. The age returns, as in former censuses, are probably the least trustworthy of all the statistics collected. This inaccuracy is due to ignorance, to a preference for certain numbers, and in a lesser degree to wilful misstatements. In view of the admitted inaccuracy of the figures, which is especially noticeable among females, Mr. Gait has used the age statistics chiefly for purposes of comparison: a more elaborate treatment of these statistics will be forthcoming, it is understood, in the Imperial Census Report. It is suggested that the birth- and death-rates were over-estimated in 1891 (paragraph 392), and reasons are given which carry conviction for the contention that there has been a decline in the general birth-rate since 1891 (paragraphs 396 to 398).

Sex and marriage.

10. With regard to the proportion of the sexes, Mr. Gait writes:—

"At the census of Bengal taken in 1872 there was an equal number of each sex, but in 1881 the females exceeded the males by 8 per 1,000. Ten years later the excess fell to 5 per mille, and now the females are fewer than the males by 2 per mille. The actual deficiency in the number of the weaker sex at the present census is 62,962, but this result is due to migration. If only persons born in Bengal are taken into consideration, the females outnumber the males by 160,375, or about 3 per mille."

As was noticed in the census of 1891, the female sex is proportionately more numerous than the male in Bihar, in Chota Nagpur, and in Western Bengal, but males are in excess in the eastern half of the Province, and especially in the districts where the Mongoloid element in the population is strongest, viz., in Jalpaiguri, Cooch Behar, Dinajpur, the Chittagong Hill Tracts, and Hill Tippera.

It is a commonplace that every one in Bengal marries. The average age of marriage for girls all over the Province was stated in 1891 to be eleven years. Doubtless because of the inaccuracy of the age statistics, Mr. Gait has not attempted to state the average age of marriage for the Province or for particular areas except Chota Nagpur, where, he says, that the usual age of marriage for a girl is between 17 and 18. But the general conclusions of the census of 1891 stand good for the later census. Hindu girls, except in Orissa, are married earlier than Muhammadan girls. The marriage of infants below ten years is most common in Bihar and specially in the Darbhanga district and parts of Muzaffarpur and Bhagalpur. The proportion of widows and of married girls under ten years of age is declining slightly.

The marriage customs of the different Hindu castes are examined in detail, and Mr. Gait arrives at the conclusion that the price paid for a bride or bridegroom depends ultimately on the laws of supply and demand (paragraph 424), and that the age at which a girl is married varies to a great extent with the sum which has to be paid for her (paragraph 433). A former theory that infant-marriage in India is based on the practice of hypergamy amongst the higher castes which leads a man to seek to marry his daughter to a suitable bridegroom at the earliest possible moment, and that the lower castes have copied the practice of the higher castes in this matter was contested by Mr. O'Donnell in his report for 1891. Mr. Gait supports Mr. O'Donnell's conclusions and finds that as a rule the lower castes marry their daughters earliest. The differences are, however, in the main local rather than personal (paragraphs 439 and 440).

It is usually thought that infant marriage and the prohibition of widow remarriage go together; but this is not the case. Where infant marriage is most common, widows freely remarry and (in some cases) fetch a higher price than virgin brides, owing to their greater skill in the caste occupation (paragraphs 441 and 424).

Infirmities.

11. The infirmities recorded at the census as on former occasions were insanity, deafmutism, blindness and leprosy. The number of persons afflicted with these infirmities shows a progressive decline due, as is believed, in the main to more accurate enumeration and more careful exclusion of persons whose infirmities, whatever they might be, did not fall within the scope of the sanctioned definition.

The maps given in paragraphs 457, 463, 470 and 476 of the Report show in very striking manner the local prevalence of infirmities. Insanity is most prevalent in North Bengal and in Chittagong and the Chittagong Hill Tracts, and Mr. Gait finds that the prevalence is a matter of race and that the Koch is specially liable to this infirmity. Deafmutism is generally associated with cretinism and goitre: it is most common in the Himalayan and sub-Himalayan districts, and it is especially prevalent along the course of certain moribund rivers near the foot of the Himalayas. Deaf mutes are very short-lived (paragraph 466). Blindness is most common in the hot and dry districts of South Behar and Chota Nagpur. In connection with the decrease in the number of blind persons recorded, Mr. Gait notices that 15,987 successful operations for cataract were performed in the public hospitals and dispensaries in the last decade as against 2,434 during the previous ten years. The great centre of leprosy in these Provinces lies in the three western districts of the Burdwan Division, viz., Bankura, Birbhum and Burdwan and in the adjoining district of Manbhum. In the Province generally the census shows a decrease in the number of lepers, who number 48 for every 100,000 as compared with 60 in the last census; but there appears to have been a spread of the disease in Manbhum and the Sonthal Parganas. The decrease is probaly due to more careful enumeration resulting in the exclusion of those who are affected merely with leucoderma.

Education.

12. At the census of 1891 the population was divided into three categories, viz., literate, learning and illiterate, but at the census of 1901 the population was broadly divided into two great classes only, the literate and the illiterate, *i.e.*, of those who are or are not able both to read and write. This change of system, though it has simplified the work, has obscured the results and made a detailed comparison difficult. Comparing the figures, however, for persons over 15 years of age, the number of literate males in the whole Province is 146 per 1,000 as against 137 in 1891, and the number of literate females 7 per 1,000 against 4 only in 1891. It will be noticed that the figures given in the 484th paragraph of the report show the absolute and not the proportional increase of literacy since 1891.

Wide as is the field for the improvement of primary education among the male population, still more remains to be done among the female population, and the progress during the last decade has been proportionately greater among females than among males, though not absolutely so great. Mr. Gait urges in his 485th paragraph that female education has made great strides during the decade; but looking to the very small number of educated females in the whole Province, this seems too confident a statement, and it can hardly be accepted for any area except Calcutta.

The continued and increasing superiority of the Hindus over the Muhammadans in literacy, the large amount of literacy among converts to Christianity, and the marked superiority of the metropolitan area over the rest of the Province are the most striking features of the chapter dealing with the statistics of education. The most backward part of the Province in education, in spite of the efforts of the Christian Missionaries, is Chota Nagpur, and next lowest is North Bihar.

The statistics of knowledge of English may with advantage be more fully examined than has been done in paragraph 486 of the Report. Table VIII

shows that in the whole Province 351,310 males and 22,972 females are "literate in English," *i.e.*, are able to read and write English. Deducting from these numbers 24,156 males and 15,089 females who returned English only as their "language ordinarily used," *i.e.*, the European and Eurasian population, it appears that there are 327,154 males and 7,883 females among the native population who can read and write English. So far as these figures can be compared with the statistics of the last census, it would appear that, as might be expected, there has been a considerable increase in the number of English-knowing persons among the native population of the Province since 1891.

Language.

13. Mr. Gait's chapter on the languages of the Province is of the highest interest.

Omitting Europeans and Eurasians but including all other immigrants, the people of the Province speak 74 languages, viz., 15 grouped under the Aryan Family, 16 under the Munda Family, 9 under the Dravidian Family, and 34 under the Tibeto-Burman Family. That there has been no unnecessary sub-division of languages in this category will be understood when it is mentioned that Hindi includes Urdu and Bihari the latter of which Dr. Grierson once divided into seven dialects. Out of every 1,000 persons in the Province 528 speak Bengali, 341 Hindi (including Bihari), 79 Uriya and 1 speaks Khas (or Nepali-Hindi) leaving 51 persons per 1,000 for all the other 70 languages put together. .It is in the Chota Nagpur plateau with its Munda and Dravidian dialects, in Darjeeling and Sikkim with their Tibeto-Himalayan dialects, and in the Chittagong Hill Tracts where the Kuki, Chin and Bodo dialects are spoken that the great congeries of non-Aryan languages are found. Mr. Gait has avoided a detailed examination of Aryan dialects partly in order to curtail his report, and also because Dr. Grierson is dealing with these dialects; but he has discussed the Himalayan, Sikkim and Nepal groups of languages more fully than the others, because they have not yet formed the subject of any reports in the linguistic survey.

The conclusion at which Mr. Gait arrives in his 545th paragraph as to the absence of any necessary connection between race and language is noticeable.

Castes.

14. The chapter on castes is the longest in the volume, and takes up nearly one-fourth of the Report. Much labour was given to this part of the enumeration. A caste index largely based on Mr. Risley's "Caste and Tribes" was circulated to Census Officers of higher grades, and greatly facilitated the work, but even with this help, the classification of doubtful entries gave immense trouble. The discussions on the origin of caste (paragraphs 550 to 574), and on the social precedence of castes (paragraphs 575 to 621) have been inserted in accordance with directions given by the Census Commissioner.

With insufficient time at his disposal for working up the results of his enquiries, or for following up the numerous and difficult side issues which arose in the examination of the caste figures, Mr. Gait has nevertheless made a most important contribution in this chapter to the ethnography of the Province, and has presented several obscure questions in a clearer light than has before been shed on them.

The origin of existing castes is discussed in paragraphs 566—574 of the report and the origin of the restrictions which characterise the institution of caste is distinguished from the question as to how the existing castes were recruited. The views held by M. Senart that the sub-caste is the true caste, and that caste was a natural development of the family and tribal organization of the Aryans are cited in paragraph 562; but Mr. Gait holds that caste is more likely to be due to the influence of the panchayats of the functional groups. He quotes the definitions of "caste" given by his predecessors in this field of enquiry—Messrs. Nesfield, Baines and Risley, and propounds the following careful definition of his own:—

> "A caste is an endogamous group or a collection of such groups bearing a common name who, by reason of similarity of traditional occupation and reputed origin, are generally regarded, by those of their countrymen who are competent to give an opinion, as forming a single homogenous community, the constituent parts of which are more nearly related to each other than they are to any other section of the society."

Mr. Gait adds that the decision as to caste must rest with enlightened public opinion, and not with public opinion generally, as it often happens that a Hindu knows little about any caste other than his own.

The orders issued with regard to arrangement of castes according to their social status gave rise to many acrimonious disputes, *e. g.*, specially with reference to the relative precedence of the Baidyas and the Kayasths and the position of the Chasi-Kaibarttas. In order to avoid as far as possible giving offence to rival castes, Mr. Gait has made his different groups fairly wide, and as a rule has avoided mention of the relative position of castes in the same group.

Of the castes other than Muhammadan there are fifteen having more than a million members, viz., (in order of numbers) the Ahirs (or Goalas), Brahmans, Kaibarttas, Rajbansis (or Koches), Namasudras (Chandals), Santals, Chamars (Muchis), Rajputs, Kurmis, Telis, Kayasths, Koiris, Dosadhs, Babhans and Bagdis. The Ahirs who are nearly four millions are a long way the most numerous; next follow the Brahmans with nearly three millions, the Kaibarttas who are nearly two and-a-half millions, the Rajbansis with over two millions, the Namasudras and the Santals each with over eighteen hundred thousand; the Chamars with sixteen hundred and twenty-six thousand; while the other eight castes named are each between a million and a million-and-a-half strong. The distribution of the main castes is illustrated by a series of maps which show in a very striking way how strictly local are many of the main groups. The Babhans, Dhanuks and Koiris for instance are confined to Bihar, the Bagdis and Sadgops to West Bengal, the Chasas and Khandaits to Orissa, the Chandals to East Bengal, the Pods to Central Bengal and the Rajbansis to North Bengal.

Among the notes on particular castes and tribes possessing special interest are to be mentioned those regarding the Saraks (paragraphs 778—780) an interesting archaic community, probably of Jain or Buddhist origin, found in Western Bengal, Chota Nagpur and Orissa, the notes on the disputed question of the origin of the Rajbansis (paragraph 617), on the Sectarian castes (paragraphs 782—787), on Muhammadan castes and tribes (paragraphs 812—817), and on the Nepali tribe of Newars (paragraphs 886—894).

Occupations.

15. The scheme of occupations prescribed for the census was very elaborate, comprising, as it did, eight classes, twenty-four orders, seventy-nine sub-orders and five hundred and twenty groups, and the preparation of the returns under this head was therefore very laborious. The Superintendent states (paragraph 905) that from one-third to a quarter of the entire expenditure on the census operations was incurred in compiling the occupation tables. The arguments used by Mr. Gait in paragraph 905 in favour of having a simpler classification in future are well worthy of attention, and seem to be conclusive against the attempt to collect statistics of occupation in such elaborate detail as has hitherto been done. This seems to be a case where elaboration defeats itself and where the truth is to be obtained only by a broad and general classification of occupations.

Changes of system which are noticed in paragraph 906 and following paragraphs of the Report have confused comparison with the corresponding return for 1891, and make detailed examination useless. Speaking generally, however, it appears that nearly 57 millions or 72·5 per cent. of the population are classed under the main head as employed on "Pasture and Agriculture;" nor is this an exhaustive statement of persons occupied with agriculture as it is probable that a considerable number of the five-and-a-half million general labourers returned as non-agricultural are at some seasons of the year employed in agriculture, and it will be safe to say that over three-fourths of the population are dependent on the land. Artisans and others classed under the head "Preparation and supply of material substances" make up over 9½ millions or 12 per cent., and unskilled labourers, not, agricultural, are over 6 millions or 7½ per cent. of the population. The statistics which have been collected showing the small share of high appointments in Government service which are held by Muhammadans, and the practical monopoly of all such

appointments held Hindus by members of the Kayasth, Brahman and castes may be mentioned as a feature of this chapter.

16. In conclusion, the Lieutenant-Governor desires to record his appreciation of the labours of the Superintendent, and the District Officers as well as of a large number of officials and non-officials which have resulted in a most successful census of the people, and he has in addition to thank Mr. Gait for a Report of singular merit and ability. Mr. Gait's commendation of the work of his Assistants Mr. Howard, Mr. Moberly, Babu Jamini Mohan Das, Babu Mon Mhan Ray and Mr. Manmatha Nath Ghosh will be recorded in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secretary to the Government of Bengal.*

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers; ≏, dew.

*New Leading Lights.*

THE Port Master, Brisbane, has given Notice (No. 10 of 1902) that, on and after the first day of November 1902, the following Leading Lights will be exhibited to enable vessels to pass through Normanby Sound by night, viz :—

*Entrance Lead.*—Two bright lights, the front one carried on the black beacon marking the S. E. extremity of Wai-weer Reef, the back one on the slope of the south knoll of Hammond Island, in line N. 79° E.

*Wai-weer and Vivian Point Lead.*—Two bright lights, the front one carried on the black beacon marking the W. extremity of Wai-weer Reef, and the back one on the hill on Goode Island marked 316 feet, in line bearing N. 70° 30′ W.

*Jetty Lead.*—Two red lights, the front one on the jetty, and the back one on the slope of Milman Hill, in line bearing N. 49° E. This lead was discontinued formerly, but will now be re-established.

*Directions.*

Vessels approaching Thursday Island by Normanby Sound at night will proceed as usual until two bright lights are opened out ahead, which must be kept in line on a bearing of N. 79° E. until two bright lights are opened out astern bearing N. 70° 30′ W. Keep the latter in line until two red lights are opened out on a bearing of N. 49° E., which are to be kept in line until jetty is approached.

As these lights have been placed to meet the requirements of the coastal steamers, caution is necessary in navigating vessels of greater length and capacity, by reason of the strong and erratic tides prevailing in this locality.

## REPORT ON THE ROAD AND PUBLIC WORKS CESS OPERATIONS OF THE LOWER PROVINCES FOR THE YEAR 1901-1902.

NOTIFICATION No. 4833R.P.

*The 11th November 1902.*—The following extracts from the Report of the Board of Revenue on the Road and Public Works Cess operations in the Lower Provinces for the year 1901-1902 are published for general information.

E. W. COLLIN,
*Offg. Secy. to the Govt. of Bengal.*

No. 759A., dated Calcutta, the 29th August 1902.

From—A. EARLE, Esq., Offg. Secretary to the Board of Revenue, L. P.,
To—The Secretary to the Government of Bengal, Financial Department.

I AM directed to submit the Board's Report on the Road and Public Works Cess operations for the year 1901-1902.

THE HON'BLE MR. C. W. BOLTON, C.S.I.

Rate, land revenue demand, and gross rental.

3. As in the preceding year, the cesses were levied at the maximum rate of one anna in the rupee in the 43 districts in which the Act is in force. The Act has been introduced in the recently re-settled estates in the Sonthal Parganas, and

valuation is in progress. The current demand of land revenue in the 43 districts is Rs. 3,96,95,675, and the gross rental, or valuation, amounts to Rs. 17,03,53,369.

4. The demands, collections, balances, and remissions of the year are compared with those of the two preceding years in this table:—

Demands, collections, balances, and remissions.

| Year. | Demand. | | | Collections. | Percentage of total collections on current demand. | Balance. | Percentage of the balance on the total demand. | Remissions. |
|---|---|---|---|---|---|---|---|---|
| | Current. | Arrear. | Total. | | | | | |
| | Rs. | Rs. | Rs. | Rs. | | Rs. | | Rs. |
| 1899-1900 ... | 90,84,990 | 19,09,787 | 1,09,94,777 | 93,13,990 | 102·5 | 17,04,508 | 15·6 | 45,257 |
| 1900-1901 ... | 91,85,325 | 16,74,304 | 1,08,59,630 | 92,02,874 | 100·1 | 16,71,048 | 15·4 | 70,321 |
| 1901-1902 ... | 93,26,543 | 16,75,523 | 1,10,02,066 | 93,13,325 | 99·8 | 16,84,918 | 15·3 | 66,873 |

The current demand shows an increase of Rs. 1,41,218 over that of the previous year. This was mainly caused by revaluations in the districts of the 24-Parganas (Rs. 38,559), Nadia (Rs. 3,874), Dacca (Rs. 16,288), Backergunge (Rs. 10,725), Tippera (Rs. 12,207), Noakhali (Rs. 6,586), Shahabad (Rs. 21,722), and Ranchi (Rs. 18,730), by the assessment of coal-mines and resumed *chakaran* (service) lands in Burdwan, and by the valuation of *ghatwali* lands in Birbhum. The arrear demand increased by Rs. 1,219, but was Rs. 2,34,264 less than that of 1899-1900. The collections were Rs. 1,10,451 more than in the previous year. Owing to the considerable increase in the demand of the year, there was a slight decline (from 100·1 to 99·8) in the percentage of total collections on the current demand. The outstanding balance has increased by Rs. 12,970, but is less by Rs. 19,680 than that of 1899-1900. The percentage of the balance on the total demand is almost the same as in the preceding year. The remissions, which amounted to Rs. 66,873, against Rs. 70,321 in the previous year, were granted chiefly in the districts of Burdwan (Rs. 16,599), Birbhum (Rs. 3,148), Khulna (Rs. 4,509), Backergunge (Rs. 5,029), Tippera (Rs. 3,074), and Singhbhum (Rs. 16,608), and were on account of revaluations of estates under section 13 of the Cess Act, erroneous and double assessments, diluvion, revision of assessments of mines and forests, and acquisition of land for the Assam-Bengal Railway.

5. The districts are grouped in two classes, that is, (*i*) those in which the collections attained the prescribed standard of 100 per cent. on the current demand, or more, and (*ii*) those in which the collections were short of that standard. The marginally-noted districts fall under the first class, and in their case no explanation is needed. In Mymensingh and Muzaffarpur the percentage of collections was above 105. It was less than 100 in the 18 districts noticed below, against 19 in the previous year:—

1. Mymensingh.
2. Muzaffarpur.
3. Hooghly.
4. Midnapore.
5. Faridpur.
6. Pabna.
7. Balasore.
8. Nadia.
9. Darjeeling.
10. Backergunge.
11. Murshidabad.
12. Chittagong.
13. Bogra.
14. Gaya.
15. Champaran.
16. Dacca.
17. Patna.
18. Dinajpur.
19. Bhagalpur.
20. Darbhanga.
21. Malda.
22. Birbhum.
23. Jalpaiguri.
24. Rajshahi.
25. Saran.

(*i*) In Puri (99·8), Tippera (99·7), Jessore (99·6), Palamau (99·3), Noakhali (98·9), 24-Parganas (98·7), and Purnea (98·2), the percentage exceeded 98, and explanation of the failure to reach the standard is not called for. The explanations in regard to the remaining 11 districts are as follow.

(*ii*) *Bankura* (97·5).—The short collections are attributed principally to non-payment by the owners of three big estates, of which one is under attachment under section 99 of the Cess Act, and also to the failure of crops.

(*iii*) *Rangpur* (97·4).—The decrease (from 99·4 in 1900-1901) is ascribed to non-payment by two big estates for three successive kists. In one a dispute between the co-sharers has led to the defaults, while the other is under the management of a receiver appointed by the Collector under section 56 of the Land Registration Act, who has not been able to make collections, a co-sharer of the property having refused to furnish him with information regarding the liabilities of the tenants.

(*iv*) *Hazaribagh* (97·1).—The decline in collections (from 98·9 in 1900-1901) was principally due to non-payment at the last kist by certain zamindars,

and to the withholding of payment by the proprietors of certain mica mines, which were assessed for the first time or of which the assessment was enhanced during the year. Three of the defaulting zamindars have recently applied for the protection of their estates under the Encumbered Estates Act.

(*v*) *Monghyr* (96·9).—The unsatisfactory result is ascribed (1) to plague and (2) to the survey and settlement operations, which kept the proprietors busy before the Settlement Officers. The Commissioner, however, does not accept these explanations, and is issuing orders that the Collector should insist upon the Deputy Collector in charge paying more attention to the subject than he has done during the year.

(*vi*) *Cuttack* (96·07).—The low percentage is attributed to the gradual decrease of the arrear demand and to default on the part of certain important estates.

(*vii*) *Shahabad* (94·2).—The failure to attain the standand was due (1) to the deficiency of the winter rice crop and (2) to the non-payment of the demand of the March kist within the year by the zamindar of Surajpura and the receiver of Babu Baij Nath Sahai's estate.

(*viii*) *Burdwan* (94·0).—The short collections are ascribed to large amounts due from the Burdwan Raj and two other important estates not having been paid within the year.

(*ix*) *Khulna* (92·7).—The percentage would have been more than 101 had not the current demand of the Syedpur Trust estate been satisfied by adjustment from the excess payments that had accrued, owing to the valuation of the estate having been reduced with effect from the year 1898-99.

(*x*) *Manbhum* (87·06).—The short collections were mainly due to the non-payment of a large sum (Rs. 42,271) by the Patkum and Barrabhum encumbered estates. In the former the arrears occurred owing to the Patkum Indigo and Trading Company, who held the greater portion of the estate, having failed for several years to pay the rent and cesses due under their lease. Certificates were filed and decrees obtained, but all proceedings had to be stayed in consequence of the Company having gone into liquidation. The lease was put up to sale and purchased by the estate in July 1901, but the collection papers were not received from the liquidator's office till September of that year, and actual collections did not commence till October. It is hoped that the arrears will be paid within the current year.

(*xi*) *Singhbhum*.—The decline in the percentage (from 87·4 to 85·5) is attributed to the failure of the proprietors of the Dhalbhum and Anandpur estates to pay their dues within the year. The Commissioner also says that the lessees of mines and forests not infrequently default, and that, as they are not permanent residents of the district, it is often difficult to obtain their addresses.

(*xii*) *Ranchi* (70·3).—The poor results were due to the inability of the Maharaja of Chota Nagpur, who practically pays the whole of the cess demand, to recover his dues from his tenure-holders, many of whom have alienated their properties. Out of the balance of Rs. 52,012, a sum of Rs. 38,079 has been realised since the close of the year, and the remainder is in course of recovery.

Working of Certificate Procedure.

7. The number of certificates filed during the year for the realisation of cess arrears was 139,613, against 127,360 in the previous year, which, with 43,399 certificates pending from 1900-1901, gave a total of 183,012 for disposal. Of these, 143,355, or 78·3 per cent., were disposed of, against 75·9 in the previous year, leaving 39,657 cases pending. The increase in the number of cases filed is shared by all Divisions except Burdwan and Orissa, and appears to be chiefly due to more vigorous action in enforcing demands. It is most marked in Gaya (6,647) and Monghyr (3,224). In Gaya the increase was due to the institution of cases punctually after each kist, and this has materially helped in the prompter collection of the demand. In Monghyr also greater punctuality and strictness prevailed in the cess office, and the increase in institutions is further explained by the fact that the number of certificates filed during 1900-1901 was much below the average of the three preceding years. The collection of cesses of rent-free lands direct by the Government, instead of through the zamindars in whose estate the lands lie, adds greatly to the number of certificates in some districts

8. There was a noticeable decline in the institutions in Burdwan (1,294), Bankura (714), Jessore (506), Faridpur (1,155), Saran (1,655), Darbhanga (547), and Balasore (622). In Bankura, Faridpur, and Balasore this is attributed primarily to the withholding of certificates for petty arrears, which, in accordance with orders approved by the Government, are now allowed to accumulate to Rs. 5, provided that certificates must issue for any smaller sums when it is necessary to avoid their recovery being barred by limitation. No explanations have been furnished from the remaining districts. The decrease in Hazaribagh and Singhbhum is due to the issue, in the first instance, of warning post-cards immediately after the kist, on receipt of which many assessees paid up their dues. The use of post-card notices and the larger employment of kanungoes for the collection of petty arrears in Orissa tended to reduce the number of certificates filed in that Division. The largest number of cases was instituted in Burdwan (5,293), Midnapore (9,482), Hooghly (15,114), 24-Parganas (6,433), Chittagong (5,089), Patna (8,001), Gaya (12,216), Shahabad (8,465), Saran (8,865), Muzaffarpur (6,840), Darbhanga (5,318), and Monghyr (5,630).

9. The disposals exceeded the institutions in all the Divisions except Chittagong and Bhagalpur, where, however, the number of cases filed was greater than in the preceding year. The districts in which the number of pending cases at the close of the year shows a large increase are Midnapore, Dacca, Noakhali, Gaya, and Monghyr. No explanation has been furnished in regard to Midnapore, but it appears from a separate communication received from the Commissioner that the necessary temporary staff could not be employed, suitable men not being available. In Dacca the increase is attributed to a large number of institutions in the latter part of the year. The Collector reports that the file has now been greatly reduced. The deficiency in disposals in Noakhali is attributed to the filing of cases for arrears due from rent-free lands under section 70 of the Act in the latter part of the year. In Gaya and Monghyr the increase was due to the larger number of institutions— 12,216 and, 5,630 against 5,569 and 2,406, respectively, in the previous year. The largest number of pending cases in the Patna Division is in Shahabad, and this, the Commissioner says, accounts partly for the collections having fallen considerably below the standard. The pending files show material reductions in Burdwan, Mymensingh, Faridpur, Chittagong, Saran, and Muzaffarpur. It is satisfactory to note that, notwithstanding the increase in the number of institutions, the number of pending cases in all the Divisions declined from 43,399 (revised figure) to 39,657, or by 3,742.

Objections against certificates.

11. The total number of objections lodged against certificates was 11,759, against 11,621 in 1900-1901, of which 11,498 against 11,284 was disposed of. The largest number disposed of was in the districts of Burdwan (1,003), Hooghly (932), Gaya (983), Shahabad (1,731), and Saran (3,899 . In 1,146 cases the certificates objected to were cancelled, the percentage increasing from 8·8 to 9·9. The result is not so favourable as in the previous year, but is better than in 1899-1900—10 7. The number of cases in which reductions were made in the amount certified was 548 against 559. Out of 1,146 cases, in which certificates were cancelled on objection, Burdwan contributed 95, Dacca 105, Patna 142, Saran 217, and Monghyr 132. The cancellations were due to defective entries in the record-room and land registration registers, death and desertion of defaulters, exemption of lands lying within municipal limits, double assessments, and non-registration of names of holders of rent-free lands. In Monghyr the special cause was the incomplete state of the land registration registers, particularly in respect of the omission of the numbers of the separate accounts, which led to the entry in the certificates of the names of proprietors of residuary shares when those for separate accounts were required, and *vice versâ*. The Board will call for a special report on the subject.

Stage of procedure at which demands were satisfied.

12. In 45,945 cases against 35,618 in 1900-1901, payments were made on the mere issue of notice: in 82,956 against 57,976 on the issue of notice for sale of moveable property, and in 28,107 against 23,607 on the issue of notice for sale of immoveable property. Of the total number of sales (3,864 against 3,451), 1,493, or 38·6 per cent., were set aside under sections 20 and 21 of the Public Demands Recovery Act, I (B.C.) of 1895,

as amended by Act I (B. C.) of 1899, against 1,470, or 42·6 per cent., in the previous year. The highest number of sales set aside was in the districts of Patna (114), Gaya (106), Shahabad (215), Saran (108), Muzaffarpur (148), and Darbhanga (170). No special complaint against the working of section 21 in the Patna Division has, however, been made.

15. During the year general revaluations were completed in the districts of the 24-Parganas (with exception of rent-free lands), Bogra (with the exception of 18 estates), Purnea, and Puri. The revaluation of estates and tenures in the 24-Parganas has resulted in an increase of Rs. 87,058 (approximately), or of 41·2 per cent., on the previous assessment. In Bogra the increase obtained amounts to Rs. 14,968, or 17·9 per cent., on the former cess revenue, while in Purnea and Puri the operations have resulted in an increase of Rs. 50,183 and Rs. 2,676, or 26·5 and 3·9 per cent., respectively. The districts under complete revaluation were Hooghly, Nadia, Khulna, Rajshahi (with the exception of 22 estates and 68 rent-free lands), Jalpaiguri (Regulation and Non-Regulation portions), Rangpur, Gaya, Shahabad, Cuttack, Balasore, and Hazaribagh.

Gross rental.

19. When the road cess was first assessed in 40 districts the gross rental or valuation of those districts was Rs. 13,11,68,432. Subsequently the districts of Khulna and Palamau were created, and the Act was extended to them and to the district of Singhbhum. The gross rental, or valuation, of the 43 districts shows an increase in the past year from Rs. 16,80,89,551 to Rs. 17,03,53,369, or of Rs. 22,63,818, which is chiefly due to revaluation in the districts of the 24-Parganas, Nadia, Backergunge, Tippera, Shahabad, and Ranchi, and to the assessment of coal-mines and resumed *chakaran* (service) lands in Burdwan and the valuation of *ghatwali* lands in Birbhum. The decrease in the gross rental of Rs. 87,456 in Singhbhum from Rs. 5,08,000 to Rs. 4,20,544 is noticeable, and is due to the annual revision of the assessments of mines and forests under Chapter V of the Act and, in particular, to the exemption during the year, in accordance with the Advocate-General's opinion, of the *premia* paid by lessees for mining rights.

The Orissa districts, especially Angul and the districts of Saran, Ranchi, Palamau and Singhbhum also require rain for the benefit of standing crops. Prospects on the whole fair. Cattle-disease reported from a few districts. Fodder and water sufficient. The price of common rice has risen in 8 districts, fallen in 5, and is stationary in the rest.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

d, dew; o, overcast; g, gloomy; d, drizzling rain.

1. Every vessel on entering the above channel shall be liable to measurement by the officer in charge of the toll station for the purpose of ascertaining the amount of toll to be levied, and shall not be permitted to proceed through the channel unless and until such toll has been paid.

2. The maundage of every vessel, whether laden or empty, shall for the purposes of the Canals Act and of these rules be determined by the following measurements:—

*No. 149Marine.—Notification.*—The following bye-laws, which have been framed by the Commissioners of the Port of Calcutta, under section 126, clauses (*c*) and (*i*), of the Calcutta Port Act, 1890, for the safe and convenient use of the Commissioners' Dry Docks, are published for general information. They will be taken into consideration on the expiry of a month after their publication in the Gazette, and the Lieutenant-Governor will be pleased to consider any suggestions or observations which may be made regarding them by any person within that period.

D. B. HORN,
*Secy. to the Govt. of Bengal.*

*Proposed Bye-laws for the safe and convenient use of the Port Commissioners' Dry Docks, framed by the Commissioners under the Calcutta Port Act, 1890, section 126, clauses (c) and (i).*

1. APPLICATIONS to dock vessels in the Dry Docks shall be made in writing to the Deputy Conservator in the printed form attached (Appendix A), which may be obtained at the Harbour Master's office. Such applications shall be entered in the order in which they are received in an Entry List. Any steam-vessel, but not a sailing vessel, may be entered for docking before her arrival.

2. No vessel shall be entitled to be admitted into the Dry Docks without having the time and manner of her entry into, and of her remaining in, the Dry Docks previously regulated at the office of the Deputy Conservator in books to be kept there for that purpose. The Owner, Agent or Master of a vessel shall, therefore, as soon as practicable after her arrival in the Port of Calcutta, submit an application, under his own signature, for regulation, in the form attached (Appendix B).

3. Until the Deputy Conservator shall have issued to the Master a regulation order in the form attached (Appendix C), no such application as aforesaid shall be deemed to have been accepted, and no regulation as to the time and manner of the entry of a vessel into a Dock, or of her remaining there, shall be deemed to have been made.

4. Prior to the time arranged for the admission of any vessel into the Dry Docks, the following arrangements must be carried out on board the vessel, and order taken with reference thereto, viz.:—

Suitable hawsers and heaving lines must be in readiness on each side fore and aft and gantlines rove for mast-head pendants.

The vessel must be in ballast trim, must be upright and as nearly as possible on even keel, and the bilges must be perfectly dry fore and aft and kept so. All side and stern ports to be shut.

The ballast tanks must either be pressed full with their doors properly secured or pumped quite dry, and when possible, with their doors off ready for examination.

In the event of any Owner, Agent or Master being desirous of docking a vessel with cargo, the total weight of vessel and cargo shall be declared, and the Commissioners may refuse to dock such vessel if they consider it right to do so without assigning any reason for their refusal.

The Owner, Agent or Master of the vessel shall likewise be bound to make known to the Commissioners in writing on the application (Appendix B) the style of construction of the vessel's bottom, *e.g.*, whether she has a bar-keel, a keel-plate or camber in the keel, or any overhanging, or other special construction.

The vessel's crew shall render every assistance when docking and undocking, and if, in the opinion of the Deputy Conservator, extra hands are required on board, they shall for that purpose be provided by the applicant.

If so required by the Dock Officers, the awnings shall be furled.

The vessel may be inspected by a Dock Officer, and should he find that any of the abovementioned provisions of this bye-law have not been carried out, the vessel may be refused admission into the Dry Docks.

5. Save as hereinafter mentioned, no vessel shall remain in the Dry Docks longer than the time for which such vessel shall have been regulated. If before the expiration of the time for which a vessel has been regulated the Deputy Conservator shall be satisfied, on written application to be made to him for that purpose, that circumstances not known when the vessel was regulated, or beyond the control of the parties engaged in the work, will prevent the completion within the period for which the vessel was regulated, of work which can only be done in a Dry Dock, a new regulation may, if the Deputy Conservator thinks proper, be made for such further time, but no vessel shall be allowed to remain in the Dry Docks for more than four days in all without special sanction from the Vice-Chairman of the Commissioners.

6. In regulating the admission of vessels into the Dry Docks preference shall be given to vessels with a gross tonnage of not less than 1,000 tons, and the Deputy Conservator shall likewise be at liberty, with the approval of the Vice-Chairman, to give priority of regulating to such vessels as shall require the use of the Docks for the least time not exceeding 24 hours, without regard to the order in which such vessels stand on the list. But no vessel to which priority shall have been given under this provision shall be entitled, under any circumstances, to remain in the Dry Docks beyond the time for which she was regulated.

7. If any vessel shall not leave the Dry Docks at the expiration of the period for which she was regulated or re-regulated, the Deputy Conservator may, with the approval of the Vice-Chairman, remove any such vessel.

8. The Deputy Conservator may, in his discretion, allow any vessel, which shall have put back in a damaged condition, or which shall, under any other circumstances, be in such a condition as may in his judgment render her immediate admission to the Dry Docks actually necessary, to enter the Dry Docks in priority to all other vessels standing on the regulating list.

9. Blocks, shores and stages will be provided by the Commissioners as follows:—

*Blocks.*—One set for the length given at the time of regulating.

*Bilge Shores.*—In such number as may be required.

*Horizontal Shores.*—Two for every fifteen feet of the length given at the time of regulating.

*Stages and stage-ropes with poles or outriggers.*—A sufficient number to make one tier of stages round the vessel.

10. No block, shore, stage, pole, rope, or other article belonging to the Commissioners may be removed without the permission of the Commissioners' Officer in charge of the Docks.

11. No article belonging to the Dry Docks may be destroyed, cut, or otherwise damaged or allowed to go adrift, nor timber or other heavy thing thrown down upon the steps and stonework, nor passed into or out of the Docks otherwise than by the means prepared for that purpose.

12. No ballast, coals or any weights shall be shifted in, or taken on board, a vessel during the time she is in a Dry Dock.

And no out-board work shall be carried on in regard to a vessel during the time she is being docked or undocked.

13. Any breach of bye-laws Nos. 4, 5, 7, 10, 11 and 12 shall be punishable with a fine not exceeding Rs. 500, and, when the breach is a continuing breach, to a further fine which may extend to Rs. 200 for every day after the first during which the breach continues.

II. The memorandum of appeal shall be drawn up in the manner prescribed by section 541 of the Code of Civil Procedure, and it shall be the duty of the Deputy Registrar to endorse thereon the date of presentation and to satisfy himself that the appeal is in proper form, that the fees* chargeable thereon have been paid and that the appeal has been preferred within the period of limitation.

Where all these particulars have been correctly observed, the Deputy Registrar shall admit the appeal and register it in the Register of Appeals from Original Decrees.

III. In any case in which an appeal has been returned for amendment under section 543 of the Code of Civil Procedure, it shall be the duty of the Deputy Registrar to attest the amendment by his signature.

IV. If the memorandum of appeal be not in the correct form, the Deputy Registrar shall return the petition of appeal with an endorsement thereon of his objection, recording the fact in a book to be kept for the purpose.

V. In a matter dealt with under Rule IV the appellant or his Vakil may present the appeal to the Division Court hearing appeals from the Group to which the appeal belongs.

VI. After an appeal has been registered it shall be the duty of the Deputy Registrar to send a notice of the appeal without delay to the Lower Court from whose decision the appeal is preferred, and to call for the transmission, ordinarily within seven days, of the record and all material papers.

Whenever it shall be impossible for the Lower Court to comply with the requisition within the time stated, such Court shall report the reason of its inability and shall ask for such further time as may be necessary.

VII. The fee for the issue of the notice to the Respondent under section 553 of the Code of Civil Procedure shall be paid into Court by the appellant in the manner prescribed

* *Note.*—The Hon'ble the Chief Justice has been pleased to declare that the Registrar of the High Court in its Appellate Jurisdiction shall be the Taxing Officer within the meaning of section 5 of the Court Fees Act, VII of 1870, for the Appellate Side of the Court.

in the Rules issued by the High Court under clause 1 of section 20 of the Court Fees Act, VII of 1870, and on receipt thereof, it shall be the duty of the Deputy Registrar to transmit the notice to the Lower Court for service, together with the notice required by the preceding rule.

VIII. The proceeding of the High Court calling for the record and transmitting the notices of appeal shall direct that the notices be served, and it shall be the duty of the Lower Court thereupon to cause service of the notices without the payment of any further fee and without any further action by the appellant: Provided that the appellant or some one employed by him may accompany the serving officer for the purpose of pointing out the residence of the respondent.

IX. The time allowed for service of the notice shall be specified therein by the Deputy Registrar in accordance with the table, in Rule XV, and shall commence from the date on which it is despatched, which shall in general be within three days at the latest from the date on which the appeal is filed.

Every return of service or of failure to serve the notice shall be accompanied by the affidavit or solemn declaration of the serving officer, specifying the fact and mode of service or the reason why service could not be effected in any of the modes allowed by law. It shall be the duty of the Lower Court to cause the notice to be served in sufficient time before the date fixed, and if such service be impracticable to state the reasons for which service cannot be effected, and thereupon a fresh date shall be fixed by the High Court. In every case the Court making the return shall satisfy itself that a valid service has been made, or that there has been a failure of service, and shall certify such opinion to the High Court, with the reasons in case of failure of service.

XII. The date to be fixed for the hearing of the appeal shall be the 28th day after the date on which the time for the service of the notices expires, provided that such a day be not a Sunday or holiday, in which case the first business day afterwards shall be the day of hearing.

XIII. If there be several respondents to be served and they do not all reside in the same district, the time for service of the notices and for hearing shall be fixed with reference to that district for which the longest time is allowed in the Table in Rule XV.

XIV. | | | | | |
| | | | | |

What papers to be entered in the List

3. There shall be entered in such List all papers on which the decision of the appeal depends.

(*a*) The Plaint exclusive of Schedules;
(*b*) Written Statements of parties;
(*c*) Issues;
(*d*) The Judgment and the Decree or Order against which the appeal is preferred;
(*e*) The Grounds of Appeal.

(2) It shall ordinarily be unnecessary to enter in the List any of the following papers, viz :—

(*c*) Accounts, *jama-wasil-baki* and similar papers, except particular entries relevant for the decision of the appeal;
(*d*) Leases, *Pattas*, *Kabuliats*;
(*e*) Receipts, Chalans.

But any such paper shall be entered, if a reference thereto is necessary in order to the decision of the appeal.

Time for delivery of List by Appellant.

4. The Appellant shall, within thirty* days after service of the notice required by Rule 2, deliver to the Deputy Registrar a List, prepared in accordance with Rules 2 and 3, of the papers to be inserted in the Paper-book at his expense. Such List shall be termed "The Appellant's List."

Notice to Respondent of delivery of Appellant's List.

5. As soon as such List is delivered to the Deputy Registrar, he shall, if the Respondent has appeared, give notice of such delivery to such Respondent.

* See Rule 31.

6. Every Respondent who has entered an appearance shall be entitled to inspect the Appellant's List and at his own expense to obtain a copy of the whole or of any portion thereof.

Respondent may inspect and take copy of List.

7. Every such Respondent shall, within thirty* days after service upon him of the notice required by Rule 5, deliver to the Deputy Registrar a List in duplicate, in the form in Rule 2, of the papers, other than those inserted in the Appellant's List to which such Respondent desires that reference shall be made by the Court at the hearing of the appeal, and which shall be inserted in the Paper-book at such Respondent's expense. Such List shall be termed "The Respondent's List." When the Respondent intends to take any objection to the decree which he could have taken by way of appeal, and the taking of which is subject to the proviso contained in section 561 of the Code of Civil Procedure, any papers relevant to maintain this objection shall be included in such Respondent's List.

Respondent's List of papers.

8. If the Respondent considers that any paper or portion of a paper, which ought to have been inserted in the Appellant's List of papers under the provisions of Rule 3 has been omitted therefrom in violation of those provisions, he may, within fourteen days after service upon him of the notice required by Rule 5, and after giving notice to the Appellant of his intended application, apply to the Court for an order that such paper or portion of a paper be inserted in the List of such Appellant. When the Respondent, though he has not appealed against any part of the decree, intends to support such decree on any of the grounds decided against him in the Court below (section 561 of the Code of Civil Procedure), he is entitled to have included in the Appellant's list any papers relevant to such ground.

Application by Respondent for amendment of Appellant's List.

9. If the Respondent do not enter an appearance or do not deliver the List in duplicate directed by, and within the time prescribed by, Rule 7, and if no order be made under Rule 8, the Paper-book shall be prepared in accordance with the Appellant's List.

On Respondent's default Paper-book to be prepared according to Appellant's List.

10. When two or more Appellants or Respondents have the same interest in the appeal, one List only shall be required from all such Appellants or Respondents. Appellants or Respondents having separate interests shall deliver separate Lists. In such cases the principle of Rule 16 shall apply.

One List only to be delivered by two or more Appellants or Respondents having same interest.

11. If any of the papers, which must be inserted in the Appellant's List or in the Respondent's List was previously printed in a former Paper-book, the fact of its having been so printed may be stated in the List in which such paper is inserted. But such papers shall nevertheless be printed, unless the Court otherwise direct.

Paper printed in former Paper-book to be printed unless ordered to the contrary.

12. No paper in the record of the case which is not inserted in the Appellant's or Respondent's List and printed in the Paper-book, shall be referred to at the hearing of the appeal without the special leave of the Court. But this rule shall not preclude the Court from referring to any paper to which it considers a reference necessary for the ends of justice.

Papers not inserted in the Paper-book may not ordinarily be referred to at the hearing of the appeal.

13. The Deputy Registrar shall, within twenty-one* days after the delivery by the Appellant and the Respondent of their Lists respectively, make and deliver to such Appellant and to such Respondent separate Estimates of the cost of preparing their portions of the Paper-book. Such Estimates shall state separately the cost of transcribing, translating, examining, printing, &c., at the following rates, viz :—

Deputy Registrar to make and deliver to Appellant and Respondent an Estimate of cost of preparing their respective portions of the Paper-book.

(1) "estimating" at 10,000 Vernacular words per rupee :

(3) "examining translations" at 400 Vernacular words per rupee :
(4) "transcribing" at 1,440 words per rupee :
(5) "examining manuscripts" at 2,880 words per rupee :
(6) "editing" the Paper-book at eight annas per page. N.B. "editing" includes (*a*) arranging the papers for press ; (*b*) preparing the *Table of Contents* and the chronological index required by the Rules ; (*c*) examining and comparing "*proofs* with *copy*," such "*copy*" being the originals or authenticated copies of English papers, or translations where the Rules provide for translations : and the Editor is responsible that all the papers in the lists are accurately and completely produced in the Paper-book :

NOTE.—In preparing the chronological index of the exhibits or documentary evidence care should be taken to give a correct and full description of each document. The description, as furnished in the lists prepared by the Lower Courts or filed by the Vakils in the appeal in this Court, should not be relied upon, but the document themselves should be consulted in order that a full and accurate description may be given in the chronological index.

(7) "lithographing drawing or tracing maps" (where necessary) actual cost :
(8) "printing" at fourteen annas per page.

* See Rule 31.

14. The Paper-book may, at the election of the Appellant, be prepared in the office of the High Court, or in that of the Appellant's Vakil or by any retired officer of the Court whom the Judges may deem fit to undertake such work and may nominate for the purpose. Notice of such election shall be given to the Deputy Registrar by the Appellant within twenty-one* days after delivery to him of the estimate prepared in accordance with Rule 13. The Deputy Registrar shall thereupon make over one of the Respondent's duplicate Lists to the Appellant's Vakil, giving the Respondent notice thereof.

Paper-book may be prepared in office of High Court or of Appellant's Vakil or by a retired officer of the Court approved by the Judges. Appellant to give notice of election.

A Vakil or retired officer of the Court undertaking the preparation of a Paper-book shall, when filing the notice of election required by this rule, also file therewith a declaration to the effect that he is perfectly well acquainted with the vernacular and able to translate the vernacular portion of the record of the case in which such notice of election is filed; and that he will himself do the translation work in connection with the preparation of such Paper-book.

Any notice of election filed without such declaration as aforesaid shall be returned to the Vakil or retired officer filing it.

15. In appeals from districts other than the districts of Rangpur, Mymensingh Backergunge, Tippera, Noakhali, Chittagong, Cuttack, Chota Nagpur, Assam and Cachar, the Appellants, save as hereinafter provided, and the Respondents shall, within thirty* days after the delivery to them respectively, of the estimates prepared in accordance with Rule 13, deposit with the Accountant of the Court the amount of their respective estimates, other than the cost of printing; and the cost of printing shall be deposited immediately on the expiry of one-half of the time prescribed by Rule 18 for the preparation of Paper-books, such time to be computed from the date of the deposit by the Appellants and Respondents of the amount of the other items of their estimates.

Deposit by Appellant and Respondent of the amounts of their respective estimates.

In appeals from the Districts of Rangpur, Mymensingh, Backergunge, Tippera, Noakhali, Chittagong, Cuttack, Chota Nagpur, Assam and Cachar, the amount of the estimates, other than the cost of printing, shall be deposited by the Appellants, save as hereinafter provided, and by the respondents within forty-five days after the delivery to them of their estimates, and the cost of printing shall be deposited immediately on the expiration of one half of the time prescribed by Rule 18 for the preparation of Paper-books, such time to be computed from the date of the deposit by the Appellants and Respondents of the amount of the other items of their estimates. If it subsequently appear that the amount so deposited by either party to the appeal is insufficient, to defray the cost of preparing his portion of the Paper-book, the Deputy Registrar shall estimate the additional amount required and shall give notice thereof to such party. Such additional amount shall be deposited by such party with the Accountant of the Court within twenty-one days after service upon him of such notice. When the Appellant elects under Rule 14 to have the Paper-book prepared in the office of his Vakil or by a retired officer of the Court specially authorised, it shall not be necessary for him to deposit the amount of his estimate, other than the charge for estimating and the cost of the examination of translations, with the Accountant of the Court, and he may make his own arrangement with such Vakil, or such officer, for payment of the cost of preparing the Paper-book.

Procedure where amount of Deposit found to be insufficient.

Appellant may pay out of Court, when he elects to have Paper-book prepared in his Vakil's office or by a retired officer of the court.

16. When separate appeals have been preferred by different persons against the same decree, complete Lists shall be delivered by the parties to each such appeal: but the Deputy Registrar may, subject to the order of the Court, apportion between the parties concerned the cost of preparation in respect of any matter common to all or any of such parties. Printed copies of such common matter may be included in the Paper-book of each appeal; or such matter may appear in one Paper-book only, the other Paper-books containing references to the pages of such Paper-book in which such matter appears. This rule shall apply also when two or more separate appeals are preferred in analogous cases.

Apportionment of cost in respect of matter common to more than one appeal from same decree—or two appeals in analogous cases.

17. If the Appellant fail to deliver his List of papers in accordance with Rule 4, or if the Appellant or Respondent fail to make the deposit or additional deposit required by Rule 15, the Deputy Registrar shall cause the appeal to be set down for hearing by the Division Court having jurisdiction in respect thereof; and such Court may, unless satisfied that there was reasonable ground for the default—in the case of default by the Appellant direct the appeal to be dismissed for want of prosecution—and in the case of default by the Respondent, direct that the Paper-book be prepared in accordance with the Appellant's List, excluding the papers of the Respondent's List; or may pass such other order as may seem proper under the circumstances of the case.

Procedure in case of default by Appellant or Respondent.

* See Rule 31.

Preparation of the Paper-book in the Office of the High Court. Mode of preparation and arrangement.

18. When the Appellant does not, within the twenty-one* days allowed by Rule 14, elect to have the Paper-book prepared in the office of his Vakil or by a retired officer of the Court specially authorized, the Deputy Registrar shall proceed to have it prepared in the Office of the High Court, so that it may be ready within the following time from the date of the first deposit required to be made by the Appellant under Rule 15, *i.e.*, (*a*) when the Paper-book is estimated by the Deputy Registrar to consist of not more than 100 pages, within two months: (*b* when the Paper-book is estimated by the Deputy Registrar to consist of more than 100 but not more than 200 pages, within three months: (*c*) in any other case, within four months. The Paper-book shall include the whole of the papers included in the Appellant's and Respondent's Lists. All papers which are not in English shall be translated into that language. Such translations and the original English papers shall be printed and arranged in the order prescribed by Rule XV of Chapter IV entitled "Appeals to the Privy Council."—The papers shall be preceded by a table of contents with reference to pages, including a chronological index of the Exhibits put in by both parties.

NOTE (1).—The period occupied by the examiners of translations in examining the translations of the vernacular papers shall be deducted in calculating the time prescribed by this rule for the preparation of Paper-books.

NOTE (2).—The parties may, by consent given in writing, substitute the memorandum of evidence made by the Judge under section 184 of the Code of Civil Procedure for the translations of depositions recorded under section 182 of the same Code in language other than English.

NOTE (3).—Maps forming part of a Paper-book shall be included in the Table of Contents, but shall not be bound up with the other papers in the Paper-book. Such Maps shall be drawn or printed on durable paper, and they shall form a separate packet with a separate list.

All translations to be examined by the sworn examiners of the High Court.

19. In all cases the translations of papers prepared for the purposes of the Paper-book, irrespective of the agency by which they may have been made, shall be examined and certified as correct by one of the examiners appointed by the Court for the purpose of examining and certifying translations in cases appealed to the Privy Council. The charge for such examination, which shall be payable to the examiners, shall be that laid down in clause (3)of Rule 13, and shall be deposited with the Accountant of the High Court.

If in any case it appears to the Examiner that a translation has been very carelessly or inaccurately made, he shall report the matter to the Deputy Registrar who shall submit such report to the Chief Justice through the Registrar, and the Chief Justice may take such action in the matter as he may deem fit.

Paper-book to be printed in what form and type.

20. The Paper-book shall be printed in accordance with the following directions†:—

(*a*) All Paper-books are henceforth to be printed in the form know as *demy quarto*.

(*c*) The type to be used in the text is pica type; but long primer is to be used in printing accounts, tabular matter, and notes.

(*d*) The number of lines in each page of pica type is to be forty-seven, each line being five inches and three-quarters, or 146 millimetres.

(*e*) Every tenth line on each page shall be numbered—that is, the tenth line will be numbered 10, and the second tenth line 20, and so on.

Preparation of the Paper-book in the office of the Appellant's Vakil or of any other person specially authorised. Responsibility of such Vakil or other person.

21. When the Appellant elects, within the twenty-one days* allowed by Rule 14, to have the Paper-book prepared in the office of his Vakil, or any other person specially authorised by the High Court to undertake the preparation of Paper-books, such Vakil or other person shall proceed to have it prepared in accordance with the directions contained in Rules 18, 19, and 20, and he shall be responsible for its proper preparation. Such Vakil or other person shall be afforded all reasonable access to the original record in order to enable him to make transcripts of the papers and do other acts necessary to the preparation of the Paper-book, but he shall not be entitled to remove such original record from the office of the Deputy Registrar. Certified transcripts of the papers shall be furnished to him, if he so desire upon payment of the usual rates.

NOTE (1).—Persons undertaking the preparation of Paper-books are expected themselves to deal with the original records made over to them, and are hereby prohibited from entrusting them to the care of any third persons. For the purposes of translating and copying documents, etc., the vakil or other person, who has undertaken the preparation of the Paper-book in a case, will alone be permitted to have access to the original record of such case.

NOTE (2).—Each Vakil or other person entrusted with the preparation of a Paper-book shall be permitted to utilise the services of one reader or muharrir to assist him in such work. The Vakil or person preparing the Paper-book must, however, himself be present and continuously in possession of the record, and on his leaving the office, the record must be returned to the officer of the Court in charge, and the work of preparing the Paper-book must at once cease, the reader or muharrir leaving with his employer.

This rule must be literally interpreted and will be strictly enforced.

NOTE (3).—In the case of any Paper-book in which a map has to be inserted the Vakil or other person preparing such Paper-book shall be allowed to utilize, in addition to a reader or muharrir, the services of a draftsman, who will be allowed access to the record on the same terms as the reader or muharrir.

22. There shall be maintained in the office of the Registrar of the Court on the Appellate Side a Register of Vakils willing to undertake the preparation of Paper-books, and of other persons specially authorised by the High Court. Any Vakil who has practised as such in the High Court for the period of three years and any Vakil who has practised in a Mufassal Court for not less than three years and in the High Court for not less than one year, may, upon application to such Registrar, have his name entered in this Register. No Vakil or other person whose name has not been so entered shall be allowed to prepare a Paper-book. A Division Court may direct any remarks to be entered in the said Register as to the mode in which the work of preparation of any particular Paper-book is done by any Vakil or other person, and may direct to be removed from such Register the name of any Vakil or other person who has shown negligence, incompetence, or want of due diligence in the preparation of Paper book undertaken by him.

XV. The Deputy Registrar shall see that the proceedings and other processes of the Court are issued without delay, and that reminders and calls for explanation are despatched, whenever the return of the Lower Court is not made within the prescribed period.

XVI. The Deputy Registrar shall note any irregularity committed by the Lower Courts in the preparatoin and endorsement of the decrees of their Courts, and submit his report of such irregularity to the Division Court.

***Note.—The following instructions have been issued to Subordinate Courts in matters connected with Appeals to the High Court.***

(1) Records of execution cases sent up in appeal to the High Court shall be invariably submitted complete,—that is, all the papers connected with them in the Lower Courts, whether Original or Appellate should be sent up, so that they may be at hand, in case the Court should find it necessary to refer to them.,

*(2) In Civil cases sent up to the High Court in appeal, in which the preparation of maps may have been necessary for the elucidation of any points of importance, such maps should be pasted upon cloth before being despatched with the records Much inconvenience has been caused at times by the tattered condition in which maps in important cases have come before the Court.

(*a*) The transmission of Vernacular papers to the High Court should be discontinued as much as possible.

(*b*) No letter should be addressed to the Court under cover of which a Vernacular paper (*e.g.*, Judicial Proceeding, report of a subordinate Ministerial Officer and such like) is merely forwarded.

(*c*) Reports of subordinate Ministerial Officers are obviously intended only for the superior Officer to whom they may be addressed, and should not ordinarily be transmitted to the Court either in original or by copy. If it be necessary, when addressing the Court regarding the subject-matter of any such report, to forward either the original or a copy of the report, the contents should be embodied in the accompanying English letter.

(*d*) No Vernacular paper should be addressed to the Court unless it refers to some Judicial proceeding before the Court, or is a copy of some proceeding forming part of some Judicial record. In such a case the Vernacular paper should be sent with a short memorandum written on the face of it.

## PART III.

### CHAPTER XIV.—FEES-COSTS.

*Process Fees.*

I. The following Rules framed by the High Court under clause I of section 20 of the Court-Fees Act, VII of 1870, regulate the fees chargeable for serving and executing processes issued by the High Court in its Appellate Jurisdiction:—

1. The fees in the following table shall be charged for serving and executing the several processes against which they are respectively ranged:—

---

### PART I.*

*Table of Fees in the High Court, Appellate Jurisdiction.*

| | Proper fees. Rs. | A. | P. |
|---|---|---|---|
| *Article 1.*—In very case in which personal or substituted service of any process on parties to the cause is required, where not more than four persons are to be served with the same document, *one fee* ... ... ... | 3 | 0 | 0 |
| When such persons are more than four in number, then the fee abovementioned, and an additional fee of eight annas for every such person in excess of four ... | 0 | 8 | 0 |

Provided that in the last mentioned case, where such persons reside in the same or immediately adjacent villages, the additional fee may be such sum, not exceeding the amount of the fee prescribed as the High Court may, in the particular case, determine.

Provided also that in analogous cases, where the appellant is the same, but the respondents are different, but residing in the same or immediately adjacent villages, the same rule shall apply.

| | | | |
|---|---|---|---|
| *Article 2.*—In every case in which personal or substituted service of any process on any persons who are not parties is required, when the number of such persons is not more than four, *one fee* ... ... ... ... | 3 | 0 | 0 |
| When there are more than four such persons, then the fee abovementioned for the first four, and an additional fee of 8 annas for every one in excess of that number ... | 0 | 8 | 0 |

| *Article 4.*—For service or execution of any process issued by the Court, not specified in any preceding article of this part | 3 | 0 | 0 |

2. Notwithstanding Rule I, no fee shall be chargeable for serving and executing any process, such as a notice, rule, summons or warrant of arrest, which may be issued by any Court of its own motion, solely for the purpose of taking cognizance of, and punishing any act done, or words spoken, in contempt of its authority.

* Parts II, III, and IV of this rule, and Rules 4 and 5 apply to the Subordinate Civil Courts.

3. The fees hereinbefore provided, except those mentioned in the next rule, shall be payable in advance at the time when the petition for service or execution is presented, and shall be paid by means of stamps affixed to the petition in addition to the stamps necessary for its own validity.

* * * * *

4. Throughout or in any part of the localities mentioned in the Schedule attached to this rule and for the periods of the year during which travelling except by boat is, in the opinion of the District Judge, impracticable, the fees chargeable for the service of processes shall be increased by 25 per cent., in order to provide for payment of the boat-hire or ferry toll rendered necessary by the state of the country. The additional fees may, however, be reduced to 12½ per cent. over the fees ordinarily leviable at the discretion of the District Judge in any part of the district, where, or at any season of the year, when the levy of the larger amount is found to be unnecessary.

7. In such districts, or parts of districts, as are not for the time being subject to Rule 6 when, in order to the service of any process, the peon has to cross a ferry, then the amount, if any, legally exigible as toll, shall be paid by the Court executing such process from its permanent advance.

8. In cases in which the process is to be served in the jurisdiction of another Court, the proper fee chargeable under Rule I read with Rule VI shall be levied, in the manner above directed, on the application for the transmission of the process to that Court, and a note shall be made on the process stating that this has been done. A Court which receives from another Court, whether in the same Province or not, a process bearing a certificate that the proper fee has been levied, shall cause it to be served without further charge.

II. Processes and Rules intended for service in the town of Calcutta shall be sent direct to the Sheriff, and parties shall not be required to pay into the High Court process fees in respect of such processes, and rules by stamps, as required by the rules issued by the High Court under clause I of section 20 of the Court Fees Act. ## MISCELLANEOUS.

### PART I.—RULES RELATING TO SPECIAL DEPARTMENTS CONNECTED WITH THE HIGH COURT.

#### I.—RULES FOR ADMISSION INTO THE JUDICIAL BRANCH OF THE PROVINCIAL CIVIL SERVICE.

*A.—Rules issued by Government.*

DEFINITION.—"The Judicial Branch of the Provincial Civil Service" includes Small Cause Court Judgeships outside the Presidency town, Subordinate Judgeships, Munsifships, and any other appointments which the Lieutenant-Governor may from time to time specially declare to be included therein.

1. In accordance with section 7 of Act XII of 1887, nominations to Munsifships will be made by the High Court under the following rules, which have been framed by the Lieutenant-Governor in consultation with the High Court, and sanctioned by the Governor-General in Council.

2. A candidate shall present an application in writing to the Registrar of the High Court, Appellate Side. This shall ordinarily be accompanied by the following certificates, viz.,—

(1) that the candidate's age does not exceed 27 years;
(2) that he has obtained the degree of B L. or has passed the Senior Pleadership or some analogous examination, or is a Barrister-at-Law, or Member of the Faculty of Advocates in Scotland, or is an Attorney on the rolls of the High Court;
(3) that he is of good moral character and has received a liberal education;
(4) that he has practised as a Pleader or Barrister or Member of the Faculty of Advocates in Scotland, or Attorney for not less than three years: the High Court may, for special reasons, dispense with a portion (not exceeding two years) of this period;
(5) that he is in good health and is physically fit for service. The certificate of health must be signed by a Presidency Surgeon or a Civil Surgeon.

3. It shall be within the discretion of the High Court to require any such additional proof on any of the above points as it may think fit.

4 If the qualifications of the candidate are satisfactory to the Court, his name shall be entered in a register as *eligible* for admission to the Subordinate Judicial Service, but priority of entry in the register shall confer no right of priority of appointment. A candidate's name shall be removed from the register in the event of failing to obtain a gazetted appointment under section 7 of Act XII of 1887 before attaining the age of 29 years.

5. At the time a registered candidate is appointed permanently to the service, he shall ordinarily be required to submit a fresh health certificate signed by a Presidency Surgeon or a Civil Surgeon.

*Appendix.*

The following rules, which the Government of India and the Secretary of State have determined shall be applied in all branches of the Provincial Civil Service, are published for the information of candidates for admission to the Judicial Branch:—

1. Europeans who do not satisfy the definition of Native of India contained in section 6, Statute 33 Victoria, Chapter 3, are not eligible for appointment to the Provincial Service without the previous sanction in each case of the Government of India. With such sanction they may be appointed if they are qualified under the conditions mentioned in Rule 2 of the above rules.

2. The subjects of Native Princes in alliance with His Majesty the King-Emperor of India are eligible for appointment to the Provincial Service if they are qualified under the conditions mentioned in Rule 2 of the above rules.

3. All candidates for admission to the Judicial Branch must furnish satisfactory evidence of a thorough knowledge of at least one of the vernacular languages of the Province. The High Court will require all candidates who have not already furnished such evidence at some recognized examination, to pass a special examination in either Bengali, Hindi, Urdu or Uriya before appointment. The object of the examination will be to test the candidate's knowledge of the language and ability to write and read the written character with facility. The examination will include—

(1) Translation into English of proceedings, petitions, reports, etc., written in manuscript.
(2) Translation from English into the vernacular selected.

4. Every person appointed to the Judicial Branch shall be subject to a period of probation or training, during which time his appointment will be probationary only, unless in special cases the High Court declares such probation or training to be unnecessary.

5. Promotion to grades below that on Rs. 600 a month will ordinarily be given according to seniority, subject to fitness and approved conduct. But the Lieutenant-Governor reserves to himself the right to make promotion to the senior grades of the Provincial Service by special selection for merit without regard to seniority, and hereby declares that seniority alone shall not give a claim to appointment to the grade on Rs. 600 or higher grades.

6. No member of the Judicial Branch shall be dismissed otherwise than on a result of a judicial or formal departmental enquiry.

*B.—Rules framed by the High Court.*

*Calcutta, the 14th November 1902.*

*No. 757.*—With reference to rules 4 and 9 of the rules published with Home Department Notification No. 529, dated the 8th September 1899, it is hereby notified that the examination prescribed for filling up vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices will be held at Calcutta in the Senate House of the Calcutta University, commencing on Saturday, the 10th January 1903.

No examination will be held during 1903 for filling up vacancies in the Clerical Establishment of the offices subordinate to the Government of Bengal.

The examination at Allahabad and Lahore will be held at the same time at the places to be appointed by the Governments of the United Provinces of Agra and Oudh and the Punjab, respectively. The hours of examination at Calcutta will be from 10 A.M. to 1 P.M. and from 1-30 P.M. to 4-30 P.M. daily.

The probable number of vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices to be competed for is fourteen. Of these, seven will be reserved for candidates domiciled in the United Provinces, the Punjab, the Central Provinces, Rajputana, Central India, and Baluchistan, provided that a sufficient number of such candidates duly qualified appear for the examination to be held at Allahabad and Lahore. The remaining seven vacancies will be offered for competition among the candidates examined at Calcutta, and such candidates temporarily resident, but not domiciled, in any of the Provinces enumerated above, as may be permitted to present themselves for examination at Allahabad and Lahore.

*New Leading Lights.*

THE Port Master, Brisbane, has given Notice (No. 10 of 1902) that, on and after the first day of November 1902, the following Leading Lights will be exhibited to enable vessels to pass through Normanby Sound by night, viz:—

*Entrance Lead.*—Two bright lights, the front one carried on the black beacon marking the S. E. extremity of Wai-weer Reef, the back one on the slope of the south knoll of Hammond Island, in line N. 79° E.

*Wai-weer and Vivian Point Lead.*—Two bright lights, the front one carried on the black beacon marking the W. extremity of Wai-weer Reef, and the back one on the hill on Goode Island marked 316 feet, in line bearing N. 70° 30′ W.

*Jetty Lead.*—Two red lights, the front one on the jetty, and the back one on the slope of Milman Hill, in line bearing N. 49° E. This lead was discontinued formerly, but will now be re-established.

*Directions.*

Vessels approaching Thursday Island by Normanby Sound at night will proceed as usual until two bright lights are opened out ahead, which must be kept in line on a bearing of N. 79° E. until two bright lights are opened out astern bearing N. 70° 30′ W. Keep the latter in line until two red lights are opened out on a bearing of N. 49° E., which are to be kept in line until jetty is approached.

As these lights have been placed to meet the requirements of the coastal steamers, caution is necessary in navigating vessels of greater length and capacity, by reason of the strong and erratic tides prevailing in this locality.

## RESOLUTION ON THE FOREST ADMINISTRATION REPORT FOR 1901-1902.

REVENUE DEPARTMENT—FORESTS.

*Calcutta, the 13th November 1902.*

RESOLUTION—No. 3933.

READ—

The Progress Report of Forest Administration in the Lower Provinces of Benga for 1901-1902.

Mr. A. E. Wild held charge of the Bengal Forest Circle till the 10th February 1902, when he retired, and was succeeded by Mr. J. H. Lace, who has submitted the Report with commendable punctuality. The Report does not exceed the prescribed limit of 20 pages.

**Areas of forests.**

2. The only changes of importance made in the forest areas during the year were the reservation of 83 square miles of forests in the Chittagong Division; the transfer of 81 square miles of protected forests in Palamau to the Civil Department for management by the Deputy Commissioner, and the disforestation of 79 square miles from the Sundarbans forests to be leased for cultivation.

**Settlements, surveys and demarcation.**

Progress was made in demarcation work in Chittagong, Singhbhum and Manbhum; and in detailed survey in Singhbhum and Hazaribagh. Progress was not so good in Chittagong as was anticipated; and discrepancies in the boundary of the Khurda forests still remain to be reconciled. Arrangement should be made to push on this work in these two Divisions during this cold weather.

3. The programme of working plans for the year was carried out fully. Mr. Lace has learned that the restrictions placed by the working plan on the size of the *Sundri* timber that may be felled in the Sundarbans have never been fully enforced, and that much undersized timber has been removed, though the working plan has been nominally followed for nine years. This careless administration must injuriously affect the revenue in future years; and the Conservator will be requested, when he is revising the working plan this year, to explain the results of the past working and how they were attained, and to state what steps are being taken to secure that the restrictions shall not be transgressed in future.

Working Plans.

4. On the whole, forest offences were fewer than in the previous year, increases in the Darjeeling, Jalpaiguri and Singhbhum Divisions being counterbalanced by noticeable decreases in the Tista, Buxa and Sundarbans Divisions. It is not explained why offences are so much more numerous in the Darjeeling and Tista forests than in other forests.

Breaches of Forest Law.

5. Protection of the forests from fire was more successful than in the preceding year in the Kurseong, Jalpaiguri and Buxa Divisions, but was less successful in Palamau, Angul and Puri, and especially in Singhbhum. The Conservator is not dissatisfied, however, with the results in the Singhbhum forests as compared with those of preceding dry years; and it is to be hoped that the closure to grazing of areas burned in these forests has had the desired effect of impressing upon the people the need of co-operating with Government in protection of the forests. The Conservator notices that the benefit that the forests derive from fire-protection is most marked in the Darjeeling Terai and in the Buxa Division, where the *Sâl* and the *Dalbergia Sissoo* are fast reproducing themselves.

Forest fires, creeper-cutting and other works of improvement.

Mr. Lace lays stress on the importance of creeper-cutting; and it is hoped that this matter will receive careful attention in the Buxa forests, where the *Sál* trees suffer much from creepers. Improvement fellings should be more generally undertaken in favour of natural reproduction of valuable species of the indigenous timbers and should not be confined to cases in which revenue can be obtained.

6. The total amount of wood—timber and fuel—extracted from the forests is somewhat in excess of the preceding year; but the increased outturn of timber is only in the working of the Sundarbans and Buxa Forests where there was an increased demand for *Sundri* and *Sâl*. As compared with the preceding year, there was a falling off in the value of minor produce extracted from the forests chiefly in the case of the Sundarbans, where stormy weather was unfavourable to the working of small boats, and where tigers killed eighty-six wood-cutters. Since the transfer of the Saoria Tract in the Sonthal Parganas Protected Forests to the Civil Department on 1st December 1900, the Forest Department has ceased to be credited with the revenue derived from *sabai* grass

Gross yield and outturn of Forest Produce

.7 The gross revenue of the year has only once been exceeded and the net surplus was Rs. 6,09,151; but after allowing for an extraordinary payment of Rs. 77,578 made to the Raja of Porahat on account of the profits of the working of the Porahat Forests during the five years ending March 1901, there was a net income of Rs. 6,86,729, which is the highest annual surplus on record. The working of the Palamau and Angul Divisions has again resulted in deficits; but the deficits have decreased.

Financial results.

8. The Lieutenant-Governor notices with pleasure that officers in charge of Divisions have done good work, and that the subordinate staff has also worked well.

Conclusion.

The Lieutenant-Governor's thanks are due to Mr. Lace for the zeal with which he has entered upon his duties as Conservator of Forests, Bengal.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secy. to the Govt. of Bengal.*

# RESOLUTION ON THE BOARD'S ANNUAL LAND REVENUE ADMINISTRATION REPORT FOR THE YEAR 1901-1902.

REVENUE DEPARTMENT—LAND REVENUE.

*Calcutta, the 17th November 1902*

RESOLUTION—No. 3990.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Lower Provinces for the year 1901-1902.

THE Report was punctually submitted to Government.

2. *Collections, balances and remissions.*—The collections of land revenue from all the three classes of estates were good, and the total balance outstanding at the close of the year was the lowest during the past five years. The remissions granted were below the average.

On Government estates the total collections were over 99 per cent. of the current demand; the balance outstanding at the close of the year was smaller than at the end of the preceding year, and it is reported that by eliminating the doubtful and irrecoverable arrears amounting to over a lakh of rupees, the true recoverable balance would be reduced to about six lakhs, which represents 14 per cent. on the current demand. Collections on Government estates were unsatisfactory only in the districts of Hooghly, Monghyr, Balasore, Ranchi, and Palamau; much the worst result was in Balasore, where the collections amounted to 12·02 per cent. only on the demand. The Lieutenant-Governor agrees with the Board that the explanations furnished by the Collector with regard to the failure to collect in Balasore are not satisfactory, and he will await the special report called for from this district. The condition of the Palamau estate is being separately considered.

3. *Road and Public Works cesses.*—The current demand of cesses increased during the year by about a lakh and a half of rupees, mainly owing to revaluations in the districts of the 24-Parganas, Nadia, Dacca, Backergunge, Tippera, Noakhali, Shahabad, and Ranchi, to assessment of coal mines and resumed *chakaran* lands in Burdwan, and to the valuation of ghatwali lands in Birbhum. The collections were generally good, and were above the prescribed standard in 25 districts. Notable exceptions were Burdwan and Ranchi. It is not understood why the Court of Wards should have allowed the Burdwan Raj to default in payment of the cess demand, nor is such a default shown in the Report on Wards' Estates. The difficulties of the Maharaja of Chota Nagpur in collecting cesses from his tenure-holders are due to a defect of the Tenancy law in Chota Nagpur which it is proposed to amend.

4. *Remittance of land revenue and rent by means of money-orders.*—Over twenty lakhs, or one-twenty-fifth of the land revenue and cesses, was remitted to the Collector during the year by special money-orders. To increase the popularity of such remittances, the Board have under consideration the adoption of separate forms of money-orders for (1) land revenue and dâk cess and (2) road and public works cesses, and promise a report to Government on the subject.

Payment of rent by money-orders is not so popular, but is increasing in amount. The Lieutenant-Governor has before expressed his regret that this system is spreading. If it protects raiyats from persecution by the landlord's servants, it also often tends to weaken friendly relations with the landlord.

5. *Coercive processes.*—Defaults in payment of revenue were fewer than in the preceding years and the Sale law was leniently worked, the number of estates sold being less than 11 per cent. of the number which became liable to sale for arrears. The Board observe that there has been a considerable decrease in defaults and sales in the past two years, and that this is specially satisfactory in view of the fact that these years have not been remarkable for great agricultural prosperity. Possibly improvement in tauzi work has helped proprietors

to understand their accounts and is promoting punctuality in payment of revenue.

The number of certificates made under the Public Demands Recovery Act increased on the whole; and under the head "Cesses" there was an increase of 13,031, shared by all Divisions, except Burdwan and Orissa, which is explained to be chiefly due to more prompt action in enforcing demands. The Lieutenant-Governor has recently had under consideration the Board's special report regarding the measures proposed for improving the system of realising cesses for roads and public works, and has agreed in the conclusion that the marked increase in the number of certificates issued since the year 1899 for collection of cesses has been due not to recalcitrance on the part of the payers, but chiefly to changes introduced in the tauzi procedure. The orders of the Lieutenant-Governor on this subject and on the question of collection of cesses from rent-free holdings have been recently communicated to the Board.

6. *Condition of the raiyats on Government estates and expenditure on improvements.*—On account of unfavourable harvests, the condition of the raiyats of Government estates was generally not so good as in the preceding year. Calamities of seasons occurred in the districts of Hooghly, Bankura, Midnapore, the 24-Parganas, and Chittagong. The effects of the storm-wave of 1897 have not entirely disappeared in Chittagong. In the Bihar districts the condition of the raiyats on Government estates was on the whole good, but unusual floods caused damage on deara estates. In the Chota Nagpur Division where, except in Manbhum, crops were much below the average, the raiyats of the Government estates of Hazaribagh, Palamau, and Singhbhum were not prosperous. The condition of the Palamau estate has formed the subject of recent correspondence, and the Board have promised a further report which is awaited.

Over 2½ lakhs of rupees were expended by Government on improvements of its estates, chiefly under the heads of drainage, irrigation, embankments, tanks and wells, roads and bridges. The Lieutenant-Governor approves the plan which the Board have adopted of making a provisional allotment in anticipation of the receipt of Government orders sanctioning the total grant for the Province, as by this arrangement it is hoped that more time will be available to the District Officers for carrying out the works of each year.

7. *Drainage.*—The crops in the Rajapur and Howrah drainage basins were good, and the collections during the year from the landlords on account of drainage dues were satisfactory.

The Bill to amend the Bengal Drainage Act, VI of 1880, which was introduced into the Bengal Legislative Council on the 25th March 1902, and of which the object is to enable landholders to realise their claims from tenants and from co-sharers by means of the certificate procedure, was passed by the Council on the 25th August 1902.

8. *Land Registration and Partitions.*—Good progress was made in registration of mutations and in partition cases.

In paragraph 11 of last year's Resolution it was suggested that the percentage of mutations registered in the year on the actual number of existing interests should be indicated. The Board have not yet obtained correct figures, but express a hope that next year they will be in a position to report accurately the number of interests recorded in the registers and the percentage of mutations registered during the year. The Lieutenant-Governor hopes that such information will be given in the next report.

As regards the effect of the Partition Act of 1897 in preventing the enhancement of rents, which used frequently to follow a partition, the Board, agreeing with the Commissioner of Patna, say that it is too early as yet to form a decided opinion. The Collector of Patna observes that the only defect in the proceedings under the Act of 1897 is that they are not final so far as they relate to rents. But neither are rents recorded under Chapter X of the Tenancy Act final unless they are also settled in connection with a settlement of land revenue or on application of landlords or tenants. The advantage of the procedure under both Acts consists in the authoritative record of the existing rent. The Lieutenant-Governor desires that District Officers should continue to watch the effect of the provisions of the Act which relate to record of rent.

9. *Zamindari cesses.*—It is reported by the Board that the levy of illegal cesses in addition to the rent is a very old practice throughout the Province, which has remained practically unchecked by the provisions re-enacted in the Bengal Tenancy Act for its suppression. The Lieutenant-Governor believes that where a survey and record-of-rights is made a very practical check has been imposed, but in the unsurveyed districts he regrets that there is good reason to believe that illegal cesses of many kinds and many names are still levied.

The Lieutenant-Governor has learned that on many estates, especially in the Eastern Bengal districts, landlords not only do not help, but impose fines or *nazarana*, which discourage, when they do not wholly prevent, any improvement of the village water-supply being made by those who are willing to dig or re-excavate tanks for the public good. Accordingly in January last Commissioners of Divisions were requested to institute enquiries as to how far such restrictive customs prevail. The replies received are under the consideration of Government.

10 *Takavi advances.*—The Government of India asked last year that in addition to the current accounts contained in Appendices XVI and XVII of the Land Revenue Report, information might be briefly given in the body of the report as to the net financial results to the State of its loan business during each of the five preceding years. The Board do not clearly understand what information is required, and propose to address the Government separately on the subject. Their report will be awaited by the Lieutenant-Governor.

11. *Working of the Bengal Tenancy Act of 1885.*—The falling off in the number of applications for survey and record-of-rights under section 103 of the Tenancy Act, to which the Board refer in their 147th paragraph, and which is due to a technical construction of the section, appears to be much more than counterbalanced by an increase in the number of notifications of areas for survey under section 101(2)(*a*) of the Act. In proceedings under section 103, as the law officers have advised, fair rents cannot be settled or disputes be formally decided. Section 101 (2)(*a*) requires that when application is made by a landlord or landlords, the interest or interests represented must make up a large proportion of the interests of all the landlords, and also that the order for record-of-rights must be passed by the Local Government. Section 103 allows a Revenue officer to take action under rules made by Government on the application of a single landlord.

The Board in paragraph 152 of their report notice the increase of rent suits in the Orissa Division, and have attributed the increase to the fact that with the enhancement of the land revenue demand at the last settlement, the zamindars cannot afford to allow large arrears to remain outstanding. It is also stated that the settlement records have given facilities to the zamindars to prove areas and rental of holdings. The large increase of rent suits in the districts of the Orissa, Patna, and Chittagong Divisions, which were surveyed in recent years, has attracted the attention of Government, and is being carefully examined.

12. *Weather and crops, prices of food, and wages of labour.*—The rainfall during the year was deficient in Bihar, Chota Nagpur, and Orissa, and was also badly distributed. Early cessation of the monsoon and the drought throughout the cold weather caused widespread injury to the winter rice and the *rabi* crops, especially in the North Bihar districts. The short outturn of crops over the greater part of the Province had the effect of raising the price of common rice, and in some districts prices were especially high. Wages remained stationary, except in a few localities, such as parts of the Midnapore and Palamau districts, where special demand on account of railway construction or other work caused some rise.

13. *Material condition of the people.*—The Board write that the high prices of the year pressed somewhat heavily on the classes dependent on money wages or fixed incomes. The year was no doubt generally one of diminished agricultural prosperity. The development of the industries of the mines and the mills was important, but still falls far short of counterbalancing to labourers deficient harvests.

The report called for on the *utbandi* system of tenure of lands in the district of Nadia is awaited.

14. *Agricultural Banks.*—The Lieutenant-Governor notices with satisfaction that, as the result of the deputation of Mr. P. C. Lyon, ten agricultural banks or co-operative credit societies of raiyats were established chiefly on Government estates and wards' estates during the year, and that 22 more such banks have been opened since the close of the year. The special reports on the working of these banks, which have been received from the Commissioners of Divisions, will be separately examined.

15. The thanks of the Lieutenant-Governor are due to the Board for their efficient administration of the Land Revenue Department and for their excellent Report. The paragraphs in which officers are mentioned as deserving of special commendation will be communicated to the Appointment Department.

In a Notification dated the 29th April 1902, the Lieutenant-Governor expressed his deep regret in announcing the sudden death of the Hon'ble Mr. Philip Nolan, Member of the Board of Revenue, who had long been a trusted counsellor of Government in the Revenue administration and who was on the eve of retirement. Mr. Nolan's intimate knowledge of questions relating to the land and his sound judgment were of the greatest service to the Province.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secretary to the Govt. of Bengal.*

# RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON WARDS' AND ATTACHED ESTATES FOR 1901-1902.

REVENUE DEPARTMENT—LAND REVENUE.

*Calcutta, the 17th November 1902.*

RESOLUTION—No. 3994.

READ—

The Report of the Board of Revenue on the Wards' and Attached Estates in the Lower Provinces for the year 1901-1902.

THE Report on the administration of Wards' Estates and Attached and Encumbered Estates has been punctually submitted by the Board of Revenue.

Number of estates under management.

2. In all, 140 such estates were under management during the year, or five more than in the previous year. The aggregate current demand of these estates on account of rents and cesses amounted to 119¼ lakhs of rupees, or about one-fifteenth of the whole cess and rent demand of these Provinces. The Burdwan Raj, which with its rental of 48 lakhs and land revenue of nearly 35 lakhs is much the most important estate under the management of the Board, has just passed into the hands of its proprietor after seventeen years of management by the Court of Wards. The estates next in importance, viz., Bettiah, Hatwa and Tikari, are all in the Patna Division; 70 of the estates, including all the Encumbered estates, are in the Chota Nagpur Division.

Payment of rent and cesses due (1) to Government, (2) to superior landlords.

3. Revenue and cesses due to Government were generally punctually paid, the total payments representing 98 per cent. of the demand of the year. The outstandings due to superior landlords were much heavier in proportion. The obligation to discharge such liabilities is similar to that owed to Government and should have the best attention of the Collectors The failure to pay the Government demands due from the Nawada and Maghra estates in Patna is not satisfactorily explained.

Collections of rent and cesses.

4. The total collections of rent and cesses during the year just exceeded 100 per cent. on the current demand, a percentage not quite so high as that of the preceding year, 100·4, which, however, was the highest percentage obtained in twenty years with one exception. The Bhagalpur Division did least well, and Orissa did best with a percentage of 108·9 obtained by good collections in the Kanika and Madhupur estates. Other districts in which collections were over 105 per cent. were Dinajpur, Chittagong, Saran, Muzaffarpur and Darbhanga. Short collections are insufficiently explained in the case of the Khagra estate in Purnea and the Majdiha estate in Dinajpur.

Balances were slightly reduced, and would have been further diminished but for poor collections in Sujamutha and Kujang, where there was failure of crops. More rent suits were instituted, and for larger sums than in the previous year; but there was a larger decrease in the number of certificates filed. On the whole, the collections made in a year of short harvests were generally sufficient.

Reduction of debts.

5. Altogether twelve and-a-half lakhs of debts outstanding against the estates were paid during the year, and substantial reductions were made in the case of the Bettiah, Shiuhar and Satkhira estates, in the Khujwa estate and Mubarik Hussain's estate in Saran, and in Mrs. Lucas's estate in Backergunge. The Lieutenant-Governor is pleased to learn that in the case of two encumbered estates in Chota Nagpur, which were released during the year, the debts had been fully paid, and that in twenty-seven more of the encumbered estates. the payments on account of debt during the year exceeded the sums provided in the schemes of management.

Expenditure on improvements.

6. Under the head of expenditure on improvements, the Lieutenant-Governor notices with approval the large expenditure of the Burdwan Raj on schools and on its experimental farm, the expenditure of the great estates of Hatwa, Bettiah and

Tikari on hospitals, and of the Hatwa estate on the cattle-breeding farm at Sripur.

Education of wards.

7. The arrangements for education of minor wards, which are detailed in paragraph 21 of the Board's Report, show that careful attention is paid to this important subject.

8. The Lieutenant-Governor thanks the Board for their careful and effective supervision during the year of the estates under their charge.

By order of the Lieutenant-Governor of Bengal,

W. C. MACPHERSON,

*Offg. Secretary to the Govt. of Bengal.*

# RESOLUTION ON THE ADMINISTRATION REPORT OF THE POLICE DEPARTMENT IN BENGAL FOR THE YEAR 1901.

## RESOLUTION—No. 4645J.

POLICE.

*Calcutta, the 15th November 1902.*

READ—

The Report on the Administration of the Police Department for the year 1901.

The Report for the year 1900 and the Resolution of Government recorded thereon.

The results of the working of the Police in Bengal during the year 1901 are set out in a more condensed form than the preceding year. The percentages of convictions to cases sent up are somewhat lower than in 1900. There has been an increase in the number of riots, in particular in those cases that were attended with loss of life, and under the serious head of dacoity 17 cases more than in 1900 are reported. No special cause can be assigned for these fluctuations in the statistics, which do not betoken any noticeable increase of crime.

2. During the past eighteen months this Government has made a very close and detailed examination of the present system of Police administration of the Province, and the result of the elaborate enquiries made has been to force upon the Lieutenant-Governor the conclusion that until far-reaching and costly changes in the present system in the direction both of strengthening the Police force generally and of bettering their prospects are carried out, no material or enduring improvement can be hoped for in this Department, though it calls more loudly for reform than any branch of the administration in the Province. To this end, proposals have been submitted to the Government of India for adding considerably to the superior cadre, for largely increasing and bettering the prospects of the inspecting and investigating agencies, and for securing the better conduct of police prosecutions before the Courts. Similarly, detailed proposals for the improvement of other portions of the force, including the Calcutta Police, the Municipal constabulary and Railway and River Police, have been more recently under consideration, and the Lieutenant-Governor has formulated his definite recommendations on these remaining branches of the whole subject for the Government of India, and for the consideration of the Police Commission, who are now visiting Bengal.

3. In reviewing the work of the Police for 1900, the Lieutenant-Governor, while acknowledging that the force had been largely hampered by circumstances beyond its control, in particular by being undermanned and overworked, reminded the Inspector-General of the advantageous results to be expected from a more judicious employment of the discretion to abstain from enquiries into petty cases of theft and burglary, and from a wiser and more sympathetic treatment of the village chaukidar. He is glad to see that these remarks have been taken to heart. Chaukidari administration generally has been more effective than in the preceding year, and the percentage of refusals to investigate under section 157, Criminal Procedure Code, has risen from 7·4 to 20·5 in house-breaking cases, and from 10·1 to 14·1 in cases of theft.

Of the total cases not enquired into, 98 per cent. were cases of house-breaking and theft. The following percentages (of cases not enquired into) deal with these 98 per cent. of the total number of cases:—

| Division. | House-breaking. | | Theft. | |
|---|---|---|---|---|
| | 1900. | 1901. | 1900. | 1901. |
| Burdwan ... ... ... | 18·4 | 28·7 | 10·1 | 14·0 |
| Presidency ... ... ... | 5·4 | 12·1 | 6·3 | 7·9 |
| Rajshahi ... ... ... | 4·5 | 10·5 | 13·0 | 17·7 |
| Dacca ... ... ... | 8·0 | 16·3 | 4·3 | 15·7 |
| Chittagong ... ... ... | 8·6 | 17·9 | 16·9 | 24·7 |
| Patna ... ... ... | 4·2 | 23·9 | 2·9 | 5·6 |
| Bhagalpur ... ... ... | 9·6 | 26·9 | 3·6 | 6·3 |
| Orissa ... ... ... | 2·2 | 5·0 | 26·2 | 31·9 |
| Chota Nagpur ... ... | 5·3 | 22·2 | 3·8 | 6·0 |

Thus in every Division there has been an improvement, under both heads. These percentages are still far below the standards which the Lieutenant-Governor thinks might properly be attained, but they undoubtedly show that at last a real endeavour has been made by the local officers to carry out the wishes of Government in the matter.

4. In view of this advance, and of the improvement in Chaukidari administration, the Lieutenant-Governor had some expectation that the results for the year, on which the working of the Police is judged, would be better than those of the preceding year. As a matter of fact, the percentage of persons convicted in police cases under classes I—V to those sent up for trial has fallen slightly from 56 to 54, and that of persons convicted under classes I—VI from 71 to 69.

Turning to the number of cases, the percentages of convictions to cases sent up have fallen as follows:—

| | Police cases only. | | Police and Magistrates' cases together. | |
|---|---|---|---|---|
| | 1900. | 1901. | 1900. | 1901. |
| (*a*) Grand total ... ... | 86·4 | 85·9 | 83·7 | 83·0 |
| (*b*) Class III. Serious offences against property ... ... | 74·3 | 73·2 | 70·1 | 69·9 |
| (*c*) Class V. Minor offences against property ... ... | 79·1 | 78·5 | 74·6 | 73·2 |

An examination of the Divisional and District figures in detail shows that as was to be expected these fluctuations are the net outcome of rises of percentages in certain districts and Divisions and of falls of percentages in others, and further enquiry will be made as to the cause of these variations. Whatever may be the ultimate effect of a new measure, it is certain that the immediate effects in different districts will vary according to the attitude towards it and interest in it of the district authorities, and the Inspector-General must now devote his special attention to the district analysis which the Lieutenant-Governor caused to be prepared. The details are not a little curious and an attentive study of them should yield useful material for our further assistance in this matter. The Lieutenant-Governor does not remember that the Inspector-General ever even forwarded for his information any comments of the Inspecting Deputy Inspector-Generals on the introduction of this measure, and would be glad to be assured this has not escaped their attention. It may be that a still wider employment of the discretion to dispense with local investigation given by section 157, Criminal Procedure Code, and continued care in developing the Chaukidari agency may enable the Police eventually to arrive at better results, but an examination of the figures of the year under review confirms the Lieutenant-Governor in the conclusions he had previously formed as to the necessity for large improvements in the numbers and prospects of the Police force generally.

5. The conduct of the Police during the year, as shown by the punishments inflicted upon them judicially and departmentally, has been on the whole satisfactory. Only one case of torture was returned as true, and in 26 cases of extortion punishment (judicial or departmental) was inflicted. None of the cases presented any features of importance. The number of men in the District and Railway police holding good-conduct stripes increased from 12,109 to 12,914, and of those holding three or more stripes from 4,635 to 5,111. Those of the latter class are entitled to an extra allowance of one rupee a month, subject to the proviso that not more than one-tenth of the total number of constables sanctioned can be given it. The result of this limit is that, of the 5,111 men who have qualified for the allowance, considerably less than half, or only 2,039, are permitted to draw it. The removal of the numerical limit, which was fixed so long ago as 1863, would entail considerable recurrent expenditure, but, so far as can be ascertained, it is a purely arbitrary one; and in view of the dissatisfaction that must prevail among the 3,000 men who have qualified for the extra allowance, but are debarred for no fault of their own from drawing it, the Lieutenant-Governor is prepared to consider any recommendation the Inspector-General may wish to make for its removal or extension.

6. To proceed to an examination of the crime of the year—the total of cognizable offences reported is only 250 below that of 1900 and more than 30,000 in excess of the decennial average. The increase, as compared with 1899, is almost entirely under the head of offences against property, and is undoubtedly

the result of the high prices which prevailed during the year to even a more marked extent than in 1900. Non-cognizable crime shows a small decrease from the previous year's figures of about 4 per cent.

7. The chief fluctuation in the offences shown under class I appears under "rioting," which returns 79 cases more than in the previous year. The number of true cases (2,068) is considerably below the quinquennial average, but the unsatisfactory feature of the figures is the number of cases attended with loss of life. Last year's total of such cases (61) was considerably above the average of preceding years, and this year the number has risen to 73. This unsatisfactory state of things is apparently not the result of any retrogression in the preventive measures taken under sections 106 and 107, Criminal Procedure Code; for, though the number of cases instituted under these sections during 1901 is considerably below that of 1900, rather more persons were bound down than in the previous year. The reason is probably to be found in the fact that the police in some districts, as in Khulna, report under section 107, Criminal Procedure Code, against the wrong persons, and that in others, as in Pabna, Magistrates fail to bind down parties who have been properly reported against. Magistrates are reminded of the necessity for thoroughly satisfying themselves, before striking off proceedings in such cases, that the cause of dispute no longer exists; a specious compromise is often filed in Court merely to give the parties an opportunity of going back to their villages and settling their disputes in another and less peaceful fashion. The figures under class II show no great variation from those of the previous year. The number of cases of murder and of grievous hurt has slightly decreased, and there has been a very satisfactory diminution in the number of outrages on women in Mymensingh. Judicial results under this class have been generally bad. The percentage of cases convicted to cases decided has fallen from 58 to 54, and of persons convicted to persons tried from 52 to 47. Murder trials have been particularly unsuccessful. The percentage of convictions to cases is only 41 as against 45 in 1900, and only 24 per cent. of those put on their trial have been found guilty of the offences charged against them.

8. Under class III dacoities show an increase of 17 cases, though the total number of cases (358) is practically the same as the quinquennial average. It is to be regretted that the efforts made to repress this most serious form of crime apparently indigenous in Bengal have so far been unsuccessful, and the Lieutenant-Governor trusts that the Inspector-General will give this class of offence his particular attention during the current year. The Presidency Division is the only one which shows any considerable fluctuation from the figures of the previous year. The district of the 24-Parganas returns no fewer than 32 true cases, and it is to be hoped that the special measures taken in this district towards the end of the year will have the effect of largely checking this form of crime. It is satisfactory to find that convictions under this head show material improvement over the figures of the preceding year. Burglary and theft cases numbered 2,023 more than they did in 1900, when the figures were unusually high. The small increase as compared with the preceding year may possibly, as suggested by the Inspector-General, be the outcome of improved reporting consequent on the increased use by the police of their power to refuse investigation, as well as of the pressure caused by high prices. With regard to the use made by the police of section 157, Criminal Procedure Code, it is difficult to understand the extraordinary variations which appear in the divisional figures on this subject. The Orissa police investigate 95 per cent. of their house-breaking cases and only 68 per cent. of their theft cases. The police of the Patna Division, on the other hand, investigate 94½ per cent. of theft cases and only 76 per cent. of burglary cases. Similarly, in the Bhagalpur and Presidency Divisions, 94 and 92 per cent., respectively, of theft cases are enquired into. In the Chittagong Division, only 75 per cent. of such cases are investigated. An absolutely uniform standard is neither possible nor desirable, but the Lieutenant-Governor is not aware that there is any sound reason for these wide fluctuations, which would appear to be the result of divergent interpretations by the local investigating officers of the instructions on the point issued for their guidance, and the Inspector-General is requested to make an examination of the figures brought to notice with a view to seeing whether a closer approach to uniformity cannot be achieved.

9. The number of persons bound down in bad-livelihood cases has increased from 4,127 to 4,410. Of the 3,782 cases instituted, only 2,061 were

tried locally. The Patna Division is the worst in this respect. Of 1,318 cases instituted, only 585 were tried in the villages of the accused. Of the 1,042 persons from whom security was demanded, the security of only 44, or 4 per cent., was accepted. In a separate communication the Lieutenant-Governor has addressed Commissioners on the question of the divergent practice followed in the various districts of the Province in regard to the amount of security demanded in bad-livelihood cases, and has asked whether the standard taken for such bonds is not generally too high. In the case of the Patna Division, there would appear to be little doubt on this point; before, however, coming to a final decision on the matter, the Lieutenant-Governor will await the reply of the local officers to the enquiry which he has addressed to them. He wishes now to lay emphatic stress on the danger of abuse by the local police officers of the powers conferred on them by law in the matter of these prosecutions, if not controlled with the greatest care, especially in the direction of local trials. When crime is at all prevalent in his jurisdiction, the expedient of getting shut up, as far as possible, every one to whom the least suspicion attaches is one that readily suggests itself to an idle or unscrupulous officer, though the process is one that must obviously entail a good deal of innocent suffering. It is easy for the police to procure half-a-dozen witnesses who will go to Court and swear that one of their neighbours is a bad character and fit to be bound down, and it is often only by a visit to the village of the accused that the Magistrate can satisfy himself as to the necessity or otherwise of the proceedings. Practically, every one of the cases instituted in the Patna Division was taken up on a report by the police or after investigation by them, and in view of this and of the divisional attitude in the matter of taking security, it is unsatisfactory to find that local enquiry was dispensed with in so large a percentage of the cases. Granted that it is most desirable that these proceedings when instituted should be carried through as quickly as possible, there is *primâ facie* no reason why this should not be as compatible with a local trial in the Patna Division as in other Divisions, and the necessity for the latter in the Patna Division is accentuated by the fact that, of the total number of persons in Bengal sent to jail for bad-livelihood, that Division contributes nearly one half. The attention of the Commissioner will be drawn to the matter, and he will be asked to report whether, in view of the above figures, a much larger proportion of these cases cannot be tried locally in the districts under him.

10. A satisfactory feature of the year is the decrease in the number of maliciously false cases: the percentage of these to cases reported has steadily declined during the last four years, and is now only 2·9. The Patna Division returns the highest percentage (4·0), and the Patna district the largest number of cases (426). It is disappointing to find that in only 19 of the latter were prosecutions instituted The Lieutenant-Governor is aware that conviction on these charges is as a rule very difficult to secure, but it would seem better to take the risk of an acquittal rather than encourage those who harass their neighbours by bringing such cases, in the belief that they can do so with impunity.

11. The figures under remands are worse than they were last year. Pabna, which was at the bottom of the list last year and the year before, is now last but one; and Manbhum, which in 1900 was last but one, is now actually the last. Unlike previous years, Pabna has on this occasion no explanation to offer, and the Commissioner will be asked to report why this district so persistently returns such bad results. There is no doubt that remands are very frequently necessitated by obstructive tactics on the part of the accused and those who appear on their behalf before the Courts, but there is no reason for supposing that Magistrates in the Pabna district have greater difficulties to contend with than those in other districts of the Province, and, in the absence of any other explanation, the Lieutenant-Governor is constrained to believe that the bad results shown in this respect by the district, which by the way calls for unfavourable criticism in many other details of its Police administration, must be attributed to a want of proper supervision on the part of the higher district authorities. The same remark is to be applied to remands in Manbhum, and the Commissioner of the Division will be asked to report why this district has occupied so low a place in the figures of the last two years. In the matter of re-convictions the usual divergencies appear in the district percentages of previous convictions, which vary from 22 in Muzaffarpur to 3½ in Jalpaiguri. From the Darbhanga figures as compared with those of the

district for the two previous years, and the Divisional figures for the three years 1899—1901, only one of two inferences can be drawn—either that old offenders, though they still have a weakness for the other districts of the Division, have given up going to Darbhanga to commit crime, or that the local officers have not attached sufficient importance to the desirability of proving, wherever possible, previous convictions. The Lieutenant-Governor is glad to notice the continued good work done by the Criminal Identification Department.

12. The process of substituting chaukidars under Act VI (B.C.) of 1870 for the men under the old Regulation XX of 1817, and for those holding service lands, has continued during the year, and the Dafadari system is now in force practically throughout the Province. Difficulty continues to be experienced in getting high-caste men to enlist as chaukidars. The Lieutenant-Governor is not sure that he understands the argument of the Inspector-General, in favour of the retention of a certain proportion of low-caste men as chaukidars, that high-caste men will not do all the work required of them. It is conceivable that there are localities in which, or conditions under which, it is advisable to appoint low-caste men, but it is not His Honour's intention that any chaukidar should be called on to perform duties, which any man of however high caste would feel it repugnant to undertake. The duty of carrying dead bodies for *post-mortem* examination, or of burying them, which has been imposed on chaukidars in the Burdwan district, is certainly not one which chaukidars should be called on to perform. Payments to chaukidars during the year have been more regular, and, as already remarked, there has been a satisfactory improvement in Chaukidari administration generally throughout the Province. The percentage of men rewarded has risen from 7·3 to 11·1. As usual, the difference in the treatment meted out to chaukidars in the various districts is very striking. In Puri, it was found necessary to punish 28 per cent. of the chaukidari force; in Balasore, only 3·8 were punished. In Hooghly, 33 per cent. came in for punishment; in the neighbouring districts of Midnapore and Howrah, 7 and 8 per cent., respectively, only were punished. In Nadia, over 51 per cent. were punished, only 3¼ per cent. rewarded: corresponding percentages in Dinajpur are 41 and 4½: yet the Nadia Reward Fund closed with a balance of Rs. 3,599; that of Dinajpur with one of Rs. 4,144; Purnea fined 16½ per cent. of its chaukidars, and rewarded 1 per cent. Instances might be multiplied. In view of the importance attaching to the judicious and considerate treatment of the members of this valuable adjunct to the Police force of the Province, the Lieutenant-Governor would ask Commissioners to carefully examine the figures of their respective districts, with a view to seeing that Magistrates and District Superintendents do not allow punishments and rewards to be a mere matter of routine, but satisfy themselves that punishments are awarded only where merited, and that rewards are given wherever deserved, provided the state of the Chaukidari Fund allows of it. In a separate communication, the Lieutenant-Governor has already commended to the notice of Commissioners the good results to be expected from the system of recognizing merit on the part of chaukidars by the grant to them of silver badges, if consistently and intelligently administered.

In a number of districts the rewards distributed have been low in amount the figures of the worst districts of 1901 have been for the three years indicated;

| | 1899. | 1900. | 1901. |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| Burdwan ... ... | 156 | 195 | 537 |
| Bankura ... ... | 119 | 104 | 208 |
| Jalpaiguri ... ... | 147 | 132 | 240 |
| Darjeeling ... ... | 143 | 127 | 212 |
| Monghyr ... ... | 465 | 539 | 316 |
| Bhagalpur ... ... | 840 | 1,052 | 846 |
| Purnea ... ... | 284 | 625 | 435 |
| Malda ... ... | 237 | 594 | 559 |
| Balasore ... ... | 85 | 90 | 125 |
| Palamau ... ... | 71 | 345 | 160 |
| Manbhum ... ... | 191 | 130 | 286 |
| Singhbhum ... ... | 349 | 113 | 169 |

Several of these districts were worse than in both the two years preceding: several are worse than in one of the two years: several exhibit greater carelessness in obeying orders for the first time. The officers concerned are being called upon to submit explanations.

The average amount paid as rewards varies enormously in the districts: in those where the Reward Fund is low, the amount must of necessity be small, but in Rangpur, where the Fund closed with a balance of nearly Rs. 8,000, it is at least open to consideration whether the average reward of Rs. 2 and a fraction might not be materially increased. In Pabna, though 28 per cent. of the chaukidars were punished, only Rs. 979 were paid in rewards. Last year only Rs. 496 were so expended, and yet it appears that the Fund closed with a balance of Rs. 7,823. The Commissioner will be asked to report whether this large balance is really due to the fact that so few of the chaukidars have merited rewards.

In certain districts, though the sums credited to the Chaukidari Fund were large and the balances were considerable, the payments were altogether inadequate, as the following statement shows:—

| | Collections. | Payments. | Balances. |
|---|---|---|---|
| | Rs. | Rs. | Rs. |
| Burdwan ... ... | 683 | 537 | 1,530 |
| Nadia ... ... | 3,586 | 1,264 | 3,599 |
| Dinajpur ... ... | 1,660 | 1,238 | 4,144 |
| Rangpur ... ... | 4,219 | 2,776 | 7,974 |
| Pabna ... ... | 1,257 | 979 | 7,823 |
| Faridpur ... ... | 1,970 | 1,671 | 3,819 |
| Backergunge ... ... | 3,007 | 1,206 | 2,838 |
| Chittagong ... ... | 481 | 638 | 1,504 |
| Saran ... ... | 2,217 | 3,005 | 4,557 |
| Muzaffarpur ... ... | 2,427 | 4,921 | 5,757 |
| Purnea ... ... | 984 | 375 | 1,846 |
| Puri ... ... | 917 | 873 | 1,073 |
| Singhbhum ... ... | 250 | 126 | 798 |

The attention of the Magistrates will be called to the neglect of Government orders in these districts. It is no sufficient answer that in Bengal, as a whole, the rewards to Chaukidars increased from Rs. 41,692 in 1899 to Rs. 47,600 in 1900 and Rs. 55,655 in 1901. Much more ought to have been done, and it is clear from these figures that money was available for the purpose.

13. The Inspector-General submitted his report with excellent punctuality, and has compressed it within the limits prescribed by Government without any corresponding diminution in its value.

ORDER—Ordered that copies of this Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

(a) The decrease is due (1) to the movements of pilgrims in connection with an eclipse of the Moon, (2) to passengers leaving Calcutta for the Durga Puja holidays, and (3) to he running of a mule train from Kidderpore Docks to Meerut in the corresponding period of 1901.

(b) The increase is chiefly in food-grains, salt, piece-goods, and coal traffic.

(*f*) The undertakers shall take all reasonable and proper precautions in constructing, placing, and maintaining their electric lines, circuits, and other works of any description, and in using their electric lines, circuits, and other works, so as not injuriously to interfere with the working of any wire, line, or apparatus from time to time used for the purpose of transmitting electric power, or of telegraphic, telephonic, or electric signalling communication, or the currents in such wire, line, or apparatus :

Provided, always, that the undertakers shall be deemed to take all such reasonable and proper precautions, as aforesaid, if, and so long as, they adopt, and employ at the option of the undertakers, either such insulated returns, or such uninsulated metallic returns of low resistance, and such other means of preventing injurious interference with the electric wires, lines, and apparatus of other parties, and the currents therein, as the Local Government shall direct; and in giving such directions, the Local Government shall have regard to the expense involved, and to the effect thereof upon the commercial prospects of the undertaking:

Provided, also, that, at the expiration of two years from the date on which the undertakers commence the public supply of electric power under the terms of this license, nothing in this sub-clause shall operate to give any right of action in respect of, or to protect any electric wires, lines, or apparatus, or the currents therein, unless, in the construction, erection, maintaining and working of such wires, lines, and apparatus, all reasonable and proper precautions, including the use of an insulated return, have been taken to prevent injurious interference therewith, and with the currents therein, by or from other electric currents.

If any difference arises between the undertakers and any other party with respect to anything in this sub-clause contained, such difference shall, unless the parties otherwise agree, be determined by the Local Government, or at the option of the Local Government, by an arbitrator to be appointed by the Local Government, and the costs of such determination shall be in the discretion of the Local Government, or of the arbitrator, as the case may be.

(*g*) Nothing in this sub-section shall apply to the use of any electric wire, circuit, or work, of the undertakers used, or intended to be used, for the supply of energy for electric lighting purposes, or for the purpose of providing motive power for domestic use, so far as such use is limited to such purposes.

*Works.*

Powers for execution of works.

10. Subject to the provisions of this license and the Act, the undertakers may, from time to time, exercise all or any of the powers conferred on them by this license and the Act, and may break up such streets not repairable by the Local Government or by the local authority, and such railways, tramways, and bridges (if any), as are specified in the third schedule, and open and break up

any sewers, drains, or tunnels within, or under, such streets, railways, tramways, and bridges, so far as such streets, railways, tramways, and bridges may, for the time being, be included in the area of supply, and be, or be upon, land dedicated to public use: Provided, however, as respects any such railway, that the powers hereby granted shall extend only to such parts thereof as pass across, or along, any highway on the level.

Subject, as aforesaid, the undertakers may also, from time to time, construct distributing boxes in any street for the purpose of supplying energy. Every such distributing box shall be for the exclusive use of the undertakers, and under their sole control, except so far as the Local Government may otherwise order, and shall be used by the undertakers only for the purpose of leading off service lines and other distributing conductors, or for examining, testing, regulating, measuring, converting, directing, or controlling the supply of energy, or for examining or testing the condition of the mains or other portions of the works, or for other like purposes connected with the undertaking, and the undertakers may place therein meters, switches, and any other suitable and proper apparatus for any of the above purposes, and may maintain and use the same. All work in connection with such distributing boxes shall be done at such times, and in such manner, as will cause as little obstruction and inconvenience as circumstances permit.

Prohibition of overhead wires.

11. The undertakers shall not, without the express consent of the Local Government, place any electric line above ground, along, over, or across any street.

If the undertakers place any electric lines in contravention of this section, they shall be liable to a penalty not exceeding one hundred rupees for every such offence, and in the case of a continuing offence, to a further penalty not exceeding fifty rupees for every day after the first day during which such offence continues.

11A. Whenever the undertakers shall, with such consent as aforesaid, place any electric line above ground, along, over, or across any street, they shall pay to the Corporation of Calcutta for every pole whereon such line shall be supported or carried along, over, or across such street, the annual rent of one rupee; and for every tripod whereon such line shall be so supported or carried, as aforesaid, the annual rent of two rupees; such rent to be paid on the first day of January in every year without deduction.

Notice of works with plan to be served on the Local Government and local authority.

12. Where the exercise of any of the powers of the undertakers in relation to the execution of any works (including the construction of distributing boxes) will involve the placing of any works in, under, along, or across any street or public bridge, repairable by the Local Government or by the local authority, the following provision shall have effect:—

(*a*) One month before commencing the execution of such works (not being the repairs, renewals, or amendments of existing works of which the character and position are not altered), the undertakers shall serve the notice upon the Local Government or the local authority, prescribed by section 7 of the Act, describing the proposed works, together with a plan of the works, showing the mode and position in which such works are intended to be executed, and the manner in which it is intended that such street or bridge, or any sewer, drain, or tunnel therein or thereunder is to be interfered with, and shall, upon being required to do so by the Local Government or the local authority, from time to time, give it, or them, any such further information in relation thereto as it, or they, may desire.

(*b*) The Local Government or the local authority may, in its, or their, discretion, approve of any such works or plan, subject to such amendments or conditions as may seem fit, or may disapprove the same, and may give notice of such approval or disapproval to the undertakers.

(*c*) If the Local Government or the local authority fail to give any such notice of approval or disapproval to the undertakers within one month after the service of the notice upon them, it, or they, shall be deemed to have approved such works and plan.

(*d*) Notwithstanding anything in this license or the Act, the undertakers shall not be entitled to execute any such works as above specified, except so far as the same may be of a description, and in accordance with a plan, which has been approved, or is to be deemed to have been approved, by the Local Government and the local authority as above mentioned, under this license; but where any such works and such plan are so approved, or to be deemed to be approved, the undertakers may cause such works to be executed in accordance with such plan, subject, in all respects, to the provisions of this license and of the Act.

(*e*) If the undertakers make default in complying with any of the requirements or restrictions of this section, they shall (in addition to any other compensation

which they may be liable to make under the provisions of this license or the Act) make full compensation to the Local Government and the local authority for any loss or damage which it, or they, may incur by reason thereof, and in addition thereto they shall be liable to a penalty not exceeding one hundred rupees for every such default, and, in the case of a continuing offence, to a further penalty not exceeding fifty rupees for every day after the first day during which such default continues: Provided that the undertakers shall not be subject to any such penalties as aforesaid if the court, having cognizance of the case, shall be of opinion that the case was one of emergency, and that the undertakers complied with the requirements of this section so far as was reasonable under the circumstances.

For the purposes of this license the word "plan" shall be held to mean a plan drawn to a horizontal scale of at least 1 inch to 100 feet, and a section drawn to a vertical scale of at least 1 inch to 10 feet, with such detail, plan, and section as may be necessary.

As to breaking up streets not repairable by Local Government or local authority, railways, and tramway.

13. Where the exercise of the powers of the undertakers in relation to the execution of any works will involve the placing of any works in, under, along, or across any street, or part of a street, not repairable by the Local Government or the local authority, or over or under any railway, tramway, or canal, the following provisions shall have effect, unless otherwise agreed between the parties interested:—

(*a*) Fourteen days before commencing the execution of any such works (not being the repairs, renewals, or amendments of existing works of which the character and position are not altered), the undertakers shall, in addition to any other notices which they may be required to give under this license or the Act, serve a notice upon the body or person liable to repair such street, or part of a street, or the body or person for the time being entitled to work such railway or tramway, or the owners of such canal (as the case may be), in this section referred to as the "owners," describing the proposed works, and stating the amount of compensation (if any) proposed to be made in respect thereof, and the manner in which such compensation is proposed to be paid or secured, together with a plan of the works, showing the mode and position in which such works are intended to be executed and placed, and shall, upon being required to do so by any such owners, from time to time, give them any such further information in relation thereto as they may desire.

(*b*) Every such notice shall contain a reference to this section, and direct the attention of the owners to whom it is given to the provisions thereof.

(*c*) Within one month after the service of any such notice and plan upon any owners, such owners may, if they think fit, serve a requisition upon the undertakers requiring that any question in relation to such works and any other question arising upon such notice or plan as aforesaid shall be settled by arbitration; and thereupon such question shall be settled by arbitration accordingly.

(*d*) In settling any question under this section, an arbitrator shall have regard to any duties or obligations which the owners may be under in respect of such street, railway, tramway, or canal, and may, if he thinks fit, require the undertakers to execute any temporary or other works, so as to avoid any interference with any traffic, so far as may be possible.

(*e*) Where no such requisition, as in this section mentioned, is served upon the undertakers, or where, after any such requisition has been served upon them, any question required to be settled by arbitration has been so settled, the undertakers may, upon paying or securing any compensation which they may be required to pay or secure in the manner proposed by them, or settled by arbitration as aforesaid, cause to be executed the works specified in such notice and plan as aforesaid, and may, from time to time, repair, renew, and amend the same (provided that their character and position are not altered), but subject, in all respects, to the provisions of this license and the Act, and only in accordance with the notice and plan so served by them as aforesaid, or such modifications thereof, respectively, as may have been settled by arbitration, as hereinbefore mentioned, or as may be agreed upon between the parties.

(*f*) If the undertakers make default in complying with any of the requirements or restrictions of this section, they shall (in addition to any other compensation which they may be liable to make under the provisions of this license or the Act) make full compensation to the owners affected thereby for any loss or damage which they may incur by reason thereof, and in addition thereto they shall be liable to a penalty not exceeding one hundred rupees for every such default, and, in the case of a continuing offence, to a further penalty not exceeding fifty rupees for every day after the first day during which such default continues: Provided that the undertakers shall not be

subject to any such penalties, as aforesaid, if the court, having cognizance of the case, shall be of opinion that the case was one of emergency, and that the undertakers complied with the requirements of this section, so far as was reasonable under the circumstances.

14. The undertakers may, from time to time, alter the position of any pipes (not forming part of any main sewer of the local authority), or any wires, being under any street or place authorised to be broken up by them, which may interfere with the exercise of their powers under the Act or this license; and anybody or person may, in like manner, alter the position of any electric lines or works of the undertakers, being under any such street or place, as aforesaid, which may interfere with the lawful exercise of any powers vested in such body or person in relation to such street or place, subject to the following provisions, unless otherwise agreed between the parties interested:—

(*a*) Fourteen days before commencing any such alteration, the undertakers, or such body or person (as the case may be), in this section referred to as "the operators," shall serve a notice upon the body or person for the time being entitled to such pipes, wires, electric lines, or works (as the case may be), in this section referred to as "the owners," describing the proposed alteration, and *stating the amount of compensation* (if any) proposed to be made in respect thereof, and the manner in which such compensation (if any) is proposed to be paid or secured, together with a plan showing the manner in which it is intended that such alterations shall be made, and shall, upon being required to do so by any such owners, from time to time, give them any such further information in relation thereto as they may desire.

(*b*) Within seven days after the service of any such notice and plan upon any owners, such owners may, if they think fit, serve a requisition upon the operators requiring that any question in relation to such works, *or any other question arising upon such notice or plan, as aforesaid, shall be settled by arbitration, and thereupon such question shall be settled by arbitration accordingly.*

(*c*) In settling any question under this section, an arbitrator shall have regard to any duties or obligations which the owners may be under in respect of such pipes, wires, electric lines or works, and may, if he thinks fit, require the operators to execute any temporary or other works, so as to avoid interference with any purpose for which such pipes, wires, electric lines, or works are used, so far as may be possible.

(*d*) Where no such requisition, as in this section mentioned, is served upon the operators, the owners shall be held to have agreed to the notice or plan served on them as aforesaid, and in such case, or where, after any such requisition has been served upon them, any question required to be settled by arbitration has been so settled, the operators, upon paying or securing any compensation which they may be required to pay or secure in the manner proposed by them, or settled by arbitration, as aforesaid, may cause the alterations specified in such notice and plan, as aforesaid, to be made, but subject, in all respects, to the provisions of this license and the Act, and only in accordance with the notice and plan so served by them, as aforesaid, or such modifications thereof, respectively, as may have been settled by arbitration, as hereinbefore mentioned, or as may be agreed upon between the parties.

(*e*) At any time, before any operators are entitled to commence any such alterations as aforesaid, the owners may serve a statement upon the operators, stating that they desire to execute such alterations themselves, and where any such statement has been served upon the operators, they shall not be entitled to proceed, themselves, to execute such alteration, except where they have notified to such owners that they require them to execute such alterations, and such owners have refused or neglected to comply with such notification, as hereinafter provided.

(*f*) Where any such statement, as last aforesaid, has been served upon the operators, they shall, not more than forty-eight hours, and not less than twenty-four hours before the execution of such alterations is required to be commenced, serve a notification upon the owners, stating the time when such alterations are required to be commenced, and the manner in which such alterations are required to be made.

(*g*) Upon receipt of any such notification as last aforesaid, the owners may proceed to execute such alterations as required by the operators, subject to the like restrictions and conditions as the operators would themselves be subject to in executing such alterations, so far as the same may be applicable.

(*h*) If the owners decline, or, for twenty-four hours after the time when any such alterations are required to be commenced, neglect to comply with such notification, the operators may, themselves, proceed to execute such alterations, in like manner as they might have done if no such statement, as aforesaid, had been served upon them.

(*i*) Expenses incurred by any owners in complying with any notification of any operators under the last preceding sub-sections shall be repaid to them by such operators, and may be recovered through a court of competent jurisdiction.

(*j*) Any owners may, if they think fit, by any statement served by them upon any operators under this section, require the operators to give them such security for the repayment to them of any expenses to be incurred by them in executing any alterations as above mentioned as may be agreed upon between such owners and operators, or, in default of agreement, as may be determined by arbitration, and where any operators have been so required to give security, they shall not be entitled to serve a notification upon the owners requiring them to execute such alterations until such security has been duly given.

(*k*) If the operators make default in complying with any of the requirements or restrictions of this section, they shall (in addition to any other compensation which they may be liable to make under the provisions of this license or the Act) make full compensation to the owners affected thereby for any loss, damage, or penalty which they may incur by reason thereof, and, in addition thereto, they shall be liable to a penalty not exceeding one hundred rupees for every such default, and, in the case of a continuing offence, to a further penalty not exceeding fifty rupees for every day after the first day during which such default continues: Provided that the operators shall not be subject to any such add tional penalties, as aforesaid, if the court, having cognizance of the case, shall be of opinion that the case was one of emergency, and that the operators complied with the requirements of this section so far as was reasonable under the circumstances.

Laying of electric lines, &c., near pipes for gas or water, and near sewers, drains, &c.

15. Whenever the undertakers require to dig or sink any trench for laying down any new electric lines (other than service lines), or other works, near to which any pipe, sewer, drain, water-course, defence, or work under the jurisdiction or control of the Local Government, or of any local authority, or belonging to any duly-authorized Company, or any branch, or service pipe for the supply of gas or water, has been lawfully placed, or where any duly-authorized Company requires to dig, or sink, any trench for laying down any new mains or pipes other than service pipes, or other apparatus, near to which any lines or works of the undertakers have been lawfully placed, the undertakers, or such duly-authorized Company (as the case may be), in this section referred to as the "operators," shall, unless otherwise agreed between the parties interested, give to the Local Government or local authority, or to such duly-authorized Company, or to the undertakers (as the case may be), in this section referred to as the "owners," not more than forty-eight hours, and not less than twenty-four hours' notice before commencing to dig or sink such trench as aforesaid, and such owners shall be entitled, by their officer, to superintend the digging or sinking of such trench, and the operators shall conform with such reasonable requirements as may, from time to time, be made by the owners, or such officer, for the protection of every such sewer, drain, water-course, defence, pipe, electric line, or work, and for securing the same from injury, and they shall also, if required to do so by the owners thereof, repair any damage that may be done thereto.

If the operators make default in complying with any of the requirements or restrictions of this section, they shall make full compensation to all owners affected thereby for any loss or damage which they may incur by reason thereof, and, in addition thereto, they shall be liable to a penalty not exceeding one hundred rupees for every such default, and, in the case of a continuing offence, to a further penalty not exceeding fifty rupees for every day after the first day during which such default continues: Provided that the operators shall not be subject to any such penalty if the court, having cognizance of the case, shall be of opinion that the case was one of emergency, and that the operators complied with the requirements and restrictions of this section, as far as was reasonable under the circumstances, or that the default in question was due to the fact that the operators were ignorant of the position of the sewer, drain, water-course, defence, pipe, electric line, or work affected thereby, and that such ignorance was not owing to any negligence on the part of the operators.

16. Seven days before commencing to lay down, or place, any electric line, or to use any electric line in any manner, whereby the work of telegraphic, or telephonic, or electric signalling communication through any wire or line, lawfully laid down, or placed in any position, may be injuriously affected, the undertakers shall, unless otherwise agreed between the parties interested, give to the owner of such wire or line, notice in writing, specifying the course, nature, and gauge of such electric line, and the manner in which such electric line is intended to be used, and the amount and nature of the currents intended to be transmitted thereby, and the extent to, and manner in which (if at all), earth returns are proposed to be used, and any owner entitled to receive such notice, may, from time to time, serve a requisition on the undertakers, requiring them to adopt such precautions as may be therein specified in regard to the laying, placing, or user of such electric line, for the purpose of preventing such injurious affection; and the undertakers shall conform with such reasonable requirements as

may be made by such owner for the purpose of preventing the communication through such wire or line from being injuriously affected, as aforesaid.

If any difference arises between any such owner and the undertakers with respect to the reasonableness of any requirements so made, such difference shall be determined by arbitration: Provided that nothing in this sub-section shall apply to repairs or renewals of any electric line, so long as the course, nature, and gauge of such electric line, and the amount and nature of the current transmitted thereby, are not altered.

If the undertakers make default in complying with any of the requirements or restrictions of this section, they shall make full compensation to the body or person entitled to any such wire or line, for any loss or damage which they may incur by reason thereof, and, in addition thereto, they shall be liable to a penalty not exceeding fifty rupees for every such default, and, in the case of a continuing offence, to a further penalty not exceeding twenty rupees for every day after the first day during which such default continues: Provided that the undertakers shall not be subject to any such penalties as aforesaid if the court, having cognizance of the case, shall be of opinion that the case was one of emergency, and that the undertakers complied with the requirements and restrictions of this section so far as was reasonable under the circumstances, or that the default in question was due to the fact that the undertakers were ignorant of the position of the wires or lines affected thereby, and that such ignorance was not owing to any negligence on the part of the undertakers.

*Compulsory works.*

Mains, &c., to be laid down in streets specified in the second schedule.

17. The undertakers shall, within a period of two years after the commencement of this license, lay down suitable and sufficient distributing mains for the purposes of general supply throughout every street, or part of a street, specified in that behalf in the second schedule, and shall thereafter maintain the same.

Mains to be laid down in remainder of area of supply.

18. In addition to the mains specified in the last preceding section, the undertakers shall, at any time after the expiration of eighteen months after the commencement of this order, lay down suitable and sufficient distributing mains, for the purposes of general supply, throughout every other street, or part of a street, within the area of supply, upon being required to do so in manner by this license provided.

All such mains as last above mentioned shall be laid down by the undertakers within six months after any requisition in that behalf served upon them in accordance with the provisions of this license has become binding upon them, or such further time as may, in any case, be approved of by the Local Government.

If undertakers fail to lay down mains, &c., license may be revoked.

19. If the undertakers make default in laying down any mains in accordance with the provisions of this license within the periods prescribed in that behalf, respectively, they shall be liable to a penalty not exceeding fifty rupees in respect of each such default for each day during which such default continues, and, if the Local Government are of opinion in any case, that such default is wilful, and unreasonably prolonged, they may themselves, or upon the application of the local authority, revoke this license as to the whole, or, with the consent of the undertakers, any part of the area of supply, or, if the undertakers so desire, may, after having given an opportunity to the local authority to make representations and objections with reference thereto, suffer the same to remain in force as to such area or part thereof, subject to such conditions as they may think fit to impose, and any conditions so imposed shall be binding on, and observed by, the undertakers, and shall be of the like force and effect in every respect as though they were contained in this license.

Manner in which requisition is to be made.

20. Any requisition requiring the undertakers to lay down distributing mains for the purposes of general supply throughout any street, or part of a street, under the last preceding sections, may be made by six or more owners or occupiers of premises along such street, or part of a street, or, where the Local Government or the local authority has the control and management of the public lamps in such street, or part of a street, by the Local Government or the local authority.

Every such requisition shall be signed by the owners and occupiers making such requisition, or by the Local Government or the local authority (as the case may be), and shall be served upon the undertakers.

Forms of requisition shall be kept by the undertakers at their office, and a copy shall be supplied, free of charge, to any owner or occupier of premises within the area of supply, and to the Local Government and the local authority, on applying for the same, and any requisition so supplied shall be deemed valid in point of form.

Provisions on requisition by owners or occupiers.

21. When any such requisition is made by any such owners or occupiers, as aforesaid, the undertakers (if they think fit) may, within fourteen days after the service of the requisition upon them, serve a notice on all the persons by whom such requisition is signed, stating that they decline to be bound by such requisition, unless such persons, or some of them, will bind themselves to take a supply of energy for three years, of such amount in the aggregate (to be specified by the undertakers in such notice) as will, at the rates of

charge for the time being charged by the undertakers for a supply of energy from distributing mains to ordinary consumers within the area of supply, produce, annually, such reasonable sum as shall be specified by the undertakers in such notice: Provided that, in such notice, the undertakers shall not be required to specify any sum amounting to less than twenty per centum upon the expense of providing, and laying down, the required distributing mains, and any other mains, or additions to existing mains, which may be necessary for the purpose of connecting such distributing mains with the nearest available source of supply.

Where such notice is served, the requisition shall not be binding on the undertakers unless, within fourteen days after the service of such notice on all the persons signing the requisition has been effected, or, in the case of difference, the delivery of the arbitrator's award, there be tendered to the undertakers an agreement, severally executed by such persons or some of them, binding them to take, for a period of three years at the least, such specified amounts of energy, respectively, as will, in the aggregate, at the rates of charge above specified, produce an annual sum amounting to not less than twenty per centum upon the expense of providing and laying down such distributing mains, or other mains, as above mentioned, nor unless sufficient security for the payment, to the undertakers, of all moneys which may become due to them from such persons under such agreement, is offered to the undertakers (if required by them by such notice as aforesaid) within the period limited for the tender of the agreement as aforesaid.

If any difference arises between the undertakers and any persons signing any such requisition as to the reasonableness of the amount specified by the undertakers in their notice, or as to the sufficiency of any security offered to them under the section, such difference shall be determined by arbitration.

Provisions on requisition by Local Government or local authority.

22. Where any such requisition is made by the Local Government or the local authority, it shall not be binding on the undertakers unless, at the time when such service is effected, or within fourteen days thereafter, there be tendered to the undertakers (if required by them) an agreement executed by the Local Government or the local authority, and binding them to take, for a period of three years at the least, a supply of energy for lighting such public lamps in the street, or part of a street, in respect of which such requisition is made, as may be under their management or control.

Map of area of supply to be made.

23. The undertakers shall forthwith, after commencing to supply energy under this license, cause a map to be made of the area of supply on a horizontal scale of at least 1 inch to 100 feet, and shall cause to be marked thereon the line of all their then existing mains, service lines, and other underground works and distributing boxes, and shall, once in every year, cause such map to be corrected, and such additions to be made thereto, as will show the line of all their then existing mains, service lines, and other underground works and distributing boxes.

Deposit and inspection of maps.

24. Every map so made, or corrected, for the undertakers, or a copy thereof, with the date expressed thereon of the last time when it was so corrected, shall be kept by the undertakers at their principal office within the area of supply, and a copy of every such map shall, within one month after such map is made or corrected, be served by the undertakers upon the Local Government and upon the local authority.

Every copy of the said map, as last corrected, which may be served upon the local authority, shall be kept by them at their office, and shall, at all reasonable times, be open to the inspection of all applicants, and such applicants may take copies of the same or any part thereof. The local authority may demand, and take from every such applicant, as aforesaid, such fee, not exceeding one rupee, for each inspection of such map or copy, and such further fee, not exceeding one rupee, for each copy of the same, or any part thereof, taken by such applicant, as they may, from time to time, prescribe.

Penalty on undertakers in respect of maps, &c.

25. If the undertakers fail to comply with any of the requirements of the last preceding sections of this license with respect to maps, they shall, for every such offence, be liable to a penalty not exceeding one hundred rupees, and to a further penalty not exceeding twenty rupees for every day, after the first day, during which such offence continues.

*Testing.*

Appointment of electric inspectors by Local Government.

26. The Local Government shall, from time to time, appoint, and keep appointed, one or more competent and impartial persons to be electric inspectors for the purpose of inspecting electric lines and works, and of certifying meters under this order.

Remuneration of electric inspectors.

27. The Local Government shall pay to every electric inspector appointed under this license such reasonable remuneration (if any) as they may, from time to time, determine, and such remuneration may be in addition to, or in substitution for, any fees which are directed to be paid to electric inspectors for services rendered by them under this license, as may be settled by the authority by whom such remuneration is determined: Provided that, where any such remuneration is settled to be in substitution for such fees as aforesaid, such fees shall, in lieu of being paid to such electric inspector for his own use, be due, and paid to him on behalf, and for the use of the Local Government, and shall be deposited by them in the public treasury.

28. Every electric inspector, if and when required to do so by the authority by whom he is appointed, shall, from time to time, test, for insulation and conductivity, any portion of any main of the undertakers within the area of supply through which energy is, or is intended to be, supplied by them: Provided that such testing shall not be made in regard to any particular portion of a main oftener than once in any three months, unless in pursuance of a special order in that behalf made by the Local Government.

Testing of mains.

29. Every electric inspector, if and when required to do so by any person supplied with energy by the undertakers, shall, from time to time, test, for insulation and conductivity, any service lines by which such energy is supplied, and the efficiency of any joints in such service lines, and make such other tests in relation to such service lines as may, from time to time, be approved of by the Local Government.

Testing of service lines.

30. Notice shall be given to the undertakers before the commencement of any testing by an electric inspector, and such testing shall be carried out at such suitable hours as, in the opinion of such inspector, will least interfere with the supply of energy by the undertakers, and in such manner as such inspector may think expedient, but, except under the provisions of a special order in that behalf made by the Local Government, he shall not be entitled to have access to, or interfere with, the mains of the undertakers at any points other than those at which the undertakers have reserved for themselves access to the said mains: Provided that the undertakers shall not be held responsible for any interruption in the supply of energy which may be occasioned by, or required by such inspector for the purpose of any such testing as aforesaid.

Mode of testing.

31. Every electric inspector shall, on the day immediately following that on which any testing has been completed by him under this license, make, and deliver, a report of the results of his testing, to the authority or person by whom he was required to make such testing, and to the undertakers, and such report shall be receivable in evidence.

Report of results of testing.

If the undertakers or any authority, company, or person are, or is, dissatisfied with any report of any electric inspector, they may appeal to the Local Government against such report, and thereupon the Local Government shall enquire into, and decide upon, the matter of any such appeal, and their decision shall be final and binding on all parties.

32. The undertakers shall, at such places within a reasonable distance from any distributing main, establish, at their own cost, such reasonable number of testing stations as the Local Government shall deem sufficient, for testing the supply of energy by the undertakers through such main, and shall place thereat proper and suitable instruments of a pattern to be approved by the Local Government, and shall connect such stations, by means of proper and sufficient electric lines, with such mains, and supply energy thereto, for the purpose of such testing.

Undertakers to establish testing stations.

33. The undertakers shall set up, and keep upon all premises from which they supply energy by any distributing mains, such suitable and proper instruments of such pattern and construction as may be, from time to time, approved of, or prescribed by, the Local Government, and shall, from time to time, take, and record, and keep recorded, such observations as the Local Government, from time to time, prescribe, and any observations so recorded shall be receivable in evidence.

Undertakers to keep instruments on their premises.

34. The undertakers shall keep in efficient working order all instruments which they are required by, or under, this license, to place, set up, or keep at any testing station, or on their own premises, and any electric inspector appointed under this license may, from time to time, examine and record the readings of such instruments at such times, and in such manner, as he may be directed by the authority by whom he is appointed, and any readings so recorded shall be receivable in evidence.

Readings of instruments to be taken.

35. Any electric inspector appointed under this license shall have the right to have access, at all reasonable hours, to the testing places and premises of the undertakers, for the purpose of testing the electric lines and instruments of the undertakers, and ascertaining if the same are in order, and in case the same are not in order, he may require the undertakers forthwith to have the same put in order.

Electric inspector may test undertakers' instruments.

36. The undertakers may, if they think fit, on each occasion of the testing of any main or service line, or the testing or inspection of any instruments of the undertakers by any electric inspector, be represented by some officer or other agent, but such officer or agent shall not interfere with the testing or inspection.

Representation of undertakers at testings.

37. All expenses of testing by an electric inspector, including such reasonable fees to the electric inspector as may, from time to time, be prescribed in that behalf by the local authority, with the approval of the Local Government, shall be paid by the undertakers, unless the report of the electric inspector, or, in the case of an appeal, the decision of the Local Government, shows that the local authority, or anybody or person supplied with energy, was guilty of any

Expenses of testing.

default or negligence, and in such case the expenses of the testing, including such fees as aforesaid, shall be ascertained by a court of competent jurisdiction and paid by such local authority, body, or person as the court shall direct.

Undertakers to give facilities for testing.

38. The undertakers shall afford all facilities for the proper execution of this license with respect to testing and the readings and inspection of instruments, and shall comply with all the requirements of or under this license in that behalf, and in case the undertakers make default in complying with any of the provisions of this section, they shall be liable to a penalty not exceeding fifty rupees, and, in the case of a continuing offence, to a further penalty not exceeding ten rupees for every day, after the first day, during which such offence continues.

Remedying of defects in mains, &c.

39. If, at any time, it appears to the Local Government that any mains, electric lines, or works of the undertakers are defective, and not in accordance with the regulations and conditions subject to which the undertakers are, for the time being, authorized to supply energy under this license, the Local Government may, by order in writing, require the undertakers to remedy such defect, so as to comply with such regulations and conditions, within such period as may be therein limited in that behalf, and, if the undertakers make default in remedying such defect within the time so limited, they shall be liable to a penalty not exceeding two hundred rupees for every day during which such default continues: Provided that if such defect is, in the opinion of the Local Government, dangerous to public safety, they may also, by any such order, as aforesaid, forbid the use of such main, electric line, or work, from such date as may be specified in that behalf, until the defect is remedied, and, if the undertakers make use of any such main, electric line, or work, while the use thereof is so forbidden, they shall be liable to a penalty not exceeding one thousand rupees for every day during which such continues.

*Supply.*

Undertakers to furnish sufficient supply of energy to owners and occupiers within the area of supply.

40. The undertakers shall, upon being required to do so by the owners or occupiers of any premises situate within fifty yards from any distributing main of the undertakers in which they are, for the time being, required to maintain a supply of energy for the purposes of general supply to private consumers under this license, or any regulations and conditions subject to which they are authorized to supply energy under this license, give, and continue to give, a supply of energy for such premises, in accordance with the provisions of this license, and of all such regulations and conditions, as aforesaid, and they shall furnish, and lay any electric lines that may be necessary for the purpose of supplying the maximum power with which any such owner or occupier may be entitled to be supplied under this license, subject to the conditions following (that is to say), the cost of so much of any electric line for the supply of energy to any owner or occupier as may be laid upon the property of such owner or in the possession of such occupier, and of so much of any such electric lines as may be laid for a greater distance than sixty feet from any distributing main of the undertakers, although not on such property, shall be defrayed by such owner or occupier.

41. Every owner or occupier of premises requiring a supply of energy shall—

(*a*) serve a notice upon the undertakers, specifying the premises in respect of which such supply is required, and the maximum power required to be supplied, and the day (not being an earlier day than a reasonable time after the date of the service of such notice) upon which such supply is required to commence; and

(*b*) enter into a written contract with the undertakers (if required by them so to do) to continue to receive, and pay for, a supply of energy for a period of at least three years, of such an amount that the rent payable for the same at the rate of charge for the time being charged by the undertakers for a supply of energy to ordinary consumers within the area of supply, shall not be less than twenty rupees per centum per annum on the outlay incurred by the undertakers in providing any electric lines required to be provided by them for the purpose of such supply, and give to the undertakers (if required by them so to do) security for the payment to them of all moneys which may, from time to time, become due to them by such owner or occupier in respect of any electric lines to be furnished by the undertakers, and in respect of energy to be supplied by them:

Provided, always, that the undertakers may, after they have given a supply of energy for any premises, by notice in writing, require the owner or occupier of such premises, within seven days after the date of the service of such notice, to give to them security for the payment of all moneys which may, from time to time, become due to them in respect of such supply, in case such owner or occupier has not already given such security, or in case any security given has become invalid, or is insufficient; and in case any such owner or occupier fail to comply with the terms of such notice, the undertakers may, if they think fit, discontinue to supply energy for such premises so long as such failure continues:

Provided, also, that if the owner or occupier of any such premises, as aforesaid, uses any form of lamp or burner, or uses the energy supplied to him by the undertakers for any purposes, or deals with it in any manner so as to unduly or improperly interfere with the

efficient supply of energy to any other body or person by the undertakers, the undertakers may, if they think fit, discontinue to supply energy to such premises so long as such user continues :

Provided, also, that the undertakers shall not be compelled to give a supply of energy to any premises unless they are reasonably satisfied that the electric lines, fittings, and works therein are in good order and condition, and not calculated to affect, injuriously, the use of energy by the undertakers or by other persons :

Provided, also, that in the event of any alterations of, or additions to, any electric lines, fittings, or works within such premises, as aforesaid, all such alterations or additions shall be notified to the undertakers by the occupiers before being connected to the source of supply, with a view to their being examined and tested.

If any difference arises between any such owner or occupier and the undertakers as to the reasonableness of the amount of any security required to be given, or as to the sufficiency of any security offered under this section, or as to the improper use of energy, or as to any alleged defect in any lines, fittings, or works, such difference shall be determined by arbitration.

Maximum power.

42. The maximum power with which any such consumer shall be entitled to be supplied shall be of such amount as he may, from time to time, require to be supplied with, not exceeding what may be reasonably anticipated as the maximum consumption on his premises :

Provided that, where any consumer has required the undertakers to supply him with a maximum power of any specified amount, he shall not be entitled to alter that maximum, except upon one month's notice to the undertakers, and any expenses incurred by the undertakers in respect of the service lines by which energy is supplied to the premises of such consumer, or any fittings or apparatus of the undertakers upon such premises, consequent upon such alteration, shall be paid by him to the undertakers, and may be recovered summarily as a civil debt.

If any difference arises between any such owner or occupier and the undertakers as to what may be reasonably anticipated as the consumption on his premises, such difference shall be determined by arbitration.

Supply of energy to public lamps.

43. The undertakers, upon receiving reasonable notice from the Local Government or the local authority, requiring them to supply energy to any public lamps within the distance of seventy-five yards from any distributing main of the undertakers in which they are, for the time being, required to maintain a current of energy for the purposes of general supply under this license, or any regulations and conditions subject to which they are authorized to supply energy under this license, shall give, and continue to give, a supply of energy to such lamps in such quantities as the Local Government or the local authority may, from time to time, require to be supplied.

Penalty for failure to supply.

44. Whenever the undertakers make default in supplying energy to any owner or occupier of premises to whom they may be, and are, required to supply energy, under this license, they shall be liable to a penalty not exceeding twenty rupees in respect of every such default for each day during which any such default occurs.

Whenever the undertakers make default in supplying energy to the public lamps to which they may be, and are, required to supply energy, under this license, they shall be liable to a penalty not exceeding twenty rupees in respect of every such default for each such lamp, and for each day during which any such default occurs.

Whenever the undertakers make default in supplying energy in accordance with the terms of any regulations and conditions subject to which they are authorized to supply energy under this license, they shall be liable to such penalties as may, by such regulations and conditions, be prescribed in that behalf :

Provided, always, that when such default is due to cyclones, or floods, or storms, or other causes not under the control of, or due to default of, the undertakers, no penalty shall be enforced if the undertakers show due diligence in resuming the supply :

Provided that the penalties to be inflicted on the undertakers under this section shall in no case exceed, in the aggregate, the sum of five hundred rupees in respect of any defaults not being wilful defaults on the part of the undertakers for any one day, and provided, also, that in no case shall any penalty be inflicted in respect of any default if the court, having cognizance of the case, shall be of opinion that such default was caused by inevitable accident, or *force majeure*, or was of so slight or unimportant a character as not materially to affect the value of the supply.

*Price.*

Methods of charging.

45. The undertakers may charge for energy supplied by them to any ordinary consumer (otherwise than by agreement)—

(1) by the actual amount of energy so supplied ; or

(2) by the electrical amount contained in such supply ; unless the Local Government, from time to time, otherwise direct ; or

(3) by the number of hours during which the supply of energy is actually used by such consumer, and the maximum power with which he is, for the time being, entitled to be supplied :

Provided that, before commencing to supply energy through any distributing main for the purposes of general supply, the undertakers shall give notice to the Local Government, and to the local authority, by what method they propose to charge for energy supplied through such main; and where the undertakers have given any such notice, they shall not be entitled to change such method of charging, except after one month's notice of such change has been given by them to the Local Government, and the local authority, and to every consumer of energy who is supplied by them from such main:

Provided, also, that when the undertakers have given notice to any consumer of charging him by the number of hours, and the maximum power, in manner above described, such consumer, if he objects to that method of charge, may, by one month's notice in writing, require the undertakers to charge him by the actual quantity of energy supplied to him, and thereafter the undertakers shall not, except with the consumer's consent, charge him by any other method.

Maximum prices.

46. The prices to be charged by the undertakers for energy supplied by them shall not exceed those stated in that behalf in the fourth schedule, in the first, second, and third sections thereof, respectively:

Provided that, if the Local Government are of opinion that, or the local authority, or the undertakers shall, at any time after the expiration of seven years after the commencement of this license, make a representation to the Local Government that the prices, or methods of charge stated in the said schedule ought to be altered, the Local Government, after such enquiry as they may think fit, may make an order varying the prices, or methods of charge, in lieu thereof, and the prices, or methods of charge so varied, or substituted, shall have effect on, and after, such day as may be mentioned in the order, as if they had been stated in the said schedule:

Provided, also, that the prices and methods of charge for the time being in force may be altered, in like manner, at any time after the expiration of any, or every, period of seven years after the same were last altered.

Other charges by agreement.

47. Subject to the provisions of this license and of the principal Act, and the right of the consumer to require that he shall be charged according to some one or other of the methods above mentioned in cases where he is entitled to require a supply, the undertakers may make any agreement with a consumer as to the price to be charged for energy, and the mode in which such charges are to be ascertained, and may charge accordingly.

Price to public lamps.

48. The price to be charged by the undertakers, and to be paid to them for all energy supplied to the public lamps, and the mode in which such charges shall be ascertained, shall be settled by agreement between the Local Government or local authority and the undertakers (as the case may be), and, in the event of difference, by arbitration, regard being had to the circumstances of the case, and the distributing, or other mains (if any) which may have to be laid for the purpose, and the prices charged to ordinary consumers in the district.

*Meters and Apparatus.*

Meters to be used except by agreement.

49. The energy supplied by the undertakers to any ordinary consumers under this license, or the electrical quantity contained in such supply (according to the method by which the undertakers elect to charge), in this license referred to as "the value of the supply," shall, except as otherwise agreed between such consumer and the undertakers, be ascertained by means of an appropriate meter, duly certified under the provisions of this license.

Meters to be certified.

50. A meter shall be considered to be duly certified under the provisions of this license if it be certified by an electric inspector, appointed under this license, to be of some construction and pattern, and to have been fixed, and to have been connected with the service lines, in some manner approved of by the Local Government, and to be a correct meter; and every such meter is, in this order, referred to as a "certified meter": Provided that where any alteration is made in any certified meter, or where any such meter is unfixed, or disconnected from, the service lines, such meter shall cease to be a certified meter unless, and until, it be again certified as a certified meter under the provisions of this license.

51. Every electric inspector, who may be required by the undertakers, or by any consumer, to examine any meter for the purpose of certifying the same as a certified meter under the provisions of this license, shall be entitled to demand, from the undertakers, or consumer, so requiring him and to be paid, such fees as may, from time to time, be determined, in that behalf, by the Local Government, before commencing such examination, and every electric inspector shall, upon being required so to do by the undertakers, or any such consumer, as aforesaid, examine any meter situate within the district for which he is appointed, if such fees are offered to him, as aforesaid, and shall certify the same as a certified meter if he considers it entitled to be so certified.

Undertakers to supply meters if required to do so.

52. Where the value of the supply is, under this license, required to be ascertained by means of an appropriate meter, the undertakers shall, if required so to do by the consumer, supply him with an appropriate meter, and shall, if required so to do, fix the same upon the premises of the consumer, and connect the service lines therewith, and procure such meter to be duly certified under the provisions of this license, and, for such purposes,

may authorize and empower any officer or person to enter upon such premises, and execute all necessary works, and do all necessary acts: Provided that, previously to supplying any such meter, the undertakers may require such consumer to pay to them a reasonable sum in respect of the price of such meter, or to give security therefor, or may require him to enter into an agreement for the hire of such meter as hereinafter provided, and also to pay to them a reasonable sum in respect of the expenses of fixing such meter, and connecting it with the service lines, and procuring the same to be certified under this license.

If any difference arises between the undertakers and any consumer under this section, such difference shall be determined by arbitration.

Meters not to be connected or disconnected without notice.

53. No consumer shall connect any meter used, or to be used, under this license, for ascertaining the value of the supply, with any electric line through which energy is supplied by the undertakers, or disconnect any such meter from any such electric line, unless he has given, to the undertakers, not less than forty-eight hours' notice in writing of his intention so to do, and if any person acts in contravention of this section, he shall be liable, for each offence, to a penalty not exceeding twenty rupees.

Consumer to keep his meter in proper order.

54. Every consumer of energy supplied by the undertakers shall, at all times, at his own expense, keep all meters belonging to him, whereby the value of the supply is, under this license, to be ascertained, in proper order for correctly registering such value, and, in default of his so doing, the undertakers may cease to supply energy through such meter.

The undertakers shall have access to, and be at liberty to take off, remove, test, inspect, and replace, any such meter at all reasonable times: Provided that all reasonable expenses of, and incident to, any such taking off, removing, testing, inspecting and replacing, and the procuring such meter to be again duly certified where such re-certifying is thereby rendered necessary, shall, if the meter be found to be not in proper order, be paid by the consumer, but if the same be in proper order, all expenses connected therewith shall be paid by the undertakers.

Power to the undertakers to let meter.

55. The undertakers may let for hire any meter for ascertaining the value of the supply, and any fittings thereto, and any other apparatus required for their undertaking for such remuneration in money, and on such terms, with respect to the repair of such meter, or apparatus, and fittings, and for securing the safety and return, to the undertakers, of such meter, or apparatus, and fittings, as may be agreed upon between the hirer and the undertakers, or, in case of difference, be decided by the Local Government, and such remuneration shall be recoverable by the undertakers summarily as a civil debt.

Undertakers to keep meter let for hire in repair.

56. The undertakers shall, unless the agreement of hire otherwise provides, at all times, at their own expense, keep all meters, let for hire by them to any consumer, whereby the value of the supply is ascertained, in proper order for correctly registering such value, and, in default of their so doing, the consumer shall not be liable to pay rent for the same during such time as such default continues. The undertakers shall, for the purposes aforesaid, have access to, and be at liberty to remove, test, inspect, and replace, any such meter at all reasonable times: Provided that the expenses of procuring any such meter to be again duly certified, where such re-certifying is, thereby, rendered necessary, shall be paid by the undertakers.

Differences as to correctness of meter to be settled by inspector or Local Government officer.

57. If any difference arises between any consumer and the undertakers as to whether any meter, whereby the value of the supply is ascertained (whether belonging to such consumer or the undertakers) is, or is not, in proper order for correctly registering such value, or as to whether such value has been correctly registered, in any case, by any meter, such difference shall be determined, upon the application of either party, by an electric inspector, or, where the Local Government are the consumers, by an officer to be appointed by the Local Government, who shall also order by which of the parties the costs of the proceedings before him shall be paid, and the decision of such inspector or officer shall be final and binding on all parties. Subject, as aforesaid, the register of the meter shall be conclusive evidence, in the absence of fraud, of the value of the supply.

Undertakers to pay expenses of providing new meters where method of charge altered.

58. Where any consumer who is supplied with energy by the undertakers from any distributing main is provided with a certified meter for the purpose of ascertaining the value of the supply, and the undertakers change the method of charging for energy supplied by them from such main, the undertakers shall pay to such consumer the reasonable expenses to which he may be put in providing a new meter for the purpose of ascertaining the value of the supply according to such new method of charging, and such expense may be recovered by the consumer from the undertakers summarily as a civil debt.

Undertakers may place meters to measure supply, or to check measurement thereof.

59. In addition to any meter which may be placed upon the premises of any consumer to ascertain the value of the supply, the undertakers may, from time to time, place upon his premises such meter, or other apparatus, as they may desire, for the purpose of ascertaining or regulating either the amount of energy supplied to such consumer, or the number of hours during which such supply is given, or the maximum amount of such supply, or any other quantity, or time, connected therewith: Provided that such meter shall be of

some construction and pattern, and shall be fixed and connected with the service lines in some manner approved by the Local Government, and shall be supplied and maintained entirely at the cost of the undertakers, and shall not, except by agreement, be placed otherwise than between the mains of the undertakers and the terminals on the consumer's premises at which the supply is given.

A notice, order, or document, by this license required, or authorized, to be served on the owner, or occupier, of any of the premises, shall be deemed to be properly addressed if addressed by the description of the "owner" or "occupier" of the premises (naming the premises) without further name or description.

A notice, order, or document, by this license required, or authorized, to be served on the owner, or occupier, of premises, may be served by delivering the same, or a true copy thereof, to some person on the premises, or if there is no person on the premises to whom the same can, with reasonable diligence, be delivered, by fixing the notice on some conspicuous part of the premises.

(*b*) If no purchase is effected by the Local Government or the local authority under the provisions aforesaid, the undertakers shall be at liberty to sell and dispose of the said undertaking, and all lands, buildings, works, materials, and plant, of the undertakers, to such persons, and in such manner, as to the undertakers, may seem fit, in their absolute discretion.

(*c*) If no purchase or sale shall be effected, the provisions of clause 65 (*e*) and (*f*) shall take effect, so far as they are applicable to the circumstances of the present clause (61A).

*Revocation of License.*

62. If, at any time, after the commencement of this license, the local authority make a representation to the Local Government, or the Local Government themselves are of opinion that the undertakers have made any default in executing works or supplying energy in accordance with the terms of the license, and that such default is in consequence of the insolvency of the undertakers, and that by reason of such insolvency the undertakers are unable, fully and effectually, to discharge the duties and obligations imposed upon them by this license, the Local Government shall enquire into the truth of such representation, and if, upon such enquiry, they are satisfied of the truth of such representation, they shall, upon the application of the local authority, or at their own discretion, revoke this license as to the whole, or, with the consent of the undertakers, as to any part of the area of supply.

63. If, at any time, after the commencement of this license, the undertakers represent to the Local Government, or the Local Government are of opinion that the undertaking cannot be carried on with profit, and ought to be abandoned, the Local Government shall enquire into the truth of such representation, and if, upon such enquiry, they are satisfied of the truth of such representation, they may, if, in their discretion, they think fit, revoke this license as to the whole, or (with the consent of the undertakers and of the local authority) as to any part of the area of supply.

Revocation of order with consent.

64. In addition to any other powers which the Local Government may have in that behalf, they may revoke this license at any time with the consent and concurrence of the undertakers and the local authority of the area (if any) upon such terms as the Local Government may think just.

Provision where order revoked.

65. If the Local Government at any time revoke this license as to the whole, or any part, of the area of supply, under any of the provisions of this license, the following provisions shall have effect :—

(*a*) The Local Government shall serve a notice of such revocation upon the undertakers, and upon the local authority of the area (if any), and shall, in such notice, fix a date at which such revocation shall take effect, and, from and after such date, all the powers and liabilities of the undertakers under this license for the supply of energy, within such area, or part thereof, as aforesaid, shall absolutely cease and determine.

(*b*) Within one month after the service of such notice by the Local Government, the local authority, or the Local Government, if they think fit, may, by notice in writing, require the undertakers to sell, and thereupon the undertakers shall sell, to them the undertaking, or such part of it as is within such area, or part thereof, as aforesaid, upon terms of paying the then value of all lands, buildings, works, materials and plant of the undertakers, suitable to, and used by, them for the purposes of the undertaking, within such area, or part thereof; such value being agreed, or estimated by arbitration, on the basis of the value of the undertaking as a going concern.

(*c*) Where no purchase is effected by the Local Government or the local authority under the provisions of the last sub-section, and any other local authority, Company, or person, is willing to purchase the undertaking, or such part of it, as aforesaid, the Local Government, if they think fit, may, with the consent of the undertakers, or without the consent of the undertakers, in case the price is not less than that for which the Local Government, or the local authority, might have purchased the same under this section, direct that the undertaking, or such part thereof, as aforesaid, shall be so transferred.

(*d*) Where any purchase is effected, or any transfer is directed under the preceding provisions of this section, the undertaking, or part thereof, so purchased or transferred, shall vest in the purchasers or transferees thereof, freed from any debts, mortgages, or similar obligations of the undertakers, or attaching to the undertaking; and the revocation of this license, as to the whole of the area of supply, or such part thereof, as aforesaid, shall extend only to the revocation of the rights, powers, authorities, duties, and obligations of the undertakers from whom the undertaking, or such part thereof, as aforesaid, is purchased or transferred, in relation to the supply of energy within such area, or part thereof, and, save as aforesaid, this license shall remain in full force within such area, or part thereof, in favour of the Local Government, or local authority, Company, or person, by, or to, whom such undertaking, or part thereof, is purchased or transferred, as aforesaid.

(*e*) Where no purchase has been effected, and no transfer has been directed under the preceding provisions of this section, the Local Government, the local authority, or any body or person, who may be liable to repair any street, or part of a street, in which any works of the undertakers may have been placed, may forthwith remove such works with all reasonable care, and the undertakers shall pay, to the Local Government, the local authority, or other such body or person, as aforesaid, such reasonable costs of such removal, and of the reinstatement of such street, or part of a street, as may be specified in a notice to be served on the undertakers by the Local Government, the local authority, or other body or person, or (if so required by the undertakers, within one week after the service of such notice upon them) as may be settled by arbitration.

If the undertakers fail to pay such reasonable costs, as aforesaid, within one month after the service upon them of such notice, or the delivery of the award of the arbitrator (as the case may be), the Local Government, the local authority, or other such body or person, as aforesaid, may, without any previous notice to the undertakers (but without prejudice to any other remedy which they may have for the recovery of the amount), sell and dispose of any such works, as aforesaid, either by public auction, or private sale, and for such sum or sums, and to such person or persons, as they may

think fit, and may, out of the proceeds of such sale, pay and reimburse themselves the amount of the costs so specified or settled, as aforesaid, and of the costs of sale, and the balance (if any) of the proceeds of the sale shall be paid over by them to the undertakers.

(*f*) In case the Local Government, the local authority, or any body or person, may be entitled to compensation for any damage sustained by them by reason, or in consequence of the execution of any works within such area, or part thereof, as aforesaid, or the exercise of any powers, by this license granted to the undertakers, or for any expenses to which such local authority, body, or person, may have been put in removing any works of the undertakers within such area, or part thereof, under the provisions of this license, such compensation shall be a first charge on any money that may have been deposited or secured, by the undertakers, under the provisions of this license, in respect of such area, or part thereof, and which may not have been repaid or released to the undertakers, and such money shall be applied rateably in satisfying such claims, and in every such case the amount of compensation to be paid, in respect of the various claims, and the persons to whom it is to be paid, shall be determined by arbitration.

*General.*

66. Where any consumer is required, under this order, to give security to the undertakers, such security may be by way of deposit, or otherwise, and of such amount as he and the undertakers agree on, or, as in default of agreement, may be determined, on the application of either party, by a court of competent jurisdiction, which may also order by which of the parties the costs of the proceedings shall be paid, and the decision of the said court shall be final and binding on all parties: Provided that, where any such security is given by way of deposit, the undertakers shall pay interest at the rate of five rupees per centum per annum on every sum of ten rupees so deposited for every six months during which the sum remains in their hands.

The decision of the majority shall prevail, and be final, when all three members are appointed. If either party shall neglect, or fail, to appoint its member of the committee within 30 days after the happening of the difference, or if the two members appointed by the parties hereto shall neglect, or fail, within the next succeeding 15 days after the expiration of the aforesaid 30 days, to appoint the third member, then all questions which would have been raised, or have come before the said committee for decision, shall be decided by such person as the Lieutenant-Governor of Bengal may nominate, and the decision of such person shall, in that case, be final and binding, absolutely, on both parties.

In all Civil Courts a uniform charge shall be made for the preparation of copies, whether certified or uncertified, at the rate of 3 annas per folio. This term, it is to be carefully explained to all subordinate officers, merely denominates a certain quantity of manuscript; the folio to consist of 150 words English, or of 300 words Vernacular, four figures counting as one word.

(*b*) This charge shall be levied by means of an impressed stamp of 3 annas[2] on each sheet of paper corresponding with the folio to be provided by the applicant for a copy. Each of these sheets shall contain a folio—that is, 150 words English or 300 words Vernacular. As there are 25 lines in each sheet, no line shall contain more than 6 words English or 12 words Vernacular.

[3] The duty of examining copies should, as a rule, be entrusted to the Comparing or Examining clerks, or if there are none in the office, to the Head Clerk or Sarishtadar. The copyists must not be allowed to examine for each other. Uncertified copies should only be marked as "examined" and initialled by the Examiner.

In every case, the Certifying Officer will append to his signature the words "authorised under section 76, Act I of 1872."

The words

> authorised under section 76, Act I of 1872.

may be impressed by means of a stamp.

(*f*) One-third of the charge of 3 annas per folio, levied by means of the impressed stamp, represents the payment to Government, on account of the salary of Examiners, cost of paper, etc., the remaining two-thirds will represent the earnings of the Section-writers, whose accounts will be made up monthly, and the amount due to each paid out of contingencies.[1] These payments must be checked at the time with the upper part of each stamp, which, when the copy is ready, must be torn off each sheet, along the perforated line, and then endorsed with the copyist's name, and kept till the end of the month. Care must be taken to see that nothing in excess of two-thirds of the amount realized in stamps, is paid away.

(*g*) To prevent the risk of stamped slips being used more than once, the officer passing a copyist's account will, after checking it as directed, tear the slips to pieces and cause them to be burnt in his presence. A certificate that this has been done must be attached to the contingent bill on which the copyist's fees are drawn.

(*h*) To protect the interests of the Government, care must be taken to see that all copies issued from the Courts are prepared on the prescribed stamp paper; they must be written on one side of the sheet only, and must not contain more than the authorised number of words. On the other hand, care must be taken to see that applicants are not imposed upon by the copyists spreading their writing over a larger number of sheets than is necessary. By insisting on the number of lines in each sheet being uniform, control may easily be exercised in this matter, the number of words in a few of the lines in each folio being checked. The business of a copyist is (like most other occupations) one calling for skill, and greatly dependent for its successful practice on experience; copyists, therefore, must possess or acquire skill in their business or they ought not to be retained. Copyists who fail to do their work satisfactorily must be removed.

(*i*) When an applicant requires his copies to be furnished on the day of application, an extra fee of one rupee (or, if the copies exceed four folios, of 4 annas for each folio)[2] shall be charged on all copies so furnished, to be levied from him by a Court-fee stamp, which should be affixed to the application for the copy and be entered in the Register for Court-fee stamps. Care, however, is to be taken that other applicants for copies do not materially suffer by the arrangement. If the granting of other copies be much delayed by this rule, an extra hand ought to be told off to furnish the copies urgently required.

(*j*) Under ordinary circumstances, the time for furnishing the copies required shall not be later than 1 P.M. of the fifth open day after the presentation of the application.

(*k*) When a copy of a decree, judgment or order is granted, the following particulars must invariably be recorded on the back of the copy itself, and in the form[3] given below, for the information of the Appellate Court (section 12, Act XV of 1877) :—

Date of application for the copy ... ... ...
Date of delivery of the requisite stamps and folios ... ...
Date on which the copy was ready for delivery ... ...
Date of making over the copy to applicant ... ...
Date of notifying the requisite number of folios and stamps ...

(*l*) In the case of certified copies, the Court-fee chargeable under the Court-fees Act should be levied by affixing the necessary stamp to the first folio of the copy.

(*m*) In the case of maps and plans, no general rule can be laid down. In each case a charge will have to be fixed with reference to the difficulty or intricacy of the work to be done. Half will be paid to the copyists, and half credited to Government on account of examination fees and cost of materials.

---

[1] The copyist is paid by the folio ; he would get his pay according to the number of folios copied whether the copies are subsequently taken out or not [H. C. No. 2168 (Criminal), 1881].

[2] This is a fee for credit to Government and no part of it is payable to the copyists. Expedition fees should be entered in column 5 of Annual Statement 1, Part III.

## NOTIFICATION.

*The 19th November 1902.*

THE following Rules having been framed by the High Court of Judicature at Fort William in Bengal under the authority vested in it by section 15 of the Statute 24 and 25 Victoria, Chapter 104, sanctioned by the Governor-General in Council, are published for general information.

By order of the High Court,

*Rule No. of 1902.*

For Rule 39, clauses (*a*), (*b*), (*c*), (*cc*), (*ccc*), (*d*), (*e*), (*f*), (*g*), (*h*), (*hh*), (*i*), (*j*), and foot-notes, Chapter VI, pages 135 to 139, Criminal Rules and Orders (Edition of 1883) substitute the following :—

39[1]. [*Charges for copies—C. O. No. 1 of 24th January 1890.*]—(*a*) In all Criminal Courts, a uniform charge shall be made for the preparation of copies, whether certified or uncertified, at the rate of 3 annas per folio. This term, it is to be carefully explained to all subordinate officers, merely denominates a certain quantity of manuscript; the folio to consist of 151 words English or of 300 words Vernacular, 4 figures counting as one word.

(*b*) This charge shall be levied by means of an impressed stamp of 3 annas[2] on each sheet of paper corresponding with the folio to be provided by the applicant for a copy. Each of these sheets shall contain a folio, that is, 150 words English or 300 words Vernacular. As there are 25 lines in each sheet, no line shall contain more than 6 words English or 12 words Vernacular.

(*c*) All copies whether certified or uncertified, must, before issue, be examined by a salaried officer.[3] The copies themselves will, in all cases, be made by Section-writers, who will be remunerated at the rate of 2 annas per folio.

(*d*) Uncertified copies may be converted into certified copies upon the application of the person to whom they have been granted, and upon his filing with such application the necessary court-fee stamps required by law.

(*e*) Certified copy must be "certified to be a true copy," must bear the seal of the Court, and must be signed in full, if not by the Presiding Officer, then by the officer hereinafter named, *viz* :—

*at the head-quarters of a District*—
all certified copies by the Head Clerk of the Court of the District Magistrate ;

*in Courts at Subdivisions*—
all certified copies by the Head Clerk of the Court of the Subdivisional Magistrate.

In every case, the certifying officer will append to his signature the words "authorised under section 76, Act I of 1872."

The words

(*f*) One-third of the charge of 3 annas per folio, levied by means of the impressed stamp, respresents the payment to Government on account of the salary of examiners, cost of paper, etc., the remaining two-thirds will represent the earnings of the Section-writers, whose accounts will be made up monthly, and the amount due to each paid out of contingencies.[4] These payments must be checked at the time with the upper part of each stamp, which, when the copy is ready, must be torn off each sheet, along the perforated line, and then endorsed with the copyist's name, and kept till the end of the month. [1] This rule took effect from the 1st of April 1890.

[2] Till such stamps are available, the sheets now in use for copies, each bearing an impressed (non-judicial) stamp of 4 annas, will, after they have been overprinted with the words "3 annas" in English and in the Vernacular, be sold for 3 annas per sheet.

[3] The duty of examining copies should, as a rule, be entrusted to the Comparing or Examining Clerks, or if there are none in the office, to the Head Clerk or Sarishtadar. The copyists must not be allowed to examine for each other.

[4] The copyist is paid by the folio ; he would get his pay according to the number of folios copied whether the copies are subsequently taken out or not.—(H. C. No. 2168, 1881.)

By insisting on the number of lines in each sheet being uniform, control may easily be exercised in this matter, the number of words in a few of the lines in each folio being checked. (*k*) When a copy of a judgment, sentence or order is granted, the following particulars must invariably be recorded on the back of the copy itself, and in the form[2] given below for the information of the Appellate Court (section 12, Act XV of 1877).

Date of application for the copy..... ..... .....
Date of delivery of the requisite stamps and folios .....
Date on which the copy was ready for delivery[3].....
Date of making over the copy to the applicant.....
Date of notifying the requisite number of folios and stamps.....

(*l*) In the case of certified copies, the Court-fee chargeable under the Court-fees Act should be levied by affixing the necessary stamp to the first folio of the copy.

(*m*) In the case of maps and plans, no general rule can be laid down. In each case a charge will have to be fixed with reference to the difficulty or intricacy of the work to be done. Half will be paid to the copyist, and half credited to Government on account of examination fees and cost of materials.[4]

[1] This is a fee for credit to Government, and no part of it is payable to the copyists. Expedition fees should be shown in column 5 of Annual Statement I, Part IV.

[2] This form is printed on the reverse of the stamped sheets now in use for copies.

[3] Compare IX, C. L. R. 293, which is to be strictly followed—(H. C. 1757, 1883.)

[4] In Criminal cases, parties are entitled to obtain copies, certified or uncertified, of any portion of the record of trial; this ruling covers such Police-papers as may be made use of as evidence at the trial. As regards other Police-papers, the High Court can pass no orders—(H. C. 1972, 1880, and 1652, 1882.)

Complainants must pay copying fees whenever they want copies. But an accused is, under section 371 of Act X of 1882, entitled, in cases other than summons cases, to a copy of the judgment absolutely free of charge and on plain paper—(H. C. Proceedings, May 1881.)

As a general rule, copies of exhibits in a Criminal case should certainly not be granted to persons who are strangers to the case. A Magistrate should use his discretion in each case, acting on the general principle that no copies should be given to a stranger without very good cause being shown—(H. C. 82, 1882.)

The following are the conditions of sale:—

1. The opium will be sold for exportation by sea only, and no certificate will be granted except to cover such export.

2. The opium will be ordinarily offered for sale at an upset price of Rs. 800 per chest, and sold to the highest bidder above that price, except under the circumstances for which

provision is made by clause 18 of these conditions of sale. The bids must advance by Rs. 5 at a time.

3. The sale shall commence at the hour of 11 A.M., of the day fixed by previous notification, and shall not be continued after the hour of 5 P.M., but if at that hour any of the lots advertised for sale shall remain unsold, the sale may, at the discretion of the Board of Revenue, be resumed on the next day following (not being Sunday or a public holiday), at the hour of 11 A.M., and so on until the whole of the remaining lots are disposed of; or if the whole quantity advertised shall not be sold on the day appointed, the Board of Revenue may dispose of the lots which remain on hand at a future sale.

4. Each lot shall contain five chests.

5. A Promissory Note for a sum, calculated according to the scale, noted in the margin, shall be taken as a deposit on each lot from the purchaser in the sale-room and before the lot is registered in the sale-book, and all such Promissory Notes shall be redeemed on the part of the purchasers at this Office by Bank of Bengal receipts or by substitution of other public securities of the Government of India, on or before 3-30 P.M., in the afternoon of the fifth day after the sale, provided it does not fall on a Saturday; if it falls on a Saturday, the said notes must be redeemed by 1-30 P.M., or, on the other hand, failing such redemption by the time aforesaid, then the lot or lots for which no Bank of Bengal receipts or deposit of other public securities as aforesaid shall have been delivered in, shall be re-sold at such time or times and under such conditions of re-sale as the Board of Revenue shall see fit; and all losses and expenses whatsoever attending such re-sale shall be borne and paid by the defaulters, whilst any profit accruing from such re-sale shall be forfeited to Government.

| DEPOSIT. |
|---|
| When the amount bid is less than Rs. 1,200 per chest, Rs. 200 per chest. |
| On bids of Rs. 1,200 and upwards, but less than Rs. 1,600 per chest, Rs. 300 per chest. |
| On bids of Rs. 1,600 and upwards, but less than Rs. 2,000 per chest, Rs. 400 per chest. |
| And so on, Rs. 100 being added to the deposit for every bid additional to the extent of Rs. 400. |

6. The said Promissory Notes shall be absolutely payable in any event, and the amount thereof shall be absolutely forfeited upon such default as before mentioned, and the amount thereof shall not go or be credited in reduction of any loss on re-sale or expenses thereby incurred, but shall be recoverable whether such re-sale shall be had or not, or whether there shall be a loss on such re-sale or not.

7. The Promissory Notes taken on the day of sale under the fifth condition, if remaining unredeemed at 3-30 P.M. of the fifth day following the day of sale, or 1-30 P.M., if the last day falls on a Saturday, will be placed in the hands of the Solicitor to the Government for realization in such manner as to him shall seem fit.

8. No tender of money, Bank of Bengal receipts, or public securities, on account of opium upon which the prescribed deposit may not have been made before the prescribed time in clause 5 on the fifth day following the day of sale, will be afterwards accepted. Provided always that money so subsequently tendered may be taken in payment of the said Promissory Note, but such acceptance of money shall in no way entitle the payer thereof to any right to delivery of the lot or lots in respect whereof the said note was given, or to any of the rights of a purchaser thereof, or release the payer from liability for any unpaid balance of such notes or from the additional liability for the loss and expenses of such re-sale as provided for in clauses No. 5 and No. 6.

9. The opium advertised for sale shall be paid for not later than by 3-30 P.M. of the fifteenth day from the day of sale, provided it does not fall on a Saturday; if it falls on a Saturday, the opium must be paid for by 1-30 P.M.; and in case any lots of such opium shall not be so paid for and adjusted, then the cash deposit made under the fifth condition, or any public securities that may have been deposited on account of such lots or chests, shall be forfeited, and the opium shall be disposed of on account of Government at such time and in such manner as the Board of Revenue shall think fit; and the first purchaser shall further be required to make good all expenses and any loss or difference of price between that obtained at the re-sale and the amount at which the opium was first purchased, forfeiting all advantages that may arise from such re-sale, and the liability for the loss or difference of price and expenses shall be in addition to, and wholly independent of, the amount of the deposit so forfeited.

10. Purchasers taking out certificates or orders for the delivery of opium, after making full payment as above prescribed, shall have the option of naming the number of lots of their purchase, which they may desire to be included in each certificate or order; and it is to be clearly understood that the certificates or orders so taken out shall be considered final, and not afterwards changeable for other certificates or orders authorizing the delivery of single lots, or of a different number of lots or chests, whether more or less, than the number of lots or chests ordinarily required to be included in each certificate or order.

11. No deposit of public securities under the fifth of the present conditions will be received in this office except from the party recorded as the purchaser in the sale-book, or his authorized agent. The receipt for deposit of public securities will be granted only in the name of such purchaser, and the securities so deposited will be returned when payment in full has been made by the said purchaser or his order.

12. The officer superintending the sale on the part of the Government is empowered to reject, at his discretion, the bid of any individual, unless such individual shall on demand render at the time a deposit either in Government of India Notes, Bank of Bengal receipts, or Government securities, a sum equal to the amount for which a Promissory Note would otherwise be taken under the fifth of these conditions.

13. With a view to prevent fictitious biddings designed to obstruct the sale, it is hereby notified that the officer of Government superintending the sale shall be competent, at any time during the sale, to withdraw any unsold lot, and immediately to put it up again for sale at a maximum upset price, diminishing the same gradually by Rs. 5 at a time until a bid is obtained; and the first *bonâ fide* bidder for a lot, after it has been offered for sale in the mode here described, shall be held and declared to be the purchaser of the said lot, and the officer of Government superintending the sale shall also be competent to dispose, in the same manner, of as many of the subsequent lots as he may think proper, provided always that no lot shall be sold below the minimum price of Rs. 800 specified in the second of these conditions.

14. The purchaser of any lot shall have the option of naming and purchasing in immediate succession, at the same price and under the same conditions, any number of lots of the same Agency opium not exceeding altogether twenty-five lots, provided always that there remain a sufficient number of lots of the opium to complete the said twenty-five.

15. In the event of any dispute or difference touching or concerning any matter or question arising out of the sale of the opium included in this notification, or adjustment of the account thereof, the same shall and may be tried and decided in the High Court of Judicature at Fort William in Bengal.

16. The following papers will be exhibited for inspection on the day of sale, or may be seen previously to that date by personal application at the Office of the Board of Revenue:—No. 1, Certificate of the opium advertised for sale; No. 2, Report of the examination of such opium.

17. The public are hereby informed that in providing the investment of the opium manufactured at the Patna Factory and the opium manufactured at the Ghazipur Factory for the year 1901-1902, the same precautions have been taken as those which have been observed during past years to have the drug procured and sent down in a pure state, to have only the prescribed quantity of leaves used in forming the cakes, and to have the due proportion of opium put into each cake. An account of the weight of the drug, when packed at the Patna and Ghazipur Factories, and a statement of the average weight of the chests, indiscriminately taken, for the purpose of comparison, from the despatches on arrival at Calcutta, may be seen on personal application at the Office of the Board of Revenue.

18. Any further information respecting weight or quality of the opium advertised for sale that may be desired by parties connected with the trade will, as heretofore, be furnished to them on personal application at the Office of the Board of Revenue. But, in accordance with established usage, under no circumstances will the Board of Revenue entertain or recognize any claim to compensation for loss from any alleged deficiency of weight, abstraction of opium, or adulteration of the drug, which may be preferred on reference to chests after the sale and delivery of the opium for shipment.

# CUSTOM HOUSE NOTICE.

## NOTICE.

THE following revised rules for expediting the clearance of imported goods will be tried until further notice at the Custom House. Their object is to enable the importers to pass their bills of entry through most of the stages required in the office before the arrival of a vessel. The obstacle that has hitherto existed to taking advantage of this procedure has been that it was considered necessary to obtain the agents' delivery order before presentation of the bill of entry, which agents were unwilling to give prior to the vessel's arrival. It will be seen that this order has now been dispensed with, and it is only necessary to obtain the manifest line number on the bill of lading. The rules have also been extended to the coasting trade. Copies may be obtained on application at the Custom House.

*Rules to expedite the clearing of imported goods through the Custom House.*

When any vessel is expected shortly to arrive in the port and the agents desire to avail themselves of the facilities provided by these rules, they may file an application for inward entry of the vessel, together with the import manifest, in duplicate, at any time, not exceeding seven days, before the probable date of arrival.

2. The application shall be in the ordinary form, and shall, in addition to the usual particulars, state the probable date of arrival of the vessel, and shall contain an undertaking by the agents that they will, immediately after her arrival in port, procure—

(*a*) the Master's authority appointing them his agents;
(*b*) two copies of the store list signed by the Master; and
(*c*) such other documents as are prescribed by the Customs authorities.

It must also be distinctly stated in the application that the latter is made under and subject to these rules.

3. On receipt of such an application, together with the import manifest, in duplicate, a notice to that effect shall be published in the Custom House Daily List of Imports, for the information of owners of goods imported.

4. Thereupon and notwithstanding that the order for inward entry has not yet been given owners of goods imported may present their bills of entry accompanied, where necessary, by bills of lading showing the manifest line number of the consignment and invoices, and may proceed to go through the whole procedure for clearing their goods (including the payment of duty when this is permitted by rule 5) in accordance with existing rules, in the same manner as if the vessel had actually arrived, down to the stages mentioned in paragraph 6 below. The agents' delivery order is not required at this stage on the bill of lading.

5. Each bill of entry must contain definite statements (1) that it is presented under and subject to these rules, and (2) for the purposes of section 37 of the Sea Customs Act that it is expressly agreed that it shall be deemed to be delivered on the date when the order for inward entry is passed and the bill of entry shall in fact be so deemed to be delivered.

6. Subject to these conditions, the stages to which owners of goods imported may go in anticipation of the vessel's arrival are as follows:—

(*a*) In the case of overside goods the order to appraise and out-pass.
(*b*) In the case of goods which are opened for examination the order to open and examine.
(*c*) In the case of goods of which the whole or a percentage is sent into the Custom House, the order to send the whole or a percentage.
(*d*) In the case of bonded goods, the stage preceding the execution of the bond.
(*e*) In the case of salt intended for delivery within the excepted limits, the issue of the salt certificate.
(*f*) In the case of salt intended for delivery beyond the excepted limits, the grant of the salt duty receipt.

7. When the vessel arrives in port, the agents shall give notice of the fact to the Assistant Collector, at the same time producing the Master's authority appointing them his agents and filing the store lists and other documents required by the Customs as provided by rule 2, and the Assistant Collector shall thereupon give the formal order for inward entry.

8. On the arrival of the vessel, importers will take up the clearing of their goods at the stage to which it had been carried previously.

9. No fee will be charged for filing an amended or supplementary manifest prior to the formal order for inward entry. For amending or supplementing manifests, after such order has been given, the usual fees will be charged.

10. The Collector of Customs reserves to himself the right to withhold the privilege allowed by these rules in any case, at his discretion without stating reasons; or to grant it subject to such conditions as may seem to him necessary in the particular case.

11. The facilities allowed by these rules extend to Coasting as well as Foreign trade.

By order of the Governor-General in Council,

H. H. RISLEY,
*Offg. Secy. to the Govt. of India.*

*The 21st November 1902.*

*No. 3530.*—The Governor-General in Council has received with profound regret the news of the death of Sir John Woodburn, Lieutenant-Governor of Bengal.

Entering the Civil Service as long ago as 1863, the deceased officer had risen through all the grades of promotion, everywhere performing his duties with conspicuous integrity and efficiency, and endearing himself alike to superiors and to subordinates, to his own countrymen, and to the people of India.

These services were nowhere more meritorious or crowned with greater success than in the Province of Oudh, where many years of his life were passed and where his name will long be held in affectionate remembrance.

At length in 1898 Sir John Woodburn received the prize of the service on being appointed Lieutenant-Governor of Bengal.

In that exalted station, though serving in a province to which he had for the greater part of his career been a stranger, the late Lieutenant-Governor speedily acquired a close familiarity with the work and the people, identifying himself with their interests, and earning in an unusual degree the esteem and confidence of the leaders of the community.

In the sympathetic and unflagging execution of his duties, which carried him to every part of his vast charge, were sown the seeds of the disease that has cut him off in his prime, but to which he did not succumb without a struggle conducted with unmurmuring patience and in a spirit of characteristic courage and tenacity.

The Governor-General in Council mourns the premature loss of this distinguished public servant, whose career will always remain a bright example of public and private virtue; and he tenders his respectful sympathy to the widow and family of the deceased.

*The 20th November 1902.*

*No. 3494.*—In exercise of the powers conferred by sections 17 and 27 of the Indian Arms Act, 1878 (XI of 1878), the Governor-General in Council is pleased to direct that the following further amendments shall be made in the Notification of the Government of India in the Home Department, No. 518, dated the 6th March 1879, as amended by subsequent notifications, namely:—

*Paragraph I.—For* the words "rifles of ·303 bore or rifles of ·450 or ·577 bore of the Martini-Henry or Snider pattern" *substitute* the words "rifles of ·303 bore or rifles of ·450 bore of the Martini-Henry pattern;" and *for* the word "patterns" *substitute* the word "pattern."

*Paragraph I, clause (8).—Substitute* the following revised clause:—

"(8) All retired officers of the Native Army who are in receipt of a pension as such, or who, not being in receipt of such a pension, have been recommended for exemption by their Commanding Officers by entry recorded on their discharge certificates, and such pensioned officers of the Civil Departments as the Local Government may, by general or special order, direct."

**Mymensingh.**

1. The owner or occupier of any house or land requiring water to be laid on for domestic purposes, or requiring any addition or alteration to the existing water-supply, must apply for the same in a printed form to be supplied to him free of cost at the Commissioners' office. A specimen of the printed form is given in the schedule annexed hereto.

2. Every such applicant for a new connection shall pay a sum equal to one-third of the annual valuation of his holding, or in case where the one-third of the valuation is below Rs. 100, the sum of Rs. 100.

Provided that if the Commissioners at any time deem it practicable and consistent with the maintenance of an efficient water-supply, they shall be competent to allow owners and occupiers paying water-rate to take house-connections without payment of any premium or at such other scale of premium as they may think proper.

3. Every applicant for a new house connection shall deposit the amount payable by him under Rule (2) before his application can be considered by the Commissioners.

4. Each holding shall have a separate connection, and extensions from the communication pipe of one holding to another will not be allowed.

5. A house-connection shall comprise the following parts :—

No meter shall be fixed under ground except in a brick well or chamber. No meter shall be disconnected or in any way interfered with except with the permission of the Commissioners.

8. The Commissioners shall depute some authorised person to read every meter not less than once a quarter, and shall give notice to the occupier at least 24 hours before the reading is recorded. If the quantity of water consumed in any quarter exceeds that to which the occupier is entitled, written notice to that effect shall be served upon him.

9. The house-connection when fitted in position must be capable of standing a pressure of 100 feet, and no water shall be supplied until this test has been applied by the Commissioners.

10. The number of taps in a house or holding shall be fixed according to the annual valuation of the premises as follows :—

The size of the ferrule will be decided by the Commissioners, but its diameter shall not differ from that of the communication pipe by more than quarter inch.

11. The diameter of the communication pipe will be determined with regard to the average pressure in the main supply pipe at the standpost nearest the house for which a connection is required and to the quantity of water to be supplied according to the provisions of sect on 295. The diameter of the pipe shall be such that it will be competent to deliver half the daily supply in six hours.

12. The surface box shall rest on brickwork foundations, and shall be so designed that it can be locked, and the key of it shall remain under the control of the Commissioners.

*New Leading Lights.*

THE Port Master, Brisbane, has given Notice (No. 10 of 1902) that, on and after the first day of November 1902, the following Leading Lights will be exhibited to enable vessels to pass through Normanby Sound by night, viz:—

*Entrance Lead.*—Two bright lights, the front one carried on the black beacon marking the S. E. extremity of Wai-weer Reef, the back one on the slope of the south knoll of Hammond Island, in line N. 79° E.

*Wai-weer and Vivian Point Lead.*—Two bright lights, the front one carried on the black beacon marking the W. extremity of Wai-weer Reef, and the back one on the hill on Goode Island marked 316 feet, in line bearing N. 70° 30′ W.

*Jetty Lead.*—Two red lights, the front one on the jetty, and the back one on the slope of Milman Hill, in line bearing N. 49° E. This lead was discontinued formerly, but will now be re-established.

*Directions.*

Vessels approaching Thursday Island by Normanby Sound at night will proceed as usual until two bright lights are opened out ahead, which must be kept in line on a bearing of N. 79° E. until two bright lights are opened out astern bearing N. 70° 30′ W. Keep the latter in line until two red lights are opened out on a bearing of N. 49° E., which are to be kept in line until jetty is approached.

As these lights have been placed to meet the requirements of the coastal steamers, caution is necessary in navigating vessels of greater length and capacity, by reason of the strong and erratic tides prevailing in this locality.
